### Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit  
External Trade Division,

### How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6.

### Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## MERCHANDISE TRADE (BALANCE OF PAYMENTS BASIS)

The statistics presented in Part I (Analytical Charts and Tables) are adjusted to conform with the National Accounts concepts and definitions. Balance of Payments adjustments to Customs Basis data are incorporated at an aggregated level in order to make them compatible with the system of National Accounts.

### BALANCE OF PAYMENTS ADJUSTMENTS

#### Coverage or Valuation

- *Automotive Products:* Deductions are made for both exports of cars and trucks and imports of automotive parts for retroactive value adjustments and for special tooling and other charges.
- *Gold:* Adjustments are made to customs basis trade data when there is no change in ownership and additional adjustments are made for transactions between Canadians and non-residents for gold which remains in Canada.
- *Other adjustments* include United States/Canada Trade reconciliation, advertising, official valuation, freight and other adjustments.

#### Timing

- *Grains:* The Canadian Grain Commission's records of grain clearances from exporting warehouses during the full calendar month are used to adjust Trade of Canada series for grain exports. The volume of clearances obtained from this source are combined with unit values from customs-based series to derive hybrid estimates which are substituted for original customs series.
- *Energy:* Trade in electricity; exports of crude petroleum and natural gas, and imports of "swap oil" from the United States, are adjusted to account for the one month reporting lag. Starting with January 1984 data, the adjustments apply only to the current month for exports of electricity, crude petroleum and natural gas, as customs based data are shifted back one month, thus reflecting the true statistical month.
- *Ships, Civil Aircraft and Military Equipment:* The adjustment substitutes progress payments in connection with the construction of ships, civil aircraft and some military equipment, in place of the actual deliveries of the equipment recorded in the Trade of Canada series.

For detailed description of sources and methods please refer to Cat. 67506E Occasional "The Canadian Balance of International Payments and International Investment Position".

#### Geographic Classification

On a balance of payments basis, trade with the United States includes trade with Puerto Rico and the Virgin Islands.

### SEASONAL ADJUSTMENT

Total exports (domestic exports and re-exports) and imports on a seasonally adjusted basis are now calculated indirectly as the sum of approximately sixty commodity aggregates. Where stable seasonality

## COMMERCE DES MARCHANDISES (BASE DE LA BALANCE DES PAIEMENTS)

Les statistiques présentées à la partie I (graphiques et tableaux analytiques) seront ajustées conformément aux concepts et aux définitions des comptes nationaux. Les corrections apportées aux chiffres douaniers aux fins de la balance des paiements sont intégrées au niveau des groupes pour rendre ces données compatibles avec celles du système des comptes nationaux.

### CORRECTIONS EN FONCTION DE LA BALANCE DES PAIEMENTS

#### Champ d'observation ou évaluation

- *Produits automobiles:* On effectue dans le cas des exportations d'automobiles et de camions et des importations de pièces de véhicules automobiles, une déduction ayant pour objet de corriger rétroactivement la valeur et de tenir compte des frais d'outillage spéciaux et autres.
- *Or:* On corrige les données douanières du commerce quand il n'y a pas de changement de propriété et on effectue des corrections supplémentaires pour les transactions au Canada entre les canadiens et les étrangers.
- *Les autres corrections* comprennent le rapprochement du commerce entre les États-Unis et le Canada, la publicité, l'évaluation officielle, les frais de transport et autres.

#### Période

- *Céréales:* Les données des exportations de grains tirées des séries du Commerce du Canada sont ajustées en fonction des chiffres que renferment les dossiers des expéditions de grains des entrepôts d'exportation établis par la Commission canadienne des grains pour un mois civil donné. Le volume des expéditions obtenu de cette source est combiné aux chiffres obtenus des séries douanières pour produire des estimations mixtes qui remplacent les séries douanières initiales.
- *Énergie:* Le commerce de l'électricité, les exportations de pétrole brut et de gaz naturel et les importations de pétrole d'échange des États-Unis, sont ajustés pour tenir compte du délai de déclaration d'un mois. À compter des données de janvier 1984, les corrections ne s'appliquent qu'au mois courant dans le cas des exportations d'électricité, de pétrole brut et de gaz naturel, étant donné que les chiffres douaniers sont décalés d'un mois, de sorte qu'ils correspondent au mois statistique véritable.
- *Navires, avions civils et matériel militaire:* Les ajustements remplacent les chiffres des livraisons réelles de matériel compris dans les séries du Commerce du Canada par les paiements échelonnés effectués relativement à la construction de navires, d'avions civils et de certains articles de matériel militaire.

Pour obtenir une description détaillée des sources et des méthodes, se référer à la publication 67-506F au catalogue, (hors série) *La balance des paiements et le bilan des investissements internationaux du Canada*.

#### Classification géographique

Sur la base de la balance des paiements, le commerce avec les États-Unis englobe le commerce avec Porto Rico et les îles Vierges.

### DÉSAISONNALISATION

Le total des exportations (exportations nationales et réexportations) et les importations désaisonnalisées sont maintenant calculés indirectement, étant constitués de la somme d'environ soixante groupes de produits.

cannot be reliably identified, the series is not seasonally adjusted. Therefore, seasonally adjusted total exports and imports represent a combination of raw and seasonally adjusted data. Previously the total was seasonally adjusted from raw data at the total level.

## PRICE INDEXES

### Timing

From 1971 to 1983, the export price indexes for electricity, natural gas and crude petroleum on a customs basis which were lagged one month have been adjusted to represent the true calendar month. Similarly, the import price index for crude petroleum from the United States on a customs basis has been adjusted and recombined with the "other country" import price index in order to arrive at an "All country" import price index. From January 1984, onward, the one month lag is now corrected on a customs basis.

### Aggregate Levels

Indexes at an aggregate level (section and total levels) are calculated by using value weights on a balance of payments basis with price indexes derived from customs data.

## DATA AVAILABILITY

Data on a balance of payments basis are available on CANSIM.

Lorsqu'il est impossible de déceler une variation saisonnière régulière, les séries ne sont pas désaisonnalisées. Par conséquent, le total désaisonnalisé des exportations et des importations est constitué d'une combinaison de données brutes et de données désaisonnalisées. Auparavant, le total était désaisonnalisé à partir des totaux bruts.

## INDICES DE PRIX

### Période

Les indices des prix à l'exportation, exprimés en chiffres douaniers, de l'électricité, du gaz naturel et du pétrole brut pour 1971 à 1983, qui étaient décalés d'un mois, ont été corrigés et correspondent actuellement au mois civil réel. De même, l'indice des prix à l'importation du pétrole brut des États-Unis, exprimé en chiffres douaniers, a été corrigé et combiné à l'indice des prix à l'importation des "Autres pays" de façon à produire un indice des prix à l'importation pour "Tous les pays". Le décalage d'un mois est corrigé dans les chiffres douaniers depuis janvier 1984.

### Niveau agrégé

Les indices agrégés (section et total) sont calculés à l'aide de poids fonctions de la valeur, sur la base de la balance des paiements, à partir d'indices de prix obtenus des données douanières.

## DISPONIBILITÉ DES DONNÉES

Les données sur la base de la balance des paiements se trouvent dans CANSIM.

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last two months is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

La tendance pour les deux derniers mois n'est pas reportée sur les diagrammes ci-dessus parce qu'elle change fréquemment de façon appréciable avec l'inclusion des données des mois suivants.

- A. **Sources of Statistics:** Canada's external trade statistics are tabulated from copies of administrative documents collected by Revenue Canada, Customs at its ports across Canada. The Customs Act requires that each time goods are imported into or exported from Canada a document be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation of external trade statistics is determined and limited to some extent by Customs regulations and procedures. Where these affect the precise or consistent application of the statistical principles explained in the following section, their impact is described in qualitative terms only.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, for administrative reasons, be obtained from Customs documents. They are instead collected by the Manufacturing and Primary Industries Division of Statistics Canada, with important statistical consequences explained in Note 4 below.

Commencing with the May 1984 data export statistics for shipments of less than \$5,000 (up from \$2,500) and greater than \$800 (up from \$500) from Quebec, Ontario, Manitoba and British Columbia to the United States are estimated on this basis of a 20 per cent sample. The size of this sample is at present approximately 15,000 (up from 10,000) shipments per month. For further information, refer to the explanatory notes in the publication *Exports by Commodities* (cat. no. 65-004).

Effective January 1, 1982, the 10 per cent systematic sample of low valued import documents from the United States, as applied since January 1969 and revised in January 1975, has been discontinued. Starting with January 1984 data, all shipments exceeding \$800 are processed and compiled by complete count, while the value of shipments below \$800 is estimated. Prior to 1984 the low-value limit was \$500.

- B. **Concepts and Definitions Used in the Compilation of External Trade Statistics:** The most comprehensive set of principles for the compilation of trade statistics is to be found in *International Trade Statistics: Concepts and Definitions*, published by the United Nations Statistical Office (Series M, No. 52; New York, 1970). The following notes are both a summary of these principles and a description of the choices and exceptions made in the case of Canada's external trade statistics.

1. **System of Trade:** Canadian Statistics are tabulated according to the "general" system of trade. Thus *imports* include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. *Domestic exports* include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). *Re-exports* are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). *Total Exports* are the sum of *Domestic* and *Re-exports*

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic, tourist purchases and settlers' effects are excluded for practical reasons. Goods which cross the Canadian border for con-

- A. **Sources des statistiques:** Les statistiques sur le commerce extérieur du Canada sont totalisées à partir des copies des documents administratifs recueillis par Revenu Canada (Douanes) dans ses bureaux de douane par tout le Canada. La Loi sur les douanes exige que chaque fois que des marchandises sont importées au Canada ou exportées du pays, une déclaration soit faite précisant la nature des marchandises et donnant le détail de l'opération commerciale d'après les besoins de la réglementation de l'administration douanière. Il s'ensuit que la méthode de production de statistiques sur le commerce extérieur est déterminée et limitée dans une certaine mesure par les règlements et les procédures des douanes. Lorsque ceux-ci nuisent à l'application précise ou uniforme des principes statistiques exposés dans la section suivante, leur incidence est décrite en termes qualitatifs seulement.

Les statistiques sur le commerce de l'énergie électrique et sur les exportations de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Elles sont plutôt recueillies par la Division des industries manufacturières et primaires de Statistique Canada; les conséquences importantes sur le plan statistique sont expliquées à la note 4 ci-dessous.

Commencant avec les données de mai 1984 les chiffres d'exportation portant sur les livraisons avec une valeur inférieure à \$5,000 (était \$2,500) et plus que \$800 (était \$500) en provenance du Québec, de l'Ontario, du Manitoba et de la Colombie-Britannique vers les États-Unis sont préparés d'après un échantillon de 20 pour cent. Cet échantillon comprend actuellement approximativement 15,000 (était 10,000) envois par mois. Pour plus de renseignements, voir les notes explicatives dans la publication *Exportations par marchandises* (no. 65-004 au cat.).

À partir du 1<sup>er</sup> janvier 1982, l'échantillonnage systématique de 10 p. 100 du montant des marchandises de faible valeur importés des États-Unis, tel qu'appliqué depuis janvier 1969 et révisé en janvier 1975, a été discontinué. Commencant avec les données de janvier 1984, pour toutes les livraisons dont la valeur excède \$800, le traitement et le calcul sont exhaustifs, alors que la valeur des livraisons inférieures à \$800 est estimée. Avant l'année d'enquête 1984, la limite de faible valeur était \$500.

- B. **Concepts et définitions utilisés dans la production de statistiques sur le commerce extérieur:** L'ensemble le plus complet de principes directeurs pour la préparation de ces statistiques est présenté dans *Statistiques du commerce international: concepts et définitions*, publié par le Bureau de statistique des Nations Unies (série M, no 52, New York, 1970). Les notes suivantes résument ces principes et décrivent les choix et les exceptions dans le cas de la statistique du commerce extérieur du Canada.

1. **Système commercial:** Les statistiques canadiennes sont totalisées selon le système commercial "général". Ainsi, les *importations* comprennent tous les biens qui ont franchi les limites géographiques du Canada, qu'ils soient passés par les douanes pour être consommés immédiatement au Canada ou qu'ils aient été entreposés en douane. Les *exportations nationales* comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les *réexportations* sont des exportations de biens d'origine étrangère qui n'ont pas été transformés matériellement au Canada (y compris les biens retirés des entrepôts de douane en vue de leur exportation). Les *exportations totales* correspondent au total des *exportations nationales* et *réexportations*

La statistique du commerce ne prend pas en compte les exportations vers des missions diplomatiques ou militaires canadiennes à l'étranger ni les importations attribuables à des missions étrangères semblables au Canada, car on considère que ces missions ne se trouvent pas hors des limites géographiques du pays qui les a envoyées. Les achats ou les ventes d'approvisionnement de navires ou d'aéronefs affectés au transport international, les achats des touristes et les effets des immigrants sont exclus pour des raisons

venience of transportation only are not included in trade statistics.

2. **Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments or receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks and bonds are also excluded from the trade statistics.

3. **Valuation:** *Exports* are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g. mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

*Imports* are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

4. **Timing:** Until July 1979, statistics for a month included all shipments for which Custom documents were received at Statistics Canada up to, and including, the last working day of the month. Starting with data for August 1979, the closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. Individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents. Trade in electricity; exports of both crude petroleum and natural gas; and imports of "Swap Oil" from the United States for a given month are included in statistics for the following month because they are collected too late for inclusion in statistics for the current month. However, starting with the January 1984 data, exports of electricity, crude petroleum, and natural gas are subsequently shifted back one month, thus reflecting the true statistical month.
5. **Trading Partner Attribution:** The country classification employed by the External Trade Division of Statistics Canada is designed for purposes of economic geography and therefore does not reflect the views or intentions of the government of Canada on international issues of recognition, sovereignty or jurisdiction.

*Exports* are attributed to the country which is the last known destination of the goods at the time of export. (Many primary products are shipped to entrepôt points, particularly in Europe,

pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont laissés hors compte.

2. **Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui seront renvoyés dans le pays exportateur après un court laps de temps sont exclus de la statistique du commerce (lorsque cette intention se dégage des documents de douane). Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en vue d'une course, les films exportés pour être développés, puis retournés. Les biens exportés ou importés pour fins de réparation seulement ne sont pas pris en compte, bien que les paiements ou les recettes au titre des réparations soient portés dans la statistique du commerce. Des avoirs financiers comme le numéraire non périmé, les actions et les obligations sont également laissés hors compte.

3. **Évaluation:** Les *exportations* sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.

Les *importations* sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois, les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane.) Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de livraison et leur prix englobe par conséquent les frais de transport.

4. **Période:** Jusqu'à juillet 1979, les statistiques d'un mois donné visaient toutes les livraisons pour lesquelles Statistique Canada avait reçu des documents de douane jusqu'au dernier jour ouvrable du mois. À partir du mois d'août 1979, la fin du mois statistique correspond au dernier jour du mois civil où s'effectue, dans la mesure du possible, le dédouanement. De diverses livraisons peuvent ne pas être prises en compte dès leur arrivée ou leur départ à cause de la procédure administrative qui donne lieu à une présentation tardive des documents. Le commerce d'énergie électrique; les exportations de pétrole brut et de gaz naturel; et les importations selon l'arrangement avec les États-Unis pour des échanges de pétrole brut d'un mois donné sont présentés dans les statistiques du mois suivant parce qu'on obtient les données trop tard pour qu'elles puissent faire partie des statistiques du mois courant. Cependant, à compter des données de janvier 1984, les exportations d'électricité, de pétrole brut et de gaz naturel sont décalées d'un mois par la suite, de sorte qu'elles correspondent au mois statistique véritable.

5. **Attribution des partenaires commerciaux:** La classification des pays utilisée par la Division du commerce extérieur de Statistique Canada a été conçue aux fins de la géographie économique et ne reflète donc pas l'opinion du Gouvernement du Canada relativement aux questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Les *exportations* sont attribuées au pays de dernière destination connue au moment de l'exportation. (De nombreux produits "primaires" sont expédiés vers des points d'entreposage, notamment en

for re-exports to the ultimate destination which is unknown when the goods leave Canada.)

*Imports* are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country.

#### 6. Revisions:

- a. **Data for Current Month:** Statistics for the current month published in the "Preliminary Statement of Canadian Trade" and in the "Summary of External Trade" (65-001) contain preliminary figures. However, figures for the current month published in "Imports by Commodities" (65-007), "Exports by Commodities" (65-004), "Imports by Countries" (65-006) and "Exports by Countries" (65-003) have been verified for reporting or processing errors.
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the monthly reports for December have been published. In the case of the "Summary of External Trade" (65-001), the revised December figures appear in the January issue of the following year. Commodity/Country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the reports - 65-007 and 65-004.
- c. **Data for the previous year:** Revisions to the previous year appear in the December issue of the following year. Commodity/Country figures revised at that time are shown at the beginning of the reports - 65-007 and 65-004. *When statistical series are adjusted for seasonal variations, the revised figures are reflected in the April issue of the "Summary of External Trade" (65-001).*

**Note:** Cumulative totals in all reports reflect the revisions applied up to the date of printing.

7. **Indexes of Price and Volume:** The price indexes in this publication are current-weighted and are calculated from price relatives based on 1971 = 100. The weights are trade quantities for the month, quarter or year to which the index refers and hence change from period to period. The volume index is derived by dividing a value index by the corresponding current-weighted price index. The resulting volume index is, therefore, weighted with fixed 1971 price weights. The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign statistics.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled "The 1971-based Price and Volume Indexes of Canada's External Trade", published in December 1976 as a supplement to this publication (65-001).

Each year revised indexes for the previous years are generally published in the February, March and April issues of this publication. Historical indexes were published for 1968-1974 in the June, July and August 1977 issues and for 1975 in the July, August and September 1978 issues. Most of these indexes (on a Customs Basis) are available on CANSIM in matrices 3680, 3681, 3682, 3715, 3716, and 3717.

The price and volume indexes presented in Part I are on a Balance of Payments Basis and are also available on CANSIM in matrices 3643, 3644, 3649, 3650, 3683 and 3684.

Europe, en vue de leur réexportation; la destination ultime de ces produits est inconnue lors qu'ils quittent le Canada.)

Les *importations* sont attribuées au pays de première consignation directe des biens au Canada, que ce soit ou non le pays d'origine. On déroge à cette règle dans le cas des biens ayant comme région d'origine l'Amérique centrale ou l'Amérique du sud et expédiés au Canada depuis les États-Unis; ces importations sont portées au crédit du pays d'origine, sauf pour les échanges de pétrole brut avec les États-Unis qui sont crédités à ce pays.

#### 6. Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant figurant dans le communiqué "Préliminaire sur le commerce du Canada" et le "Sommaire du commerce extérieur" (65-001) contiennent des chiffres préliminaires. Cependant, les chiffres du mois courant dans "Importations par marchandises" (65-007), "Exportations par marchandises" (65-004), "Importations par pays" (65-006) et "Exportations par pays" (65-003) ont été vérifiés pour des erreurs de déclaration et de traitement.
- b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications mensuelles de décembre. Dans le cas de "Sommaire du commerce extérieur" (65-001), les chiffres de décembre rectifiés paraîtront dans l'édition de janvier de l'année suivante. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/pays figurent dans les rapports mensuels au commencement des publications 65-007 et 65-004.
- c. **Données de l'année précédente:** Les rectifications à l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise/pays rectifiés à ce moment-là figurent au commencement des publications 65-007 et 65-004. *Quand les séries statistiques sont désaisonnalisées, les chiffres rectifiés sont pris en compte dans l'édition d'avril de "Sommaire du commerce extérieur" (65-001).*

**Note:** Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

7. **Indices de prix et de volume:** Les indices de prix compris dans cette publication sont pondérés d'après les quantités mensuelles, trimestrielles ou annuelles du commerce correspondantes à la période de l'indice et sont calculés d'après des prix relatifs de base 1971 = 100. Par conséquence ces pondérations sont variables d'une période à l'autre. Les indices du volume sont calculés en divisant l'indice de la valeur par l'indice du prix correspondant. L'indice du volume obtenu est donc implicitement pondéré par les prix fixes de l'année 1971. Les prix relatifs sont dérivés ou des valeurs unitaires calculés directement des statistiques du commerce extérieur ou surtout pour les produits finis, des indices de prix obtenus d'autres sources canadiennes ou de l'étranger.

Des renseignements concernant la méthodologie employée dans le calcul des indices sont données dans un document de référence intitulé "Les indices de prix et de volume de base 1971 du commerce extérieur du Canada" publié en décembre 1976 sous forme de supplément à la présente publication (65-001).

Une fois l'an, on publie les indices révisés des années précédentes, généralement dans les numéros de février, mars et avril de cette publication. Les indices historiques pour les années 1968 à 1974 ont paru dans les numéros de juin, juillet et août 1977, et celles pour 1975, dans les numéros de juillet, août et septembre 1978. La plupart des indices (sur la base douanière) sont offerts sur CANSIM, dans les matrices 3680, 3681, 3682, 3715, 3716 et 3717.

Les indices de prix et de volume présentés dans la partie I de cette publication sont sur la base de la balance des paiements et sont aussi disponibles sur CANSIM, dans les matrices 3643, 3644, 3649, 3650, 3683 et 3684.

**Note:** Price and volume indexes are published about one month later than preliminary value data owing to data input availability and the additional processing required.

8. **Provincial Detail:** Prior to the 1984 data year, *exports* statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain cases this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Commencing with 1984 data, Statistics Canada and Customs & Excise, Revenue Canada have taken measures requiring the reporting of export shipments on a province of origin basis. It is recognized that the exporting community will be unable to effect the new provincial definition on a given date; therefore the 1984 statistics will reflect a period of transition.

*Import* statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed or enter the productive process.

9. **Principal trading areas:** The "principal trading areas" shown in some tables include groupings which are defined as follows:

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands and Greece (effective January 1981). The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada.

**Other O.E.C.D.:** Austria, Finland, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of the O.E.C.D. — The Organization for Economic Cooperation and Development).

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

10. **Sources of Further Information:** More detailed monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time. For example, *The Reconciliation of U.S.-Canada Trade Statistics*, published by the United States - Canada Trade Statistics Committee, is available on request from the address given below.

Trade statistics are also available on the CANSIM Main Base in the following matrices: 0021, 0022, 0876 to 0879, 3643, 3644, 3649 to 3719.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, External Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

**Nota:** Les indices de prix et de volume sont publiés environ un mois plus tard que les données provisoires de valeur; celles-ci représentent en effet les données d'entrée qui, une fois traitées servent à construire les indices en cause.

8. **Statistiques provinciales:** Avant l'année d'enquête 1984, les statistiques sur les *exportations* par province de chargement indiquaient la province où les produits avaient été chargés initialement pour être exportés. Dans certains cas, il ne s'agissait pas de la province d'origine qui se définit comme étant la province où les produits ont été cultivés, extraits ou fabriqués.

À partir de l'année d'enquête 1984, Statistique Canada et Revenu Canada-Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées par province d'origine. Il est certain que les exportateurs ne pourront appliquer la nouvelle définition provinciale à une date précise, aussi faut-il prévoir une période de transition qui aura une incidence sur les statistiques de 1984.

Les statistiques des *importations* par province de dédouanement présentent la province où les biens ont passé la douane en vue d'une consommation immédiate ou de leur entreposage en douane; cette province peut différer de la province de consommation ou d'entrée dans l'activité productive.

9. **Marchés principaux:** Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:

**Autres C.E.E.:** Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas et Grèce (à partir de janvier 1981). Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada.

**Autres O.C.D.E.:** Autriche, Espagne, Finlande, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. — l'Organisation pour la coopération et le développement économique).

**Autres Amérique:** Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

10. **Sources de renseignements supplémentaires:** Des statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également se procurer des descriptions détaillées et des index des classifications de marchandises. Veuillez consulter le catalogue des publications de Statistique Canada pour une description du contenu des diverses publications. La recherche continue dans le domaine de la statistique du commerce donne naissance de temps à autre à de nouveaux documents de référence. Ainsi, on peut obtenir à l'adresse mentionnée ci-dessous un document sur le rapprochement des statistiques du commerce États-Unis-Canada publié par le comité de la statistique du commerce États-Unis-Canada.

Les statistiques sur le commerce sont également offertes sur la base principale de CANSIM dans les matrices suivantes: 0021, 0022, 0876 à 0879, 3643, 3644, 3649 à 3719.

Toute question au sujet des méthodes employées doit être adressée par écrit au directeur de la Division du commerce extérieur, Statistique Canada, Ottawa, Ontario K1A 0T6.

## Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit

### How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6.

## Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinaire et le système d'extraction de Statistique Canada.

## MERCHANDISE TRADE (BALANCE OF PAYMENTS BASIS)

The statistics presented in Part I (Analytical Charts and Tables) are adjusted to conform with the National Accounts concepts and definitions. Balance of Payments adjustments to Customs Basis data are incorporated at an aggregated level in order to make them compatible with the system of National Accounts.

### BALANCE OF PAYMENTS ADJUSTMENTS

#### Coverage or Valuation

- *Automotive Products:* Deductions are made for both exports of cars and trucks and imports of automotive parts for retroactive value adjustments and for special tooling and other charges.
- *Gold:* Adjustments are made to customs basis trade data when there is no change in ownership and additional adjustments are made for transactions between Canadians and non-residents for gold which remains in Canada.
- *Other adjustments* include United States/Canada Trade reconciliation, advertising, official valuation, freight and other adjustments.

#### Timing

- *Grains:* The Canadian Grain Commission's records of grain clearances from exporting warehouses during the full calendar month are used to adjust Trade of Canada series for grain exports. The volume of clearances obtained from this source are combined with unit values from customs-based series to derive hybrid estimates which are substituted for original customs series.
- *Energy:* Trade in electricity; exports of crude petroleum and natural gas, and imports of "swap oil" from the United States, are adjusted to account for the one month reporting lag. Starting with January 1984 data, the adjustments apply only to the current month for exports of electricity, crude petroleum and natural gas, as customs based data are shifted back one month, thus reflecting the true statistical month.
- *Ships, Civil Aircraft and Military Equipment:* The adjustment substitutes progress payments in connection with the construction of ships, civil aircraft and some military equipment, in place of the actual deliveries of the equipment recorded in the Trade of Canada series.

For detailed description of sources and methods please refer to Cat. 67506E Occasional "The Canadian Balance of International Payments and International Investment Position".

#### Geographic Classification

On a balance of payments basis, trade with the United States includes trade with Puerto Rico and the Virgin Islands.

### SEASONAL ADJUSTMENT

Total exports (domestic exports and re-exports) and imports on a seasonally adjusted basis are now calculated indirectly as the sum of approximately sixty commodity aggregates. Where stable seasonality

## COMMERCE DES MARCHANDISES (BASE DE LA BALANCE DES PAIEMENTS)

Les statistiques présentées à la partie I (graphiques et tableaux analytiques) seront ajustées conformément aux concepts et aux définitions des comptes nationaux. Les corrections apportées aux chiffres douaniers aux fins de la balance des paiements sont intégrées au niveau des groupes pour rendre ces données compatibles avec celles du système des comptes nationaux.

### CORRECTIONS EN FONCTION DE LA BALANCE DES PAIEMENTS

#### Champ d'observation ou évaluation

- *Produits automobiles:* On effectue dans le cas des exportations d'automobiles et de camions et des importations de pièces de véhicules automobiles, une déduction ayant pour objet de corriger rétroactivement la valeur et de tenir compte des frais d'outillage spéciaux et autres.
- *Or:* On corrige les données douanières du commerce quand il n'y a pas de changement de propriété et on effectue des corrections supplémentaires pour les transactions au Canada entre les canadiens et les étrangers.
- *Les autres corrections* comprennent le rapprochement du commerce entre les États-Unis et le Canada, la publicité, l'évaluation officielle, les frais de transport et autres.

#### Période

- *Céréales:* Les données des exportations de grains tirées des séries du Commerce du Canada sont ajustées en fonction des chiffres que renferment les dossiers des expéditions de grains des entrepôts d'exportation établis par la Commission canadienne des grains pour un mois civil donné. Le volume des expéditions obtenu de cette source est combiné aux chiffres obtenus des séries douanières pour produire des estimations mixtes qui remplacent les séries douanières initiales.
- *Énergie:* Le commerce de l'électricité, les exportations de pétrole brut et de gaz naturel et les importations de pétrole d'échange des États-Unis, sont ajustés pour tenir compte du délai de déclaration d'un mois. À compter des données de janvier 1984, les corrections ne s'appliquent qu'au mois courant dans le cas des exportations d'électricité, de pétrole brut et de gaz naturel, étant donné que les chiffres douaniers sont décalés d'un mois, de sorte qu'ils correspondent au mois statistique véritable.
- *Navires, avions civils et matériel militaire:* Les ajustements remplacent les chiffres des livraisons réelles de matériel compris dans les séries du Commerce du Canada par les paiements échelonnés effectués relativement à la construction de navires, d'avions civils et de certains articles de matériel militaire.

Pour obtenir une description détaillée des sources et des méthodes, se référer à la publication 67-506F au catalogue, (hors série) *La balance des paiements et le bilan des investissements internationaux du Canada*.

#### Classification géographique

Sur la base de la balance des paiements, le commerce avec les États-Unis englobe le commerce avec Porto Rico et les îles Vierges.

### DÉSAISONNALISATION

Le total des exportations (exportations nationales et réexportations) et les importations désaisonnalisées sont maintenant calculés indirectement, étant constitués de la somme d'environ soixante groupes de produits.

cannot be reliably identified, the series is not seasonally adjusted. Therefore, seasonally adjusted total exports and imports represent a combination of raw and seasonally adjusted data. Previously the total was seasonally adjusted from raw data at the total level.

## PRICE INDEXES

### Timing

From 1971 to 1983, the export price indexes for electricity, natural gas and crude petroleum on a customs basis which were lagged one month have been adjusted to represent the true calendar month. Similarly, the import price index for crude petroleum from the United States on a customs basis has been adjusted and recombined with the "other country" import price index in order to arrive at an "All country" import price index. From January 1984, onward, the one month lag is now corrected on a customs basis.

### Aggregate Levels

Indexes at an aggregate level (section and total levels) are calculated by using value weights on a balance of payments basis with price indexes derived from customs data.

## DATA AVAILABILITY

Data on a balance of payments basis are available on CANSIM.

	Matrix
Laspeyres fixed weighted import volume indexes 1971 = 100, raw and seasonally adjusted.	3643

Laspeyres fixed weighted export volume indexes 1971 = 100, raw and seasonally adjusted.	3644
Total Exports, all country current weighted (Paasche) price indexes, 1971 = 100, raw and seasonally adjusted.	3683
Total Exports, all country fixed weight (Laspeyres) price index 1971 = 100, raw and seasonally adjusted.	3684
Total Exports, all country values by section and commodity groupings, raw and seasonally adjusted; total export values for 6 principal trading areas, raw and seasonally adjusted.	3685

Lorsqu'il est impossible de déceler une variation saisonnière régulière, les séries ne sont pas désaisonnalisées. Par conséquent, le total désaisonnalisé des exportations et des importations est constitué d'une combinaison de données brutes et de données désaisonnalisées. Auparavant, le total était désaisonnalisé à partir des totaux bruts.

## INDICES DE PRIX

### Période

Les indices des prix à l'exportation, exprimés en chiffres douaniers, de l'électricité, du gaz naturel et du pétrole brut pour 1971 à 1983, qui étaient décalés d'un mois, ont été corrigés et correspondent actuellement au mois civil réel. De même, l'indice des prix à l'importation du pétrole brut des États-Unis, exprimé en chiffres douaniers, a été corrigé et combiné à l'indice des prix à l'importation des "Autres pays" de façon à produire un indice des prix à l'importation pour "Tous les pays". Le décalage d'un mois est corrigé dans les chiffres douaniers depuis janvier 1984.

### Niveau agrégé

Les indices agrégés (section et total) sont calculés à l'aide de poids fonctions de la valeur, sur la base de la balance des paiements, à partir d'indices de prix obtenus des données douanières.

## DISPONIBILITÉ DES DONNÉES

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

(1) La tendance à court terme donne une meilleure idée de la direction et du taux de variation des échanges commerciaux en mettant en moyenne les appréciables fluctuations mensuelles qui se produisent fréquemment dans ces derniers. La tendance pour le dernier mois n'est pas reportée sur les diagrammes ci-dessus parce qu'elle change fréquemment de façon appréciable avec l'inclusion des données des mois suivants.

- A. **Sources of Statistics:** Canada's international trade statistics are tabulated from copies of administrative documents collected by Revenue Canada, Customs at its ports across Canada. The Customs Act requires that each time goods are imported into or exported from Canada a document be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation of international trade statistics is determined and limited to some extent by Customs regulations and procedures. Where these affect the precise or consistent application of the statistical principles explained in the following section, their impact is described in qualitative terms only.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, for administrative reasons, be obtained from Customs documents. They are instead collected by the Manufacturing and Primary Industries Division of Statistics Canada, with important statistical consequences explained in Note 4 below.

Commencing with the May 1984 data export statistics for shipments of less than \$5,000 (up from \$2,500) and greater than \$800 (up from \$500) from Quebec, Ontario, Manitoba and British Columbia to the United States are estimated on the basis of a 20 per cent sample. The size of this sample is at present approximately 15,000 (up from 10,000) shipments per month. For further information, refer to the explanatory notes in the publication *Exports by Commodities* (cat. no. 65-004).

Effective January 1, 1982, the 10 per cent systematic sample of low valued import documents from the United States, as applied since January 1969 and revised in January 1975, has been discontinued. Starting with January 1984 data, all shipments exceeding \$800 are processed and compiled by complete count, while the value of shipments below \$800 is estimated. Prior to 1984 the low-value limit was \$500.

- B. **Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:** The most comprehensive set of principles for the compilation of trade statistics is to be found in *International Trade Statistics: Concepts and Definitions*, published by the United Nations Statistical Office (Series M, No. 52; New York, 1970). The following notes are both a summary of these principles and a description of the choices and exceptions made in the case of Canada's international trade statistics.

1. **System of Trade:** Canadian Statistics are tabulated according to the "general" system of trade. Thus *imports* include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. *Domestic exports* include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). *Re-exports* are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). *Total Exports* are the sum of *Domestic* and *Re-exports*.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic, tourist purchases and settlers' effects are excluded for practical

- A. **Sources des statistiques:** Les statistiques sur le commerce international du Canada sont totalisées à partir des copies des documents administratifs recueillis par Revenu Canada (Douanes) dans ses bureaux de douane par tout le Canada. La Loi sur les douanes exige que chaque fois que des marchandises sont importées au Canada ou exportées du pays, une déclaration soit faite précisant la nature des marchandises et donnant le détail de l'opération commerciale d'après les besoins de la réglementation de l'administration douanière. Il s'ensuit que la méthode de production de statistiques sur le commerce international est déterminée et limitée dans une certaine mesure par les règlements et les procédures des douanes. Lorsque ceux-ci nuisent à l'application précise ou uniforme des principes statistiques exposés dans la section suivante, leur incidence est décrite en termes qualitatifs seulement.

Les statistiques sur le commerce de l'énergie électrique et sur les exportations de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Elles sont plutôt recueillies par la Division des industries manufacturières et primaires de Statistique Canada; les conséquences importantes sur le plan statistique sont expliquées à la note 4 ci-dessous.

Commençant avec les données de mai 1984 les chiffres d'exportation portant sur les livraisons avec une valeur inférieure à \$5,000 (était \$2,500) et plus que \$800 (était \$500) en provenance du Québec, de l'Ontario, du Manitoba et de la Colombie-Britannique vers les États-Unis sont préparés d'après un échantillon de 20 pour cent. Cet échantillon comprend actuellement approximativement 15,000 (était 10,000) envois par mois. Pour plus de renseignements, voir les notes explicatives dans la publication *Exportations par marchandises* (no. 65-004 au cat.).

À partir du 1<sup>er</sup> janvier 1982, l'échantillonnage systématique de 10 p. 100 du montant des marchandises de faible valeur importés des États-Unis, tel qu'appliqué depuis janvier 1969 et révisé en janvier 1975, a été discontinué. Commencant avec les données de janvier 1984, pour toutes les livraisons dont la valeur excède \$800, le traitement et le calcul sont exhaustifs, alors que la valeur des livraisons inférieures à \$800 est estimée. Avant l'année d'enquête 1984, la limite de faible valeur était \$500.

- B. **Concepts et définitions utilisés dans la production de statistiques sur le commerce international du Canada** L'ensemble le plus complet de principes directeurs pour la préparation de ces statistiques est présenté dans *Statistiques du commerce international: concepts et définitions*, publié par le Bureau de statistique des Nations Unies (série M, no 52, New York, 1970). Les notes suivantes résument ces principes et décrivent les choix et les exceptions dans le cas de la statistique du commerce international du Canada.

1. **Système commercial:** Les statistiques canadiennes sont totalisées selon le système commercial "général". Ainsi, les *importations* comprennent tous les biens qui ont franchi les limites géographiques du Canada, qu'ils soient passés par les douanes pour être consommés immédiatement au Canada ou qu'ils aient été entreposés en douane. Les *exportations nationales* comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les *réexportations* sont des exportations de biens d'origine étrangère qui n'ont pas été transformés matériellement au Canada (y compris les biens retirés des entrepôts de douane en vue de leur exportation). Les *exportations totales* correspondent au total des *exportations nationales* et *réexportations*.

La statistique du commerce ne prend pas en compte les exportations vers des missions diplomatiques ou militaires canadiennes à l'étranger ni les importations attribuables à des missions étrangères semblables au Canada, car on considère que ces missions ne se trouvent pas hors des limites géographiques du pays qui les a envoyées. Les achats ou les ventes d'approvisionnement de navires ou d'aéronefs affectés au transport international, les achats des

reasons. Goods which cross the Canadian border for convenience of transportation only are not included in trade statistics.

2. **Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments or receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks and bonds are also excluded from the trade statistics.
3. **Valuation:** *Exports* are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g. mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

*Imports* are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

4. **Timing:** Until July 1979, statistics for a month included all shipments for which Custom documents were received at Statistics Canada up to, and including, the last working day of the month. Starting with data for August 1979, the closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. Individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents. Trade in electricity; exports of both crude petroleum and natural gas; and imports of "Swap Oil" from the United States for a given month are included in statistics for the following month because they are collected too late for inclusion in statistics for the current month. However, starting with the January 1984 data, exports of electricity, crude petroleum, and natural gas are subsequently shifted back one month, thus reflecting the true statistical month.
5. **Trading Partner Attribution:** The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and therefore does not reflect the views or intentions of the government of Canada on international issues of recognition, sovereignty or jurisdiction.

*Exports* are attributed to the country which is the last known destination of the goods at the time of export. (Many primary

touristes et les effets des immigrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont laissés hors compte.

2. **Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui seront renvoyés dans le pays exportateur après un court laps de temps sont exclus de la statistique du commerce (lorsque cette intention se dégage des documents de douane). Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en vue d'une course, les films exportés pour être développés, puis retournés. Les biens exportés ou importés pour fins de réparation seulement ne sont pas pris en compte, bien que les paiements ou les recettes au titre des réparations soient portés dans la statistique du commerce. Des avoirs financiers comme le numéraire non périmé, les actions et les obligations sont également laissés hors compte.
3. **Évaluation:** Les *exportations* sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.

Les *importations* sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois, les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane.) Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de livraison et leur prix englobe par conséquent les frais de transport.

4. **Période:** Jusqu'à juillet 1979, les statistiques d'un mois donné visaient toutes les livraisons pour lesquelles Statistique Canada avait reçu des documents de douane jusqu'au dernier jour ouvrable du mois. À partir du mois d'août 1979, la fin du mois statistique correspond au dernier jour du mois civil où s'effectue, dans la mesure du possible, le dédouanement. De diverses livraisons peuvent ne pas être prises en compte dès leur arrivée ou leur départ à cause de la procédure administrative qui donne lieu à une présentation tardive des documents. Le commerce d'énergie électrique; les exportations de pétrole brut et de gaz naturel; et les importations selon l'arrangement avec les États-Unis pour des échanges de pétrole brut d'un mois donné sont présentés dans les statistiques du mois suivant parce qu'on obtient les données trop tard pour qu'elles puissent faire partie des statistiques du mois courant. Cependant, à compter des données de janvier 1984, les exportations d'électricité, de pétrole brut et de gaz naturel sont décalées d'un mois par la suite, de sorte qu'elles correspondent au mois statistique véritable.
5. **Attribution des partenaires commerciaux:** La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue aux fins de la géographie économique et ne reflète donc pas l'opinion du Gouvernement du Canada relativement aux questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Les *exportations* sont attribuées au pays de dernière destination connue au moment de l'exportation. (De nombreux produits "pri-

products are shipped to entrepôt points, particularly in Europe, for re-exports to the ultimate destination which is unknown when the goods leave Canada.)

*Imports* are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country.

## 6. Revisions:

- a. **Data for Current Month:** Statistics for the current month published in the "Preliminary Statement of Canadian International Trade" and in the "Summary of Canadian International Trade" (65-001) contain preliminary figures. However, figures for the current month published in "Imports by Commodities" (65-007), "Exports by Commodities" (65-004), "Imports by Countries" (65-006) and "Exports by Countries" (65-003) have been verified for reporting or processing errors.
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the monthly reports for December have been published. In the case of the "Summary of Canadian International Trade" (65-001), the revised December figures appear in the January issue of the following year. Commodity/Country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the reports 65-007 and 65-004.
- c. **Data for the previous year:** Revisions to the previous year appear in the December issue of the following year. Commodity/Country figures revised at that time are shown at the beginning of the reports 65-007 and 65-004. *When statistical series are adjusted for seasonal variations, the revised figures are reflected in the April issue of the "Summary of Canadian International Trade" (65-001).*

**Note:** Cumulative totals in all reports reflect the revisions applied up to the date of printing.

7. **Indexes of Price and Volume:** The price indexes in this publication are current-weighted and are calculated from price relatives based on 1971 = 100. The weights are trade quantities for the month, quarter or year to which the index refers and hence change from period to period. The volume index is derived by dividing a value index by the corresponding current-weighted price index. The resulting volume index is, therefore, weighted with fixed 1971 price weights. The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign statistics.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled "The 1971-based Price and Volume Indexes of Canada's External Trade", published in December 1976 as a supplement to this publication (65-001).

Each year revised indexes for the previous years are generally published in the February, March and April issues of this publication. Historical indexes were published for 1968-1974 in the June, July and August 1977 issues and for 1975 in the July, August and September 1978 issues. Most of these indexes (on a Customs Basis) are available on CANSIM in matrices 3680, 3681, 3682, 3715, 3716, and 3717.

The price and volume indexes presented in Part I are on a Balance of Payments Basis and are also available on CANSIM in matrices 3643, 3644, 3649, 3650, 3683 and 3684.

maires" sont expédiés vers des points d'entreposage, notamment en Europe, en vue de leur réexportation; la destination ultime de ces produits est inconnue lors qu'ils quittent le Canada.)

Les *importations* sont attribuées au pays de première consignation directe des biens au Canada, que ce soit ou non le pays d'origine. On déroge à cette règle dans le cas des biens ayant comme région d'origine l'Amérique centrale ou l'Amérique du sud et expédiés au Canada depuis les États-Unis; ces importations sont portées au crédit du pays d'origine, sauf pour les échanges de pétrole brut avec les États-Unis qui sont crédités à ce pays.

## 6. Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant figurant dans le communiqué "Préliminaire sur le commerce international du Canada" et le "Sommaire du commerce international du Canada" (65-001) contiennent des chiffres préliminaires. Cependant, les chiffres du mois courant dans "Importations par marchandises" (65-007), "Exportations par marchandises" (65-004), "Importations par pays" (65-006) et "Exportations par pays" (65-003) ont été vérifiés pour des erreurs de déclaration et de traitement.
- b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications mensuelles de décembre. Dans le cas de "Sommaire du commerce international du Canada" (65-001), les chiffres de décembre rectifiés paraîtront dans l'édition de janvier de l'année suivante. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/-pays figurent dans les rapports mensuels au commencement des publications 65-007 et 65-004.
- c. **Données de l'année précédente:** Les rectifications à l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise/pays rectifiés à ce moment-là figurent au commencement des publications 65-007 et 65-004. *Quand les séries statistiques sont désaisonnalisées, les chiffres rectifiés sont pris en compte dans l'édition d'avril de "Sommaire du commerce international du Canada" (65-001).*

**Note:** Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

7. **Indices de prix et de volume:** Les indices de prix compris dans cette publication sont pondérés d'après les quantités mensuelles, trimestrielles ou annuelles du commerce correspondantes à la période de l'indice et sont calculés d'après des prix relatifs de base 1971 = 100. Par conséquence ces pondérations sont variables d'une période à l'autre. Les indices du volume sont calculés en divisant l'indice de la valeur par l'indice du prix correspondant. L'indice du volume obtenu est donc implicitement pondéré par les prix fixes de l'année 1971. Les prix relatifs sont dérivés ou des valeurs unitaires calculés directement des statistiques du commerce extérieur ou surtout pour les produits finis, des indices de prix obtenus d'autres sources canadiennes ou de l'étranger.

Des renseignements concernant la méthodologie employée dans le calcul des indices sont données dans un document de référence intitulé "Les indices de prix et de volume de base 1971 du commerce extérieur du Canada" publié en décembre 1976 sous forme de supplément à la présente publication (65-001).

Une fois l'an, on publie les indices révisés des années précédentes, généralement dans les numéros de février, mars et avril de cette publication. Les indices historiques pour les années 1968 à 1974 ont paru dans les numéros de juin, juillet et août 1977, et celles pour 1975, dans les numéros de juillet, août et septembre 1978. La plupart des indices (sur la base douanière) sont offerts sur CANSIM, dans les matrices 3680, 3681, 3682, 3715, 3716 et 3717.

Les indices de prix et de volume présentés dans la partie I de cette publication sont sur la base de la balance des paiements et sont aussi disponibles sur CANSIM, dans les matrices 3643, 3644, 3649, 3650, 3683 et 3684.

8. **Provincial Detail:** Prior to the 1984 data year, *exports* statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain case this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Commencing with 1984 data, Statistics Canada and Customs & Excise, Revenue Canada have taken measures requiring the reporting of export shipments on a province of origin basis. It is recognized that the exporting community will be unable to effect the new provincial definition on a given date; therefore the 1984 statistics will reflect a period of transition.

*Import* statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed or enter the productive process.

9. **Principal trading areas:** The "principal trading areas" shown in some tables include groupings which are defined as follows:

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands and Greece (effective January 1981). The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada.

**Other O.E.C.D.:** Austria, Finland, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of the O.E.C.D. — The Organization for Economic Cooperation and Development).

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

10. **Sources of Further Information:** More detailed monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time. For example, *The Reconciliation of U.S.-Canada Trade Statistics*, published by the United States - Canada Trade Statistics Committee, is available on request from the address given below.

Trade statistics are also available on the CANSIM Main Base in the following matrices: 0021, 0022, 0876 to 0879, 3643, 3644, 3649 to 3719.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

8. **Statistiques provinciales:** Avant l'année d'enquête 1984, les statistiques sur les *exportations* par province de chargement indiquaient la province où les produits avaient été chargés initialement pour être exportés. Dans certains cas, il ne s'agissait pas de la province d'origine qui se définit comme étant la province où les produits ont été cultivés, extraits ou fabriqués.

À partir de l'année d'enquête 1984, Statistique Canada et Revenu Canada-Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées par province d'origine. Il est certain que les exportateurs ne pourront appliquer la nouvelle définition provinciale à une date précise, aussi faut-il prévoir une période de transition qui aura une incidence sur les statistiques de 1984.

Les statistiques des *importations* par province de dédouanement présentent la province où les biens ont passé la douane en vue d'une consommation immédiate ou de leur entreposage en douane; cette province peut différer de la province de consommation ou d'entrée dans l'activité productive.

9. **Marchés principaux:** Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:

**Autres C.E.E.:** Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas et Grèce (à partir de janvier 1981). Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada.

**Autres O.C.D.E.:** Autriche, Espagne, Finlande, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. — l'Organisation pour la coopération et le développement économique).

**Autres Amérique:** Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

10. **Sources de renseignements supplémentaires:** Des statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également se procurer des descriptions détaillées et des index des classifications de marchandises. Veuillez consulter le catalogue des publications de Statistique Canada pour une description du contenu des diverses publications. La recherche continue dans le domaine de la statistique du commerce donne naissance de temps à autre à de nouveaux documents de référence. Ainsi, on peut obtenir à l'adresse mentionnée ci-dessous un document sur le rapprochement des statistiques du commerce États-Unis-Canada publié par le comité de la statistique du commerce États-Unis-Canada.

Les statistiques sur le commerce sont également offertes sur la base principale de CANSIM dans les matrices suivantes: 0021, 0022, 0876 à 0879, 3643, 3644, 3649 à 3719.

Toute question au sujet des méthodes employées doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa, Ontario K1A 0T6.

## Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit  
International Trade Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9647) or to the Statistics Canada reference centre in:

## Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## MERCHANDISE TRADE (BALANCE OF PAYMENTS BASIS)

The statistics presented in Part I (Analytical Charts and Tables) are adjusted to conform with the National Accounts concepts and definitions. Balance of Payments adjustments to Customs Basis data are incorporated at an aggregated level in order to make them compatible with the system of National Accounts.

### BALANCE OF PAYMENTS ADJUSTMENTS

#### Coverage or Valuation

- *Automotive Products:* Deductions are made for both exports of cars and trucks and imports of automotive parts for retroactive value adjustments and for special tooling and other charges.
- *Gold:* Adjustments are made to customs basis trade data when there is no change in ownership and additional adjustments are made for transactions between Canadians and non-residents for gold which remains in Canada.
- *Other adjustments* include United States/Canada Trade reconciliation, advertising, official valuation, freight and other adjustments.

#### Timing

- *Grains:* The Canadian Grain Commission's records of grain clearances from exporting warehouses during the full calendar month are used to adjust Trade of Canada series for grain exports. The volume of clearances obtained from this source are combined with unit values from customs-based series to derive hybrid estimates which are substituted for original customs series.
- *Energy:* Trade in electricity; exports of crude petroleum and natural gas, and imports of "swap oil" from the United States, are adjusted to account for the one month reporting lag. Starting with January 1984 data, the adjustments apply only to the current month for exports of electricity, crude petroleum and natural gas, as customs based data are shifted back one month, thus reflecting the true statistical month.
- *Ships, Civil Aircraft and Military Equipment:* The adjustment substitutes progress payments in connection with the construction of ships, civil aircraft and some military equipment, in place of the actual deliveries of the equipment recorded in the Trade of Canada series.

For detailed description of sources and methods please refer to Cat. 67506E Occasional "The Canadian Balance of International Payments and International Investment Position".

#### Geographic Classification

On a balance of payments basis, trade with the United States includes trade with Puerto Rico and the Virgin Islands.

### SEASONAL ADJUSTMENT

Total exports (domestic exports and re-exports) and imports on a seasonally adjusted basis are now calculated indirectly as the sum of approximately sixty commodity aggregates. Where stable seasonality

## COMMERCE DES MARCHANDISES (BASE DE LA BALANCE DES PAIEMENTS)

Les statistiques présentées à la partie I (graphiques et tableaux analytiques) seront ajustées conformément aux concepts et aux définitions des comptes nationaux. Les corrections apportées aux chiffres douaniers aux fins de la balance des paiements sont intégrées au niveau des groupes pour rendre ces données compatibles avec celles du système des comptes nationaux.

### CORRECTIONS EN FONCTION DE LA BALANCE DES PAIEMENTS

#### Champ d'observation ou évaluation

- *Produits automobiles:* On effectue dans le cas des exportations d'automobiles et de camions et des importations de pièces de véhicules automobiles, une déduction ayant pour objet de corriger rétroactivement la valeur et de tenir compte des frais d'outillage spéciaux et autres.
- *Or:* On corrige les données douanières du commerce quand il n'y a pas de changement de propriété et on effectue des corrections supplémentaires pour les transactions au Canada entre les canadiens et les étrangers.
- *Les autres corrections* comprennent le rapprochement du commerce entre les États-Unis et le Canada, la publicité, l'évaluation officielle, les frais de transport et autres.

#### Période

- *Céréales:* Les données des exportations de grains tirées des séries du Commerce du Canada sont ajustées en fonction des chiffres que renferment les dossiers des expéditions de grains des entrepôts d'exportation établis par la Commission canadienne des grains pour un mois civil donné. Le volume des expéditions obtenu de cette source est combiné aux chiffres obtenus des séries douanières pour produire des estimations mixtes qui remplacent les séries douanières initiales.
- *Énergie:* Le commerce de l'électricité, les exportations de pétrole brut et de gaz naturel et les importations de pétrole d'échange des États-Unis, sont ajustés pour tenir compte du délai de déclaration d'un mois. À compter des données de janvier 1984, les corrections ne s'appliquent qu'au mois courant dans le cas des exportations d'électricité, de pétrole brut et de gaz naturel, étant donné que les chiffres douaniers sont décalés d'un mois, de sorte qu'ils correspondent au mois statistique véritable.
- *Navires, avions civils et matériel militaire:* Les ajustements remplacent les chiffres des livraisons réelles de matériel compris dans les séries du Commerce du Canada par les paiements échelonnés effectués relativement à la construction de navires, d'avions civils et de certains articles de matériel militaire.

Pour obtenir une description détaillée des sources et des méthodes, se référer à la publication 67-506F au catalogue, (hors série) *La balance des paiements et le bilan des investissements internationaux du Canada*.

#### Classification géographique

Sur la base de la balance des paiements, le commerce avec les États-Unis englobe le commerce avec Porto Rico et les îles Vierges.

### DÉSAISONNALISATION

Le total des exportations (exportations nationales et réexportations) et les importations désaisonnalisées sont maintenant calculés indirectement, étant constitués de la somme d'environ soixante groupes de produits.

cannot be reliably identified, the series is not seasonally adjusted. Therefore, seasonally adjusted total exports and imports represent a combination of raw and seasonally adjusted data. Previously the total was seasonally adjusted from raw data at the total level.

## PRICE INDEXES

### Timing

From 1971 to 1983, the export price indexes for electricity, natural gas and crude petroleum on a customs basis which were lagged one month have been adjusted to represent the true calendar month. Similarly, the import price index for crude petroleum from the United States on a customs basis has been adjusted and recombined with the "other country" import price index in order to arrive at an "All country" import price index. From January 1984, onward, the one month lag is now corrected on a customs basis.

### Aggregate Levels

Indexes at an aggregate level (section and total levels) are calculated by using value weights on a balance of payments basis with price indexes derived from customs data.

## DATA AVAILABILITY

Data on a balance of payments basis are available on CANSIM.

	Matrix
Laspeyres fixed weighted import volume indexes 1971 = 100, raw and seasonally adjusted.	3643

Total Exports, all country values by section and commodity groupings, raw and seasonally adjusted; total export values for 6 principal trading areas, raw and seasonally adjusted.	3685

Lorsqu'il est impossible de déceler une variation saisonnière régulière, les séries ne sont pas désaisonnalisées. Par conséquent, le total désaisonné des exportations et des importations est constitué d'une combinaison de données brutes et de données désaisonnalisées. Auparavant, le total était désaisonné à partir des totaux bruts.

## INDICES DE PRIX

### Période

Les indices des prix à l'exportation, exprimés en chiffres douaniers, de l'électricité, du gaz naturel et du pétrole brut pour 1971 à 1983, qui étaient décalés d'un mois, ont été corrigés et correspondent actuellement au mois civil réel. De même, l'indice des prix à l'importation du pétrole brut des États-Unis, exprimé en chiffres douaniers, a été corrigé et combiné à l'indice des prix à l'importation des "Autres pays" de façon à produire un indice des prix à l'importation pour "Tous les pays". Le décalage d'un mois est corrigé dans les chiffres douaniers depuis janvier 1984.

### Niveau agrégé

Les indices agrégés (section et total) sont calculés à l'aide de poids fonctions de la valeur, sur la base de la balance des paiements, à partir d'indices de prix obtenus des données douanières.

## DISPONIBILITÉ DES DONNÉES

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

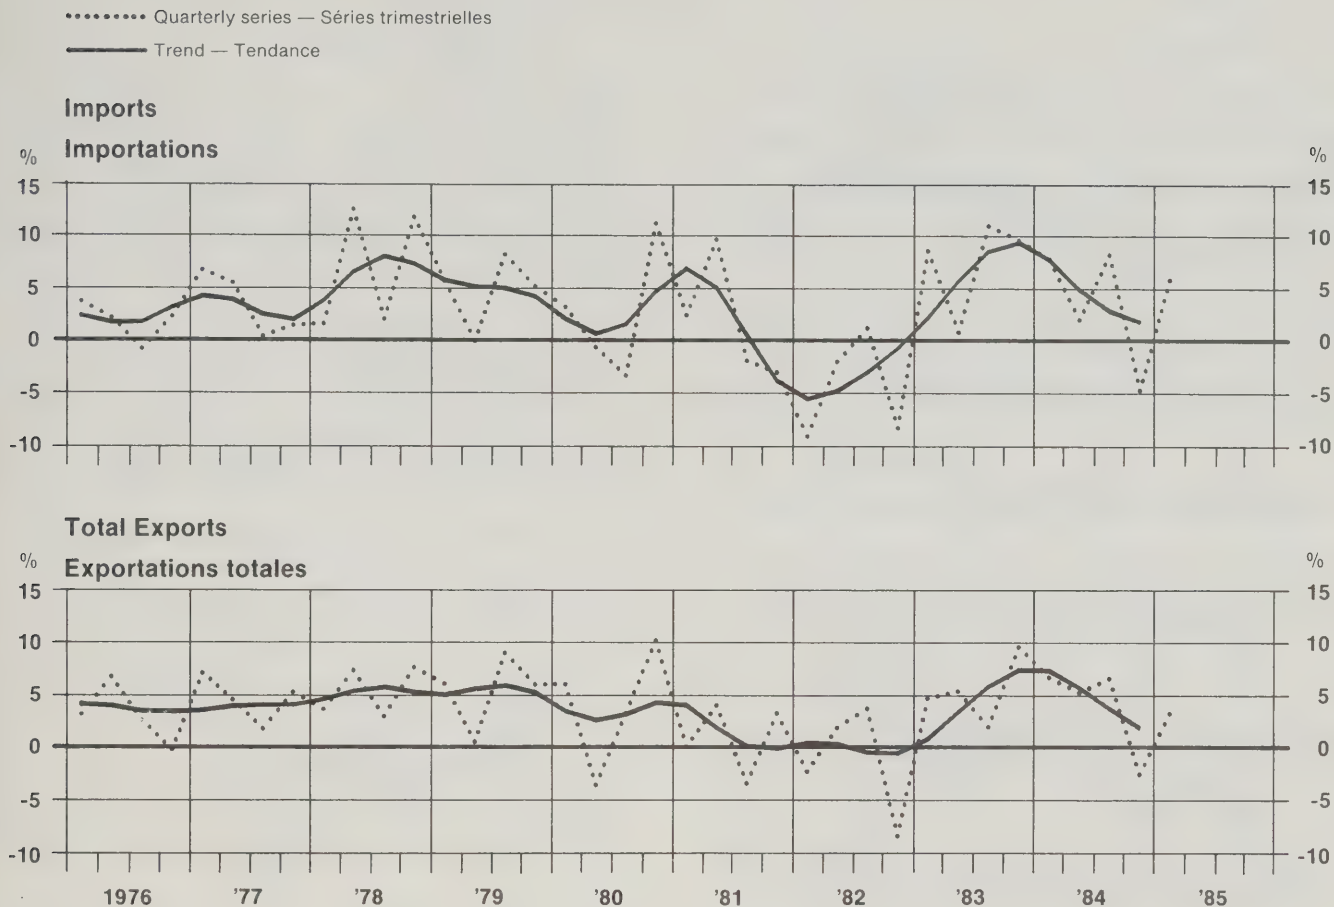

(1) La tendance à court terme donne une meilleure idée de la direction et du taux de variation des échanges commerciaux en mettant en moyenne les appréciables fluctuations mensuelles qui se produisent fréquemment dans ces derniers. La tendance pour le dernier mois n'est pas reportée sur les diagrammes ci-dessus parce qu'elle change fréquemment de façon appréciable avec l'inclusion des données des mois suivants.

- A. **Sources of Statistics:** Canada's international trade statistics are tabulated from copies of administrative documents collected by Revenue Canada, Customs at its ports across Canada. The Customs Act requires that each time goods are imported into or exported from Canada a document be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation of international trade statistics is determined and limited to some extent by Customs regulations and procedures. Where these affect the precise or consistent application of the statistical principles explained in the following section, their impact is described in qualitative terms only.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, for administrative reasons, be obtained from Customs documents. They are instead collected by the Manufacturing and Primary Industries Division of Statistics Canada, with important statistical consequences explained in Note 4 below.

Commencing with the May 1984 data export statistics for shipments of less than \$5,000 (up from \$2,500) and greater than \$800 (up from \$500) from Quebec, Ontario, Manitoba and British Columbia to the United States are estimated on the basis of a 20 per cent sample. The size of this sample is at present approximately 15,000 (up from 10,000) shipments per month. For further information, refer to the explanatory notes in the publication *Exports by Commodities* (cat. no. 65-004).

Effective January 1, 1982, the 10 per cent systematic sample of low valued import documents from the United States, as applied since January 1969 and revised in January 1975, has been discontinued. Starting with January 1984 data, all shipments exceeding \$800 are processed and compiled by complete count, while the value of shipments below \$800 is estimated. Prior to 1984 the low-value limit was \$500.

- B. **Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:** The most comprehensive set of principles for the compilation of trade statistics is to be found in *International Trade Statistics: Concepts and Definitions*, published by the United Nations Statistical Office (Series M, No. 52; New York, 1970). The following notes are both a summary of these principles and a description of the choices and exceptions made in the case of Canada's international trade statistics.

1. **System of Trade:** Canadian Statistics are tabulated according to the "general" system of trade. Thus *imports* include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. *Domestic exports* include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). *Re-exports* are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). *Total Exports* are the sum of *Domestic* and *Re-exports*.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic, tourist purchases and settlers' effects are excluded for practical

- A. **Sources des statistiques:** Les statistiques sur le commerce international du Canada sont totalisées à partir des copies des documents administratifs recueillis par Revenu Canada (Douanes) dans ses bureaux de douane par tout le Canada. La Loi sur les douanes exige que chaque fois que des marchandises sont importées au Canada ou exportées du pays, une déclaration soit faite précisant la nature des marchandises et donnant le détail de l'opération commerciale d'après les besoins de la réglementation de l'administration douanière. Il s'ensuit que la méthode de production de statistiques sur le commerce international est déterminée et limitée dans une certaine mesure par les règlements et les procédures des douanes. Lorsque ceux-ci nuisent à l'application précise ou uniforme des principes statistiques exposés dans la section suivante, leur incidence est décrite en termes qualitatifs seulement.

Les statistiques sur le commerce de l'énergie électrique et sur les exportations de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Elles sont plutôt recueillies par la Division des industries manufacturières et primaires de Statistique Canada; les conséquences importantes sur le plan statistique sont expliquées à la note 4 ci-dessous.

Commançant avec les données de mai 1984 les chiffres d'exportation portant sur les livraisons avec une valeur inférieure à \$5,000 (était \$2,500) et plus que \$800 (était \$500) en provenance du Québec, de l'Ontario, du Manitoba et de la Colombie-Britannique vers les États-Unis sont préparés d'après un échantillon de 20 pour cent. Cet échantillon comprend actuellement approximativement 15,000 (était 10,000) envois par mois. Pour plus de renseignements, voir les notes explicatives dans la publication *Exportations par marchandises* (no. 65-004 au cat.).

À partir du 1<sup>er</sup> janvier 1982, l'échantillonnage systématique de 10 p. 100 du montant des marchandises de faible valeur importés des États-Unis, tel qu'appliqué depuis janvier 1969 et révisé en janvier 1975, a été discontinué. Commencant avec les données de janvier 1984, pour toutes les livraisons dont la valeur excède \$800, le traitement et le calcul sont exhaustifs, alors que la valeur des livraisons inférieures à \$800 est estimée. Avant l'année d'enquête 1984, la limite de faible valeur était \$500.

- B. **Concepts et définitions utilisés dans la production de statistiques sur le commerce international du Canada** L'ensemble le plus complet de principes directeurs pour la préparation de ces statistiques est présenté dans *Statistiques du commerce international: concepts et définitions*, publié par le Bureau de statistique des Nations Unies (série M, no 52, New York, 1970). Les notes suivantes résument ces principes et décrivent les choix et les exceptions dans le cas de la statistique du commerce international du Canada.

1. **Système commercial:** Les statistiques canadiennes sont totalisées selon le système commercial "général". Ainsi, les *importations* comprennent tous les biens qui ont franchi les limites géographiques du Canada, qu'ils soient passés par les douanes pour être consommés immédiatement au Canada ou qu'ils aient été entreposés en douane. Les *exportations nationales* comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les *réexportations* sont des exportations de biens d'origine étrangère qui n'ont pas été transformés matériellement au Canada (y compris les biens retirés des entrepôts de douane en vue de leur exportation). Les *exportations totales* correspondent au total des *exportations nationales* et *réexportations*.

La statistique du commerce ne prend pas en compte les exportations vers des missions diplomatiques ou militaires canadiennes à l'étranger ni les importations attribuables à des missions étrangères semblables au Canada, car on considère que ces missions ne se trouvent pas hors des limites géographiques du pays qui les a envoyées. Les achats ou les ventes d'approvisionnement de navires ou d'aéronefs affectés au transport international, les achats des

reasons. Goods which cross the Canadian border for convenience of transportation only are not included in trade statistics.

2. **Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments or receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks and bonds are also excluded from the trade statistics.
3. **Valuation:** *Exports* are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g. mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

*Imports* are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

2. **Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui seront renvoyés dans le pays exportateur après un court laps de temps sont exclus de la statistique du commerce (lorsque cette intention se dégage des documents de douane). Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en vue d'une course, les films exportés pour être développés, puis retournés. Les biens exportés ou importés pour fins de réparation seulement ne sont pas pris en compte, bien que les paiements ou les recettes au titre des réparations soient portés dans la statistique du commerce. Des avoirs financiers comme le numéraire non périmé, les actions et les obligations sont également laissés hors compte.
3. **Évaluation:** Les *exportations* sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.
4. **Période:** Jusqu'à juillet 1979, les statistiques d'un mois donné visaient toutes les livraisons pour lesquelles Statistique Canada avait reçu des documents de douane jusqu'au dernier jour ouvrable du mois. À partir du mois d'août 1979, la fin du mois statistique correspond au dernier jour du mois civil où s'effectue, dans la mesure du possible, le dédouanement. De diverses livraisons peuvent ne pas être prises en compte dès leur arrivée ou leur départ à cause de la procédure administrative qui donne lieu à une présentation tardive des documents. Le commerce d'énergie électrique; les exportations de pétrole brut et de gaz naturel; et les importations selon l'arrangement avec les États-Unis pour des échanges de pétrole brut d'un mois donné sont présentés dans les statistiques du mois suivant parce qu'on obtient les données trop tard pour qu'elles puissent faire partie des statistiques du mois courant. Cependant, à compter des données de janvier 1984, les exportations d'électricité, de pétrole brut et de gaz naturel sont décalées d'un mois par la suite, de sorte qu'elles correspondent au mois statistique véritable.
5. **Attribution des partenaires commerciaux:** La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue aux fins de la géographie économique et ne reflète donc pas l'opinion du Gouvernement du Canada relativement aux questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

*Exports* are attributed to the country which is the last known destination of the goods at the time of export. (Many primary

Les *exportations* sont attribuées au pays de dernière destination connue au moment de l'exportation. (De nombreux produits "pri-

products are shipped to entrepôt points, particularly in Europe, for re-exports to the ultimate destination which is unknown when the goods leave Canada.)

*Imports* are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country.

## 6. Revisions:

- a. **Data for Current Month:** Statistics for the current month published in the "Preliminary Statement of Canadian International Trade" and in the "Summary of Canadian International Trade" (65-001) contain preliminary figures. However, figures for the current month published in "Imports by Commodities" (65-007), "Exports by Commodities" (65-004), "Imports by Countries" (65-006) and "Exports by Countries" (65-003) have been verified for reporting or processing errors.
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the monthly reports for December have been published. In the case of the "Summary of Canadian International Trade" (65-001), the revised December figures appear in the January issue of the following year. Commodity/Country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the reports 65-007 and 65-004.
- c. **Data for the previous year:** Revisions to the previous year appear in the December issue of the following year. Commodity/Country figures revised at that time are shown at the beginning of the reports 65-007 and 65-004. *When statistical series are adjusted for seasonal variations, the revised figures are reflected in the April issue of the "Summary of Canadian International Trade" (65-001).*

**Note:** Cumulative totals in all reports reflect the revisions applied up to the date of printing.

7. **Indexes of Price and Volume:** The price indexes in this publication are current-weighted and are calculated from price relatives based on 1971 = 100. The weights are trade quantities for the month, quarter or year to which the index refers and hence change from period to period. The volume index is derived by dividing a value index by the corresponding current-weighted price index. The resulting volume index is, therefore, weighted with fixed 1971 price weights. The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign statistics.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled "The 1971-based Price and Volume Indexes of Canada's External Trade", published in December 1976 as a supplement to this publication (65-001).

Each year revised indexes for the previous years are generally published in the February, March and April issues of this publication. Historical indexes were published for 1968-1974 in the June, July and August 1977 issues and for 1975 in the July, August and September 1978 issues. Most of these indexes (on a Customs Basis) are available on CANSIM in matrices 3680, 3681, 3682, 3715, 3716, and 3717.

The price and volume indexes presented in Part I are on a Balance of Payments Basis and are also available on CANSIM in matrices 3643, 3644, 3649, 3650, 3683 and 3684.

maires" sont expédiés vers des points d'entreposage, notamment en Europe, en vue de leur réexportation; la destination ultime de ces produits est inconnue lors qu'ils quittent le Canada.)

Les *importations* sont attribuées au pays de première consignation directe des biens au Canada, que ce soit ou non le pays d'origine. On déroge à cette règle dans le cas des biens ayant comme région d'origine l'Amérique centrale ou l'Amérique du sud et expédiés au Canada depuis les États-Unis; ces importations sont portées au crédit du pays d'origine, sauf pour les échanges de pétrole brut avec les États-Unis qui sont crédités à ce pays.

## 6. Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant figurant dans le communiqué "Préliminaire sur le commerce international du Canada" et le "Sommaire du commerce international du Canada" (65-001) contiennent des chiffres préliminaires. Cependant, les chiffres du mois courant dans "Importations par marchandises" (65-007), "Exportations par marchandises" (65-004), "Importations par pays" (65-006) et "Exportations par pays" (65-003) ont été vérifiés pour des erreurs de déclaration et de traitement.
- b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications mensuelles de décembre. Dans le cas de "Sommaire du commerce international du Canada" (65-001), les chiffres de décembre rectifiés paraîtront dans l'édition de janvier de l'année suivante. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/-pays figurent dans les rapports mensuels au commencement des publications 65-007 et 65-004.
- c. **Données de l'année précédente:** Les rectifications à l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise/pays rectifiés à ce moment-là figurent au commencement des publications 65-007 et 65-004. *Quand les séries statistiques sont désaisonnalisées, les chiffres rectifiés sont pris en compte dans l'édition d'avril de "Sommaire du commerce international du Canada" (65-001).*

**Note:** Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

7. **Indices de prix et de volume:** Les indices de prix compris dans cette publication sont pondérés d'après les quantités mensuelles, trimestrielles ou annuelles du commerce correspondantes à la période de l'indice et sont calculés d'après des prix relatifs de base 1971 = 100. Par conséquence ces pondérations sont variables d'une période à l'autre. Les indices du volume sont calculés en divisant l'indice de la valeur par l'indice du prix correspondant. L'indice du volume obtenu est donc implicitement pondéré par les prix fixes de l'année 1971. Les prix relatifs sont dérivés ou des valeurs unitaires calculés directement des statistiques du commerce extérieur ou surtout pour les produits finis, des indices de prix obtenus d'autres sources canadiennes ou de l'étranger.

Des renseignements concernant la méthodologie employée dans le calcul des indices sont données dans un document de référence intitulé "Les indices de prix et de volume de base 1971 du commerce extérieur du Canada" publié en décembre 1976 sous forme de supplément à la présente publication (65-001).

Une fois l'an, on publie les indices révisés des années précédentes, généralement dans les numéros de février, mars et avril de cette publication. Les indices historiques pour les années 1968 à 1974 ont paru dans les numéros de juin, juillet et août 1977, et celles pour 1975, dans les numéros de juillet, août et septembre 1978. La plupart des indices (sur la base douanière) sont offerts sur CANSIM, dans les matrices 3680, 3681, 3682, 3715, 3716 et 3717.

Les indices de prix et de volume présentés dans la partie I de cette publication sont sur la base de la balance des paiements et sont aussi disponibles sur CANSIM, dans les matrices 3643, 3644, 3649, 3650, 3683 et 3684.

8. **Provincial Detail:** Prior to the 1984 data year, *exports* statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain case this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Commencing with 1984 data, Statistics Canada and Customs & Excise, Revenue Canada have taken measures requiring the reporting of export shipments on a province of origin basis. It is recognized that the exporting community will be unable to effect the new provincial definition on a given date; therefore the 1984 statistics will reflect a period of transition.

*Import* statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed or enter the productive process.

9. **Principal trading areas:** The "principal trading areas" shown in some tables include groupings which are defined as follows:

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands and Greece (effective January 1981). The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada.

**Other O.E.C.D.:** Austria, Finland, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of the O.E.C.D. — The Organization for Economic Cooperation and Development).

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

10. **Sources of Further Information:** More detailed monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time. For example, *The Reconciliation of U.S.-Canada Trade Statistics*, published by the United States - Canada Trade Statistics Committee, is available on request from the address given below.

Trade statistics are also available on the CANSIM Main Base in the following matrices: 0021, 0022, 0876 to 0879, 3643, 3644, 3649 to 3719.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

8. **Statistiques provinciales:** Avant l'année d'enquête 1984, les statistiques sur les *exportations* par province de chargement indiquaient la province où les produits avaient été chargés initialement pour être exportés. Dans certains cas, il ne s'agissait pas de la province d'origine qui se définit comme étant la province où les produits ont été cultivés, extraits ou fabriqués.

À partir de l'année d'enquête 1984, Statistique Canada et Revenu Canada-Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées par province d'origine. Il est certain que les exportateurs ne pourront appliquer la nouvelle définition provinciale à une date précise, aussi faut-il prévoir une période de transition qui aura une incidence sur les statistiques de 1984.

Les statistiques des *importations* par province de dédouanement présentent la province où les biens ont passé la douane en vue d'une consommation immédiate ou de leur entreposage en douane; cette province peut différer de la province de consommation ou d'entrée dans l'activité productive.

9. **Marchés principaux:** Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:

**Autres C.E.E.:** Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas et Grèce (à partir de janvier 1981). Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada.

**Autres O.C.D.E.:** Autriche, Espagne, Finlande, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. — l'Organisation pour la coopération et le développement économique).

**Autres Amérique:** Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

10. **Sources de renseignements supplémentaires:** Des statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également se procurer des descriptions détaillées et des index des classifications de marchandises. Veuillez consulter le catalogue des publications de Statistique Canada pour une description du contenu des diverses publications. La recherche continue dans le domaine de la statistique du commerce donne naissance de temps à autre à de nouveaux documents de référence. Ainsi, on peut obtenir à l'adresse mentionnée ci-dessous un document sur le rapprochement des statistiques du commerce États-Unis-Canada publié par le comité de la statistique du commerce États-Unis-Canada.

Les statistiques sur le commerce sont également offertes sur la base principale de CANSIM dans les matrices suivantes: 0021, 0022, 0876 à 0879, 3643, 3644, 3649 à 3719.

Toute question au sujet des méthodes employées doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa, Ontario K1A 0T6.

## Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

## Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

## MERCHANDISE TRADE (BALANCE OF PAYMENTS BASIS)

The statistics presented in Part I (Analytical Charts and Tables) are adjusted to conform with the National Accounts concepts and definitions. Balance of Payments adjustments to Customs Basis data are incorporated at an aggregated level in order to make them compatible with the system of National Accounts.

### BALANCE OF PAYMENTS ADJUSTMENTS

#### Coverage or Valuation

- *Automotive Products:* Deductions are made for both exports of cars and trucks and imports of automotive parts for retroactive value adjustments and for special tooling and other charges.
- *Gold:* Adjustments are made to customs basis trade data when there is no change in ownership and additional adjustments are made for transactions between Canadians and non-residents for gold which remains in Canada.
- *Other adjustments* include United States/Canada Trade reconciliation, advertising, official valuation, freight and other adjustments.

#### Timing

- *Grains:* The Canadian Grain Commission's records of grain clearances from exporting warehouses during the full calendar month are used to adjust Trade of Canada series for grain exports. The volume of clearances obtained from this source are combined with unit values from customs-based series to derive hybrid estimates which are substituted for original customs series.
- *Energy:* Trade in electricity; exports of crude petroleum and natural gas, and imports of "swap oil" from the United States, are adjusted to account for the one month reporting lag. Starting with January 1984 data, the adjustments apply only to the current month for exports of electricity, crude petroleum and natural gas, as customs based data are shifted back one month, thus reflecting the true statistical month.
- *Ships, Civil Aircraft and Military Equipment:* The adjustment substitutes progress payments in connection with the construction of ships, civil aircraft and some military equipment, in place of the actual deliveries of the equipment recorded in the Trade of Canada series.

For detailed description of sources and methods please refer to Cat. 67506E Occasional "The Canadian Balance of International Payments and International Investment Position".

#### Geographic Classification

On a balance of payments basis, trade with the United States includes trade with Puerto Rico and the Virgin Islands.

### SEASONAL ADJUSTMENT

Total exports (domestic exports and re-exports) and imports on a seasonally adjusted basis are now calculated indirectly as the sum of approximately sixty commodity aggregates. Where stable seasonality

## COMMERCE DES MARCHANDISES (BASE DE LA BALANCE DES PAIEMENTS)

Les statistiques présentées à la partie I (graphiques et tableaux analytiques) seront ajustées conformément aux concepts et aux définitions des comptes nationaux. Les corrections apportées aux chiffres douaniers aux fins de la balance des paiements sont intégrées au niveau des groupes pour rendre ces données compatibles avec celles du système des comptes nationaux.

### CORRECTIONS EN FONCTION DE LA BALANCE DES PAIEMENTS

#### Champ d'observation ou évaluation

- *Produits automobiles:* On effectue dans le cas des exportations d'automobiles et de camions et des importations de pièces de véhicules automobiles, une déduction ayant pour objet de corriger rétroactivement la valeur et de tenir compte des frais d'outillage spéciaux et autres.
- *Or:* On corrige les données douanières du commerce quand il n'y a pas de changement de propriété et on effectue des corrections supplémentaires pour les transactions au Canada entre les canadiens et les étrangers.
- *Les autres corrections* comprennent le rapprochement du commerce entre les États-Unis et le Canada, la publicité, l'évaluation officielle, les frais de transport et autres.

#### Période

- *Céréales:* Les données des exportations de grains tirées des séries du Commerce du Canada sont ajustées en fonction des chiffres que renferment les dossiers des expéditions de grains des entrepôts d'exportation établis par la Commission canadienne des grains pour un mois civil donné. Le volume des expéditions obtenu de cette source est combiné aux chiffres obtenus des séries douanières pour produire des estimations mixtes qui remplacent les séries douanières initiales.
- *Énergie:* Le commerce de l'électricité, les exportations de pétrole brut et de gaz naturel et les importations de pétrole d'échange des États-Unis, sont ajustés pour tenir compte du délai de déclaration d'un mois. À compter des données de janvier 1984, les corrections ne s'appliqueront qu'au mois courant dans le cas des exportations d'électricité, de pétrole brut et de gaz naturel, étant donné que les chiffres douaniers sont décalés d'un mois, de sorte qu'ils correspondent au mois statistique véritable.
- *Navires, avions civils et matériel militaire:* Les ajustements remplacent les chiffres des livraisons réelles de matériel compris dans les séries du Commerce du Canada par les paiements échelonnés effectués relativement à la construction de navires, d'avions civils et de certains articles de matériel militaire.

Pour obtenir une description détaillée des sources et des méthodes, se référer à la publication 67-506F au catalogue, (hors série) *La balance des paiements et le bilan des investissements internationaux du Canada*.

#### Classification géographique

Sur la base de la balance des paiements, le commerce avec les États-Unis englobe le commerce avec Porto Rico et les îles Vierges.

### DÉSAISONNALISATION

Le total des exportations (exportations nationales et réexportations) et les importations désaisonnalisées sont maintenant calculés indirectement, étant constitués de la somme d'environ soixante groupes de produits.

cannot be reliably identified, the series is not seasonally adjusted. Therefore, seasonally adjusted total exports and imports represent a combination of raw and seasonally adjusted data. Previously the total was seasonally adjusted from raw data at the total level.

## PRICE INDEXES

### Timing

From 1971 to 1983, the export price indexes for electricity, natural gas and crude petroleum on a customs basis which were lagged one month have been adjusted to represent the true calendar month. Similarly, the import price index for crude petroleum from the United States on a customs basis has been adjusted and recombined with the "other country" import price index in order to arrive at an "All country" import price index. From January 1984, onward, the one month lag is now corrected on a customs basis.

### Aggregate Levels

Indexes at an aggregate level (section and total levels) are calculated by using value weights on a balance of payments basis with price indexes derived from customs data.

## DATA AVAILABILITY

Data on a balance of payments basis are available on CANSIM.

Laspeyres fixed weighted export volume indexes 1971 = 100, raw and seasonally adjusted.	3644
Total Exports, all country current weighted (Paasche) price indexes, 1971 = 100, raw and seasonally adjusted.	3683
Total Exports, all country fixed weight (Laspeyres) price index 1971 = 100, raw and seasonally adjusted.	3684
Total Exports, all country values by section and commodity groupings, raw and seasonally adjusted; total export values for 6 principal trading areas, raw and seasonally adjusted.	3685

Lorsqu'il est impossible de déceler une variation saisonnière régulière, les séries ne sont pas désaisonnalisées. Par conséquent, le total désaisonné des exportations et des importations est constitué d'une combinaison de données brutes et de données désaisonnalisées. Auparavant, le total était désaisonné à partir des totaux bruts.

## INDICES DE PRIX

### Période

Les indices des prix à l'exportation, exprimés en chiffres douaniers, de l'électricité, du gaz naturel et du pétrole brut pour 1971 à 1983, qui étaient décalés d'un mois, ont été corrigés et correspondent actuellement au mois civil réel. De même, l'indice des prix à l'importation du pétrole brut des États-Unis, exprimé en chiffres douaniers, a été corrigé et combiné à l'indice des prix à l'importation des "Autres pays" de façon à produire un indice des prix à l'importation pour "Tous les pays". Le décalage d'un mois est corrigé dans les chiffres douaniers depuis janvier 1984.

### Niveau agrégé

Les indices agrégés (section et total) sont calculés à l'aide de poids fonctions de la valeur, sur la base de la balance des paiements, à partir d'indices de prix obtenus des données douanières.

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

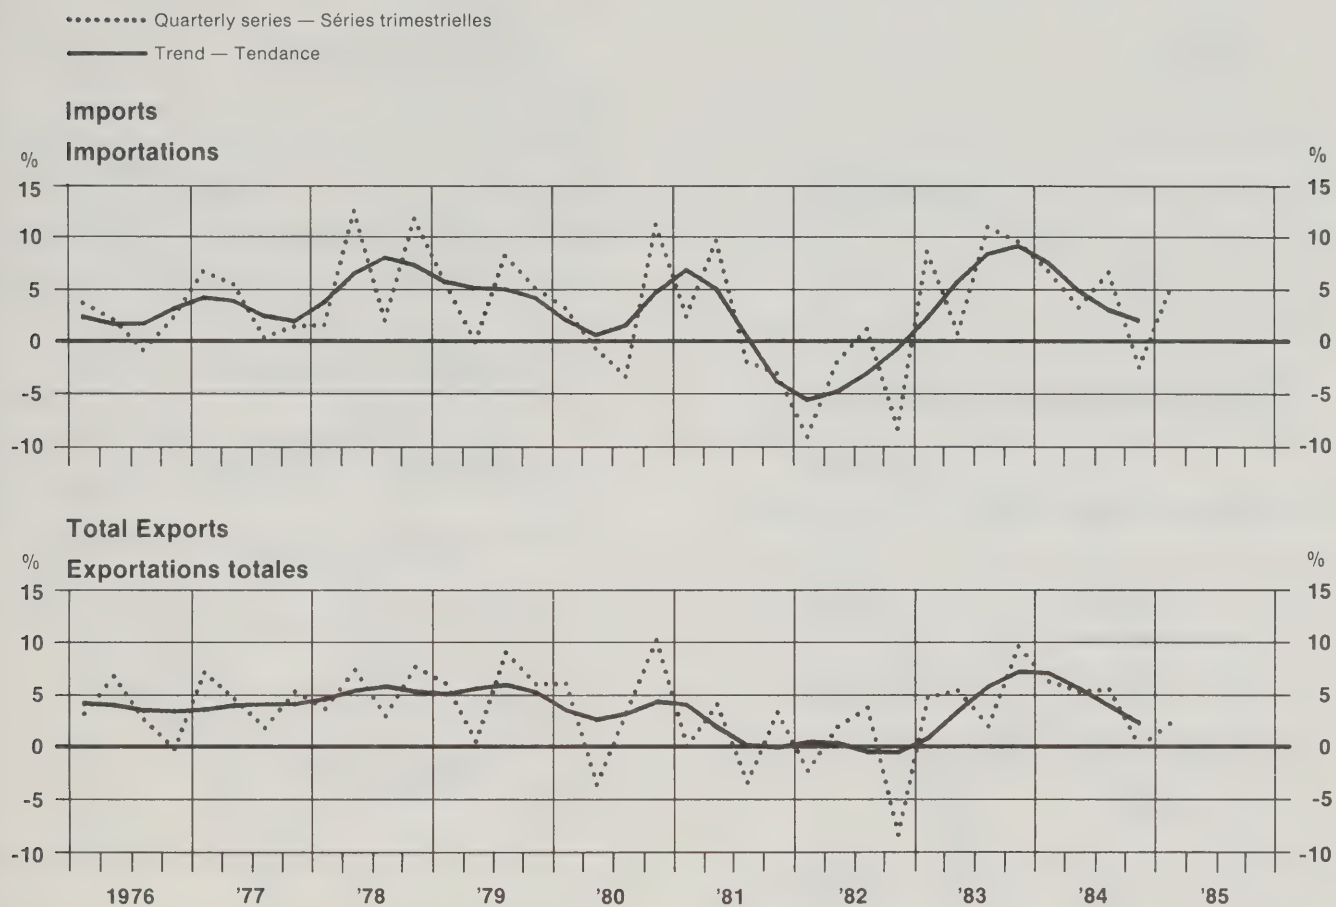

(1) La tendance à court terme donne une meilleure idée de la direction et du taux de variation des échanges commerciaux en mettant en moyenne les appréciables fluctuations mensuelles qui se produisent fréquemment dans ces derniers. La tendance pour le dernier mois n'est pas reportée sur les diagrammes ci-dessus parce qu'elle change fréquemment de façon appréciable avec l'inclusion des données des mois suivants.

- A. **Sources of Statistics:** Canada's international trade statistics are tabulated from copies of administrative documents collected by Revenue Canada, Customs at its ports across Canada. The Customs Act requires that each time goods are imported into or exported from Canada a document be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation of international trade statistics is determined and limited to some extent by Customs regulations and procedures. Where these affect the precise or consistent application of the statistical principles explained in the following section, their impact is described in qualitative terms only.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, for administrative reasons, be obtained from Customs documents. They are instead collected by the Manufacturing and Primary Industries Division of Statistics Canada, with important statistical consequences explained in Note 4 below.

Commencing with the May 1984 data export statistics for shipments of less than \$5,000 (up from \$2,500) and greater than \$800 (up from \$500) from Quebec, Ontario, Manitoba and British Columbia to the United States are estimated on the basis of a 20 per cent sample. The size of this sample is at present approximately 15,000 (up from 10,000) shipments per month. For further information, refer to the explanatory notes in the publication *Exports by Commodities* (cat. no. 65-004).

Effective January 1, 1982, the 10 per cent systematic sample of low valued import documents from the United States, as applied since January 1969 and revised in January 1975, has been discontinued. Starting with January 1984 data, all shipments exceeding \$800 are processed and compiled by complete count, while the value of shipments below \$800 is estimated. Prior to 1984 the low-value limit was \$500.

- B. **Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:** The most comprehensive set of principles for the compilation of trade statistics is to be found in *International Trade Statistics: Concepts and Definitions*, published by the United Nations Statistical Office (Series M, No. 52; New York, 1970). The following notes are both a summary of these principles and a description of the choices and exceptions made in the case of Canada's international trade statistics.

1. **System of Trade:** Canadian Statistics are tabulated according to the "general" system of trade. Thus *imports* include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. *Domestic exports* include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). *Re-exports* are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). *Total Exports* are the sum of *Domestic* and *Re-exports*.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic, tourist purchases and settlers' effects are excluded for practical

- A. **Sources des statistiques:** Les statistiques sur le commerce international du Canada sont totalisées à partir des copies des documents administratifs recueillis par Revenu Canada (Douanes) dans ses bureaux de douane par tout le Canada. La Loi sur les douanes exige que chaque fois que des marchandises sont importées au Canada ou exportées du pays, une déclaration soit faite précisant la nature des marchandises et donnant le détail de l'opération commerciale d'après les besoins de la réglementation de l'administration douanière. Il s'ensuit que la méthode de production de statistiques sur le commerce international est déterminée et limitée dans une certaine mesure par les règlements et les procédures des douanes. Lorsque ceux-ci nuisent à l'application précise ou uniforme des principes statistiques exposés dans la section suivante, leur incidence est décrite en termes qualitatifs seulement.

Les statistiques sur le commerce de l'énergie électrique et sur les exportations de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Elles sont plutôt recueillies par la Division des industries manufacturières et primaires de Statistique Canada; les conséquences importantes sur le plan statistique sont expliquées à la note 4 ci-dessous.

Commançant avec les données de mai 1984 les chiffres d'exportation portant sur les livraisons avec une valeur inférieure à \$5,000 (était \$2,500) et plus que \$800 (était \$500) en provenance du Québec, de l'Ontario, du Manitoba et de la Colombie-Britannique vers les États-Unis sont préparés d'après un échantillon de 20 pour cent. Cet échantillon comprend actuellement approximativement 15,000 (était 10,000) envois par mois. Pour plus de renseignements, voir les notes explicatives dans la publication *Exportations par marchandises* (no. 65-004 au cat.).

À partir du 1<sup>er</sup> janvier 1982, l'échantillonnage systématique de 10 p. 100 du montant des marchandises de faible valeur importés des États-Unis, tel qu'appliqué depuis janvier 1969 et révisé en janvier 1975, a été discontinué. Commencant avec les données de janvier 1984, pour toutes les livraisons dont la valeur excède \$800, le traitement et le calcul sont exhaustifs, alors que la valeur des livraisons inférieures à \$800 est estimée. Avant l'année d'enquête 1984, la limite de faible valeur était \$500.

- B. **Concepts et définitions utilisés dans la production de statistiques sur le commerce international du Canada** L'ensemble le plus complet de principes directeurs pour la préparation de ces statistiques est présenté dans *Statistiques du commerce international: concepts et définitions*, publié par le Bureau de statistique des Nations Unies (série M, no 52, New York, 1970). Les notes suivantes résument ces principes et décrivent les choix et les exceptions dans le cas de la statistique du commerce international du Canada.

1. **Système commercial:** Les statistiques canadiennes sont totalisées selon le système commercial "général". Ainsi, les *importations* comprennent tous les biens qui ont franchi les limites géographiques du Canada, qu'ils soient passés par les douanes pour être consommés immédiatement au Canada ou qu'ils aient été entreposés en douane. Les *exportations nationales* comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les *réexportations* sont des exportations de biens d'origine étrangère qui n'ont pas été transformés matériellement au Canada (y compris les biens retirés des entrepôts de douane en vue de leur exportation). Les *exportations totales* correspondent au total des *exportations nationales* et *réexportations*.

La statistique du commerce ne prend pas en compte les exportations vers des missions diplomatiques ou militaires canadiennes à l'étranger ni les importations attribuables à des missions étrangères semblables au Canada, car on considère que ces missions ne se trouvent pas hors des limites géographiques du pays qui les a envoyées. Les achats ou les ventes d'approvisionnement de navires ou d'aéronefs affectés au transport international, les achats des

reasons. Goods which cross the Canadian border for convenience of transportation only are not included in trade statistics.

2. **Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments or receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks and bonds are also excluded from the trade statistics.
3. **Valuation:** *Exports* are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g. mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

*Imports* are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

4. **Timing:** Until July 1979, statistics for a month included all shipments for which Custom documents were received at Statistics Canada up to, and including, the last working day of the month. Starting with data for August 1979, the closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. Individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents. Trade in electricity; exports of both crude petroleum and natural gas; and imports of "Swap Oil" from the United States for a given month are included in statistics for the following month because they are collected too late for inclusion in statistics for the current month. However, starting with the January 1984 data, exports of electricity, crude petroleum, and natural gas are subsequently shifted back one month, thus reflecting the true statistical month.
5. **Trading Partner Attribution:** The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and therefore does not reflect the views or intentions of the government of Canada on international issues of recognition, sovereignty or jurisdiction.

*Exports* are attributed to the country which is the last known destination of the goods at the time of export. (Many primary

touristes et les effets des immigrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont laissés hors compte.

2. **Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui seront renvoyés dans le pays exportateur après un court laps de temps sont exclus de la statistique du commerce (lorsque cette intention se dégage des documents de douane). Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en vue d'une course, les films exportés pour être développés, puis retournés. Les biens exportés ou importés pour fins de réparation seulement ne sont pas pris en compte, bien que les paiements ou les recettes au titre des réparations soient portés dans la statistique du commerce. Des avoirs financiers comme le numéraire non périmé, les actions et les obligations sont également laissés hors compte.
3. **Évaluation:** Les *exportations* sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.

Les *importations* sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois, les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane.) Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de livraison et leur prix englobe par conséquent les frais de transport.

4. **Période:** Jusqu'à juillet 1979, les statistiques d'un mois donné visaient toutes les livraisons pour lesquelles Statistique Canada avait reçu des documents de douane jusqu'au dernier jour ouvrable du mois. À partir du mois d'août 1979, la fin du mois statistique correspond au dernier jour du mois civil où s'effectue, dans la mesure du possible, le dédouanement. De diverses livraisons peuvent ne pas être prises en compte dès leur arrivée ou leur départ à cause de la procédure administrative qui donne lieu à une présentation tardive des documents. Le commerce d'énergie électrique; les exportations de pétrole brut et de gaz naturel; et les importations selon l'arrangement avec les États-Unis pour des échanges de pétrole brut d'un mois donné sont présentés dans les statistiques du mois suivant parce qu'on obtient les données trop tard pour qu'elles puissent faire partie des statistiques du mois courant. Cependant, à compter des données de janvier 1984, les exportations d'électricité, de pétrole brut et de gaz naturel sont décalées d'un mois par la suite, de sorte qu'elles correspondent au mois statistique véritable.
5. **Attribution des partenaires commerciaux:** La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue aux fins de la géographie économique et ne reflète donc pas l'opinion du Gouvernement du Canada relativement aux questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Les *exportations* sont attribuées au pays de dernière destination connue au moment de l'exportation. (De nombreux produits "pri-

products are shipped to entrepôt points, particularly in Europe, for re-exports to the ultimate destination which is unknown when the goods leave Canada.)

*Imports* are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country.

## 6. Revisions:

- a. **Data for Current Month:** Statistics for the current month published in the "Preliminary Statement of Canadian International Trade" and in the "Summary of Canadian International Trade" (65-001) contain preliminary figures. However, figures for the current month published in "Imports by Commodities" (65-007), "Exports by Commodities" (65-004), "Imports by Countries" (65-006) and "Exports by Countries" (65-003) have been verified for reporting or processing errors.
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the monthly reports for December have been published. In the case of the "Summary of Canadian International Trade" (65-001), the revised December figures appear in the January issue of the following year. Commodity/Country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the reports 65-007 and 65-004.
- c. **Data for the previous year:** Revisions to the previous year appear in the December issue of the following year. Commodity/Country figures revised at that time are shown at the beginning of the reports 65-007 and 65-004. *When statistical series are adjusted for seasonal variations, the revised figures are reflected in the April issue of the "Summary of Canadian International Trade" (65-001).*

**Note:** Cumulative totals in all reports reflect the revisions applied up to the date of printing.

7. **Indexes of Price and Volume:** The price indexes in this publication are current-weighted and are calculated from price relatives based on 1971 = 100. The weights are trade quantities for the month, quarter or year to which the index refers and hence change from period to period. The volume index is derived by dividing a value index by the corresponding current-weighted price index. The resulting volume index is, therefore, weighted with fixed 1971 price weights. The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign statistics.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled "The 1971-based Price and Volume Indexes of Canada's External Trade", published in December 1976 as a supplement to this publication (65-001).

Each year revised indexes for the previous years are generally published in the February, March and April issues of this publication. Historical indexes were published for 1968-1974 in the June, July and August 1977 issues and for 1975 in the July, August and September 1978 issues. Most of these indexes (on a Customs Basis) are available on CANSIM in matrices 3680, 3681, 3682, 3715, 3716, and 3717.

The price and volume indexes presented in Part I are on a Balance of Payments Basis and are also available on CANSIM in matrices 3643, 3644, 3649, 3650, 3683 and 3684.

maires" sont expédiés vers des points d'entreposage, notamment en Europe, en vue de leur réexportation; la destination ultime de ces produits est inconnue lors qu'ils quittent le Canada.)

Les *importations* sont attribuées au pays de première consignation directe des biens au Canada, que ce soit ou non le pays d'origine. On déroge à cette règle dans le cas des biens ayant comme région d'origine l'Amérique centrale ou l'Amérique du sud et expédiés au Canada depuis les États-Unis; ces importations sont portées au crédit du pays d'origine, sauf pour les échanges de pétrole brut avec les États-Unis qui sont crédités à ce pays.

## 6. Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant figurant dans le communiqué "Préliminaire sur le commerce international du Canada" et le "Sommaire du commerce international du Canada" (65-001) contiennent des chiffres préliminaires. Cependant, les chiffres du mois courant dans "Importations par marchandises" (65-007), "Exportations par marchandises" (65-004), "Importations par pays" (65-006) et "Exportations par pays" (65-003) ont été vérifiés pour des erreurs de déclaration et de traitement.
- b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications mensuelles de décembre. Dans le cas de "Sommaire du commerce international du Canada" (65-001), les chiffres de décembre rectifiés paraîtront dans l'édition de janvier de l'année suivante. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/pays figurent dans les rapports mensuels au commencement des publications 65-007 et 65-004.
- c. **Données de l'année précédente:** Les rectifications à l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise/pays rectifiés à ce moment-là figurent au commencement des publications 65-007 et 65-004. *Quand les séries statistiques sont désaisonnalisées, les chiffres rectifiés sont pris en compte dans l'édition d'avril de "Sommaire du commerce international du Canada" (65-001).*

**Note:** Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

7. **Indices de prix et de volume:** Les indices de prix compris dans cette publication sont pondérés d'après les quantités mensuelles, trimestrielles ou annuelles du commerce correspondantes à la période de l'indice et sont calculés d'après des prix relatifs de base 1971 = 100. Par conséquent ces pondérations sont variables d'une période à l'autre. Les indices du volume sont calculés en divisant l'indice de la valeur par l'indice du prix correspondant. L'indice du volume obtenu est donc implicitement pondéré par les prix fixes de l'année 1971. Les prix relatifs sont dérivés ou des valeurs unitaires calculés directement des statistiques du commerce extérieur ou surtout pour les produits finis, des indices de prix obtenus d'autres sources canadiennes ou de l'étranger.

Des renseignements concernant la méthodologie employée dans le calcul des indices sont données dans un document de référence intitulé "Les indices de prix et de volume de base 1971 du commerce extérieur du Canada" publié en décembre 1976 sous forme de supplément à la présente publication (65-001).

Une fois l'an, on publie les indices révisés des années précédentes, généralement dans les numéros de février, mars et avril de cette publication. Les indices historiques pour les années 1968 à 1974 ont paru dans les numéros de juin, juillet et août 1977, et celles pour 1975, dans les numéros de juillet, août et septembre 1978. La plupart des indices (sur la base douanière) sont offerts sur CANSIM, dans les matrices 3680, 3681, 3682, 3715, 3716 et 3717.

Les indices de prix et de volume présentés dans la partie I de cette publication sont sur la base de la balance des paiements et sont aussi disponibles sur CANSIM, dans les matrices 3643, 3644, 3649, 3650, 3683 et 3684.

8. **Provincial Detail:** Prior to the 1984 data year, *exports* statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain case this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Commencing with 1984 data, Statistics Canada and Customs & Excise, Revenue Canada have taken measures requiring the reporting of export shipments on a province of origin basis. It is recognized that the exporting community will be unable to effect the new provincial definition on a given date; therefore the 1984 statistics will reflect a period of transition.

*Import* statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed or enter the productive process.

9. **Principal trading areas:** The "principal trading areas" shown in some tables include groupings which are defined as follows:

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands and Greece (effective January 1981). The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada.

**Other O.E.C.D.:** Austria, Finland, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of the O.E.C.D. — The Organization for Economic Cooperation and Development).

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

10. **Sources of Further Information:** More detailed monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time. For example, *The Reconciliation of U.S.-Canada Trade Statistics*, published by the United States - Canada Trade Statistics Committee, is available on request from the address given below.

Trade statistics are also available on the CANSIM Main Base in the following matrices: 0021, 0022, 0876 to 0879, 3643, 3644, 3649 to 3719.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

8. **Statistiques provinciales:** Avant l'année d'enquête 1984, les statistiques sur les *exportations* par province de chargement indiquaient la province où les produits avaient été chargés initialement pour être exportés. Dans certains cas, il ne s'agissait pas de la province d'origine qui se définit comme étant la province où les produits ont été cultivés, extraits ou fabriqués.

À partir de l'année d'enquête 1984, Statistique Canada et Revenu Canada-Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées par province d'origine. Il est certain que les exportateurs ne pourront appliquer la nouvelle définition provinciale à une date précise, aussi faut-il prévoir une période de transition qui aura une incidence sur les statistiques de 1984.

Les statistiques des *importations* par province de dédouanement présentent la province où les biens ont passé la douane en vue d'une consommation immédiate ou de leur entreposage en douane; cette province peut différer de la province de consommation ou d'entrée dans l'activité productive.

9. **Marchés principaux:** Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:

**Autres C.E.E.:** Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas et Grèce (à partir de janvier 1981). Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada.

**Autres O.C.D.E.:** Autriche, Espagne, Finlande, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. — l'Organisation pour la coopération et le développement économique).

**Autres Amérique:** Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

10. **Sources de renseignements supplémentaires:** Des statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également se procurer des descriptions détaillées et des index des classifications de marchandises. Veuillez consulter le catalogue des publications de Statistique Canada pour une description du contenu des diverses publications. La recherche continue dans le domaine de la statistique du commerce donne naissance de temps à autre à de nouveaux documents de référence. Ainsi, on peut obtenir à l'adresse mentionnée ci-dessous un document sur le rapprochement des statistiques du commerce États-Unis-Canada publié par le comité de la statistique du commerce États-Unis-Canada.

Les statistiques sur le commerce sont également offertes sur la base principale de CANSIM dans les matrices suivantes: 0021, 0022, 0876 à 0879, 3643, 3644, 3649 à 3719.

Toute question au sujet des méthodes employées doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa, Ontario K1A 0T6.

## Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit  
International Trade Division,

## Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## MERCHANDISE TRADE (BALANCE OF PAYMENTS BASIS)

The statistics presented in Part I (Analytical Charts and Tables) are adjusted to conform with the National Accounts concepts and definitions. Balance of Payments adjustments to Customs Basis data are incorporated at an aggregated level in order to make them compatible with the system of National Accounts.

### BALANCE OF PAYMENTS ADJUSTMENTS

#### Coverage or Valuation

- *Automotive Products:* Deductions are made for both exports of cars and trucks and imports of automotive parts for retroactive value adjustments and for special tooling and other charges.
- *Gold:* Adjustments are made to customs basis trade data when there is no change in ownership and additional adjustments are made for transactions between Canadians and non-residents for gold which remains in Canada.
- *Other adjustments* include United States/Canada Trade reconciliation, advertising, official valuation, freight and other adjustments.

#### Timing

- *Grains:* The Canadian Grain Commission's records of grain clearances from exporting warehouses during the full calendar month are used to adjust Trade of Canada series for grain exports. The volume of clearances obtained from this source are combined with unit values from customs-based series to derive hybrid estimates which are substituted for original customs series.
- *Energy:* Trade in electricity; exports of crude petroleum and natural gas, and imports of "swap oil" from the United States, are adjusted to account for the one month reporting lag. Starting with January 1984 data, the adjustments apply only to the current month for exports of electricity, crude petroleum and natural gas, as customs based data are shifted back one month, thus reflecting the true statistical month.
- *Ships, Civil Aircraft and Military Equipment:* The adjustment substitutes progress payments in connection with the construction of ships, civil aircraft and some military equipment, in place of the actual deliveries of the equipment recorded in the Trade of Canada series.

For detailed description of sources and methods please refer to Cat. 67506E Occasional "The Canadian Balance of International Payments and International Investment Position".

#### Geographic Classification

On a balance of payments basis, trade with the United States includes trade with Puerto Rico and the Virgin Islands.

### SEASONAL ADJUSTMENT

Total exports (domestic exports and re-exports) and imports on a seasonally adjusted basis are now calculated indirectly as the sum of approximately sixty commodity aggregates. Where stable seasonality

## COMMERCE DES MARCHANDISES (BASE DE LA BALANCE DES PAIEMENTS)

Les statistiques présentées à la partie I (graphiques et tableaux analytiques) seront ajustées conformément aux concepts et aux définitions des comptes nationaux. Les corrections apportées aux chiffres douaniers aux fins de la balance des paiements sont intégrées au niveau des groupes pour rendre ces données compatibles avec celles du système des comptes nationaux.

### CORRECTIONS EN FONCTION DE LA BALANCE DES PAIEMENTS

#### Champ d'observation ou évaluation

- *Produits automobiles:* On effectue dans le cas des exportations d'automobiles et de camions et des importations de pièces de véhicules automobiles, une déduction ayant pour objet de corriger rétroactivement la valeur et de tenir compte des frais d'outillage spéciaux et autres.
- *Or:* On corrige les données douanières du commerce quand il n'y a pas de changement de propriété et on effectue des corrections supplémentaires pour les transactions au Canada entre les canadiens et les étrangers.
- *Les autres corrections* comprennent le rapprochement du commerce entre les États-Unis et le Canada, la publicité, l'évaluation officielle, les frais de transport et autres.

#### Période

- *Céréales:* Les données des exportations de grains tirées des séries du Commerce du Canada sont ajustées en fonction des chiffres que renferment les dossiers des expéditions de grains des entrepôts d'exportation établis par la Commission canadienne des grains pour un mois civil donné. Le volume des expéditions obtenu de cette source est combiné aux chiffres obtenus des séries douanières pour produire des estimations mixtes qui remplacent les séries douanières initiales.
- *Énergie:* Le commerce de l'électricité, les exportations de pétrole brut et de gaz naturel et les importations de pétrole d'échange des États-Unis, sont ajustés pour tenir compte du délai de déclaration d'un mois. À compter des données de janvier 1984, les corrections ne s'appliquent qu'au mois courant dans le cas des exportations d'électricité, de pétrole brut et de gaz naturel, étant donné que les chiffres douaniers sont décalés d'un mois, de sorte qu'ils correspondent au mois statistique véritable.
- *Navires, avions civils et matériel militaire:* Les ajustements remplacent les chiffres des livraisons réelles de matériel compris dans les séries du Commerce du Canada par les paiements échelonnés effectués relativement à la construction de navires, d'avions civils et de certains articles de matériel militaire.

Pour obtenir une description détaillée des sources et des méthodes, se référer à la publication 67-506F au catalogue, (hors série) *La balance des paiements et le bilan des investissements internationaux du Canada*.

#### Classification géographique

Sur la base de la balance des paiements, le commerce avec les États-Unis englobe le commerce avec Porto Rico et les îles Vierges.

### DÉSAISONNALISATION

Le total des exportations (exportations nationales et réexportations) et les importations désaisonnalisées sont maintenant calculés indirectement, étant constitués de la somme d'environ soixante groupes de produits.

cannot be reliably identified, the series is not seasonally adjusted. Therefore, seasonally adjusted total exports and imports represent a combination of raw and seasonally adjusted data. Previously the total was seasonally adjusted from raw data at the total level.

## PRICE INDEXES

### Timing

From 1971 to 1983, the export price indexes for electricity, natural gas and crude petroleum on a customs basis which were lagged one month have been adjusted to represent the true calendar month. Similarly, the import price index for crude petroleum from the United States on a customs basis has been adjusted and recombined with the “other country” import price index in order to arrive at an “All country” import price index. From January 1984, onward, the one month lag is now corrected on a customs basis.

### Aggregate Levels

Indexes at an aggregate level (section and total levels) are calculated by using value weights on a balance of payments basis with price indexes derived from customs data.

## DATA AVAILABILITY

Data on a balance of payments basis are available on CANSIM.

	Matrix
Laspeyres fixed weighted import volume indexes 1971 = 100, raw and seasonally adjusted.	3643

Total Exports, all country fixed weight (Laspeyres) price index 1971 = 100, raw and seasonally adjusted.	3684
Total Exports, all country values by section and commodity groupings, raw and seasonally adjusted; total export values for 6 principal trading areas, raw and seasonally adjusted.	3685

Lorsqu'il est impossible de déceler une variation saisonnière régulière, les séries ne sont pas désaisonnalisées. Par conséquent, le total désaisonnalisé des exportations et des importations est constitué d'une combinaison de données brutes et de données désaisonnalisées. Auparavant, le total était désaisonnalisé à partir des totaux bruts.

## INDICES DE PRIX

### Période

Les indices des prix à l'exportation, exprimés en chiffres douaniers, de l'électricité, du gaz naturel et du pétrole brut pour 1971 à 1983, qui étaient décalés d'un mois, ont été corrigés et correspondent actuellement au mois civil réel. De même, l'indice des prix à l'importation du pétrole brut des États-Unis, exprimé en chiffres douaniers, a été corrigé et combiné à l'indice des prix à l'importation des “Autres pays” de façon à produire un indice des prix à l'importation pour “Tous les pays”. Le décalage d'un mois est corrigé dans les chiffres douaniers depuis janvier 1984.

### Niveau agrégé

Les indices agrégés (section et total) sont calculés à l'aide de poids fonctions de la valeur, sur la base de la balance des paiements, à partir d'indices de prix obtenus des données douanières.

## DISPONIBILITÉ DES DONNÉES

The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

(1) La tendance à court terme donne une meilleure idée de la direction et du taux de variation des échanges commerciaux en mettant en moyenne les appréciables fluctuations mensuelles qui se produisent fréquemment dans ces derniers. La tendance pour le dernier mois n'est pas reportée sur les diagrammes ci-dessus parce qu'elle change fréquemment de façon appréciable avec l'inclusion des données des mois suivants.

- A. **Sources of Statistics:** Canada's international trade statistics are tabulated from copies of administrative documents collected by Revenue Canada, Customs at its ports across Canada. The Customs Act requires that each time goods are imported into or exported from Canada a document be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation of international trade statistics is determined and limited to some extent by Customs regulations and procedures. Where these affect the precise or consistent application of the statistical principles explained in the following section, their impact is described in qualitative terms only.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, for administrative reasons, be obtained from Customs documents. They are instead collected by the Manufacturing and Primary Industries Division of Statistics Canada, with important statistical consequences explained in Note 4 below.

Commencing with the May 1984 data export statistics for shipments of less than \$5,000 (up from \$2,500) and greater than \$800 (up from \$500) from Quebec, Ontario, Manitoba and British Columbia to the United States are estimated on the basis of a 20 per cent sample. The size of this sample is at present approximately 15,000 (up from 10,000) shipments per month. For further information, refer to the explanatory notes in the publication *Exports by Commodities* (cat. no. 65-004).

Effective January 1, 1982, the 10 per cent systematic sample of low valued import documents from the United States, as applied since January 1969 and revised in January 1975, has been discontinued. Starting with January 1984 data, all shipments exceeding \$800 are processed and compiled by complete count, while the value of shipments below \$800 is estimated. Prior to 1984 the low-value limit was \$500.

- B. **Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:** The most comprehensive set of principles for the compilation of trade statistics is to be found in *International Trade Statistics: Concepts and Definitions*, published by the United Nations Statistical Office (Series M, No. 52; New York, 1970). The following notes are both a summary of these principles and a description of the choices and exceptions made in the case of Canada's international trade statistics.

1. **System of Trade:** Canadian Statistics are tabulated according to the "general" system of trade. Thus *imports* include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. *Domestic exports* include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). *Re-exports* are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). *Total Exports* are the sum of *Domestic* and *Re-exports*.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic, tourist purchases and settlers' effects are excluded for practical

- A. **Sources des statistiques:** Les statistiques sur le commerce international du Canada sont totalisées à partir des copies des documents administratifs recueillis par Revenu Canada (Douanes) dans ses bureaux de douane par tout le Canada. La Loi sur les douanes exige que chaque fois que des marchandises sont importées au Canada ou exportées du pays, une déclaration soit faite précisant la nature des marchandises et donnant le détail de l'opération commerciale d'après les besoins de la réglementation de l'administration douanière. Il s'ensuit que la méthode de production de statistiques sur le commerce international est déterminée et limitée dans une certaine mesure par les règlements et les procédures des douanes. Lorsque ceux-ci nuisent à l'application précise ou uniforme des principes statistiques exposés dans la section suivante, leur incidence est décrite en termes qualitatifs seulement.

Les statistiques sur le commerce de l'énergie électrique et sur les exportations de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Elles sont plutôt recueillies par la Division des industries manufacturières et primaires de Statistique Canada; les conséquences importantes sur le plan statistique sont expliquées à la note 4 ci-dessous.

Commançant avec les données de mai 1984 les chiffres d'exportation portant sur les livraisons avec une valeur inférieure à \$5,000 (était \$2,500) et plus que \$800 (était \$500) en provenance du Québec, de l'Ontario, du Manitoba et de la Colombie-Britannique vers les États-Unis sont préparés d'après un échantillon de 20 pour cent. Cet échantillon comprend actuellement approximativement 15,000 (était 10,000) envois par mois. Pour plus de renseignements, voir les notes explicatives dans la publication *Exportations par marchandises* (no. 65-004 au cat.).

À partir du 1<sup>er</sup> janvier 1982, l'échantillonnage systématique de 10 p. 100 du montant des marchandises de faible valeur importés des États-Unis, tel qu'appliqué depuis janvier 1969 et révisé en janvier 1975, a été discontinué. Commencant avec les données de janvier 1984, pour toutes les livraisons dont la valeur excède \$800, le traitement et le calcul sont exhaustifs, alors que la valeur des livraisons inférieures à \$800 est estimée. Avant l'année d'enquête 1984, la limite de faible valeur était \$500.

- B. **Concepts et définitions utilisés dans la production de statistiques sur le commerce international du Canada** L'ensemble le plus complet de principes directeurs pour la préparation de ces statistiques est présenté dans *Statistiques du commerce international: concepts et définitions*, publié par le Bureau de statistique des Nations Unies (série M, no 52, New York, 1970). Les notes suivantes résument ces principes et décrivent les choix et les exceptions dans le cas de la statistique du commerce international du Canada.

1. **Système commercial:** Les statistiques canadiennes sont totalisées selon le système commercial "général". Ainsi, les *importations* comprennent tous les biens qui ont franchi les limites géographiques du Canada, qu'ils soient passés par les douanes pour être consommés immédiatement au Canada ou qu'ils aient été entreposés en douane. Les *exportations nationales* comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les *réexportations* sont des exportations de biens d'origine étrangère qui n'ont pas été transformés matériellement au Canada (y compris les biens retirés des entrepôts de douane en vue de leur exportation). Les *exportations totales* correspondent au total des *exportations nationales* et *réexportations*.

La statistique du commerce ne prend pas en compte les exportations vers des missions diplomatiques ou militaires canadiennes à l'étranger ni les importations attribuables à des missions étrangères semblables au Canada, car on considère que ces missions ne se trouvent pas hors des limites géographiques du pays qui les a envoyées. Les achats ou les ventes d'approvisionnement de navires ou d'aéronefs affectés au transport international, les achats des

reasons. Goods which cross the Canadian border for convenience of transportation only are not included in trade statistics.

2. **Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments or receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks and bonds are also excluded from the trade statistics.
3. **Valuation:** *Exports* are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g. mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

*Imports* are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

4. **Timing:** Until July 1979, statistics for a month included all shipments for which Custom documents were received at Statistics Canada up to, and including, the last working day of the month. Starting with data for August 1979, the closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. Individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents. Trade in electricity; exports of both crude petroleum and natural gas; and imports of "Swap Oil" from the United States for a given month are included in statistics for the following month because they are collected too late for inclusion in statistics for the current month. However, starting with the January 1984 data, exports of electricity, crude petroleum, and natural gas are subsequently shifted back one month, thus reflecting the true statistical month.
5. **Trading Partner Attribution:** The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and therefore does not reflect the views or intentions of the government of Canada on international issues of recognition, sovereignty or jurisdiction.

*Exports* are attributed to the country which is the last known destination of the goods at the time of export. (Many primary

touristes et les effets des immigrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont laissés hors compte.

2. **Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui seront renvoyés dans le pays exportateur après un court laps de temps sont exclus de la statistique du commerce (lorsque cette intention se dégage des documents de douane). Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en vue d'une course, les films exportés pour être développés, puis retournés. Les biens exportés ou importés pour fins de réparation seulement ne sont pas pris en compte, bien que les paiements ou les recettes au titre des réparations soient portés dans la statistique du commerce. Des avoirs financiers comme le numéraire non périmé, les actions et les obligations sont également laissés hors compte.
3. **Évaluation:** Les *exportations* sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.

Les *importations* sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois, les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane.) Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de livraison et leur prix englobe par conséquent les frais de transport.

4. **Période:** Jusqu'à juillet 1979, les statistiques d'un mois donné visaient toutes les livraisons pour lesquelles Statistique Canada avait reçu des documents de douane jusqu'au dernier jour ouvrable du mois. À partir du mois d'août 1979, la fin du mois statistique correspond au dernier jour du mois civil où s'effectue, dans la mesure du possible, le dédouanement. De diverses livraisons peuvent ne pas être prises en compte dès leur arrivée ou leur départ à cause de la procédure administrative qui donne lieu à une présentation tardive des documents. Le commerce d'énergie électrique; les exportations de pétrole brut et de gaz naturel; et les importations selon l'arrangement avec les États-Unis pour des échanges de pétrole brut d'un mois donné sont présentés dans les statistiques du mois suivant parce qu'on obtient les données trop tard pour qu'elles puissent faire partie des statistiques du mois courant. Cependant, à compter des données de janvier 1984, les exportations d'électricité, de pétrole brut et de gaz naturel sont décalées d'un mois par la suite, de sorte qu'elles correspondent au mois statistique véritable.
5. **Attribution des partenaires commerciaux:** La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue aux fins de la géographie économique et ne reflète donc pas l'opinion du Gouvernement du Canada relativement aux questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Les *exportations* sont attribuées au pays de dernière destination connue au moment de l'exportation. (De nombreux produits "pri-

products are shipped to entrepôt points, particularly in Europe, for re-exports to the ultimate destination which is unknown when the goods leave Canada.)

*Imports* are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country.

#### 6. Revisions:

- a. **Data for Current Month:** Statistics for the current month published in the "Preliminary Statement of Canadian International Trade" and in the "Summary of Canadian International Trade" (65-001) contain preliminary figures. However, figures for the current month published in "Imports by Commodities" (65-007), "Exports by Commodities" (65-004), "Imports by Countries" (65-006) and "Exports by Countries" (65-003) have been verified for reporting or processing errors.
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the monthly reports for December have been published. In the case of the "Summary of Canadian International Trade" (65-001), the revised December figures appear in the January issue of the following year. Commodity/Country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the reports 65-007 and 65-004.
- c. **Data for the previous year:** Revisions to the previous year appear in the December issue of the following year. Commodity/Country figures revised at that time are shown at the beginning of the reports 65-007 and 65-004. *When statistical series are adjusted for seasonal variations, the revised figures are reflected in the April issue of the "Summary of Canadian International Trade" (65-001).*

**Note:** Cumulative totals in all reports reflect the revisions applied up to the date of printing.

7. **Indexes of Price and Volume:** The price indexes in this publication are current-weighted and are calculated from price relatives based on 1971 = 100. The weights are trade quantities for the month, quarter or year to which the index refers and hence change from period to period. The volume index is derived by dividing a value index by the corresponding current-weighted price index. The resulting volume index is, therefore, weighted with fixed 1971 price weights. The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign statistics.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled "The 1971-based Price and Volume Indexes of Canada's External Trade", published in December 1976 as a supplement to this publication (65-001).

Each year revised indexes for the previous years are generally published in the February, March and April issues of this publication. Historical indexes were published for 1968-1974 in the June, July and August 1977 issues and for 1975 in the July, August and September 1978 issues. Most of these indexes (on a Customs Basis) are available on CANSIM in matrices 3680, 3681, 3682, 3715, 3716, and 3717.

The price and volume indexes presented in Part I are on a Balance of Payments Basis and are also available on CANSIM in matrices 3643, 3644, 3649, 3650, 3683 and 3684.

maires" sont expédiés vers des points d'entreposage, notamment en Europe, en vue de leur réexportation; la destination ultime de ces produits est inconnue lors qu'ils quittent le Canada.)

Les *importations* sont attribuées au pays de première consignation directe des biens au Canada, que ce soit ou non le pays d'origine. On déroge à cette règle dans le cas des biens ayant comme région d'origine l'Amérique centrale ou l'Amérique du sud et expédiés au Canada depuis les États-Unis; ces importations sont portées au crédit du pays d'origine, sauf pour les échanges de pétrole brut avec les États-Unis qui sont crédités à ce pays.

#### 6. Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant figurant dans le communiqué "Préliminaire sur le commerce international du Canada" et le "Sommaire du commerce international du Canada" (65-001) contiennent des chiffres préliminaires. Cependant, les chiffres du mois courant dans "Importations par marchandises" (65-007), "Exportations par marchandises" (65-004), "Importations par pays" (65-006) et "Exportations par pays" (65-003) ont été vérifiés pour des erreurs de déclaration et de traitement.
- b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications mensuelles de décembre. Dans le cas de "Sommaire du commerce international du Canada" (65-001), les chiffres de décembre rectifiés paraîtront dans l'édition de janvier de l'année suivante. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/-pays figurent dans les rapports mensuels au commencement des publications 65-007 et 65-004.
- c. **Données de l'année précédente:** Les rectifications à l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise/pays rectifiés à ce moment-là figurent au commencement des publications 65-007 et 65-004. *Quand les séries statistiques sont désaisonnalisées, les chiffres rectifiés sont pris en compte dans l'édition d'avril de "Sommaire du commerce international du Canada" (65-001).*

**Note:** Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

7. **Indices de prix et de volume:** Les indices de prix compris dans cette publication sont pondérés d'après les quantités mensuelles, trimestrielles ou annuelles du commerce correspondantes à la période de l'indice et sont calculés d'après des prix relatifs de base 1971 = 100. Par conséquence ces pondérations sont variables d'une période à l'autre. Les indices du volume sont calculés en divisant l'indice de la valeur par l'indice du prix correspondant. L'indice du volume obtenu est donc implicitement pondéré par les prix fixes de l'année 1971. Les prix relatifs sont dérivés ou des valeurs unitaires calculés directement des statistiques du commerce extérieur ou surtout pour les produits finis, des indices de prix obtenus d'autres sources canadiennes ou de l'étranger.

Des renseignements concernant la méthodologie employée dans le calcul des indices sont données dans un document de référence intitulé "Les indices de prix et de volume de base 1971 du commerce extérieur du Canada" publié en décembre 1976 sous forme de supplément à la présente publication (65-001).

Une fois l'an, on publie les indices révisés des années précédentes, généralement dans les numéros de février, mars et avril de cette publication. Les indices historiques pour les années 1968 à 1974 ont paru dans les numéros de juin, juillet et août 1977, et celles pour 1975, dans les numéros de juillet, août et septembre 1978. La plupart des indices (sur la base douanière) sont offerts sur CANSIM, dans les matrices 3680, 3681, 3682, 3715, 3716 et 3717.

Les indices de prix et de volume présentés dans la partie I de cette publication sont sur la base de la balance des paiements et sont aussi disponibles sur CANSIM, dans les matrices 3643, 3644, 3649, 3650, 3683 et 3684.

8. **Provincial Detail:** Prior to the 1984 data year, *exports* statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain case this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Commencing with 1984 data, Statistics Canada and Customs & Excise, Revenue Canada have taken measures requiring the reporting of export shipments on a province of origin basis. It is recognized that the exporting community will be unable to effect the new provincial definition on a given date; therefore the 1984 statistics will reflect a period of transition.

*Import* statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed or enter the productive process.

9. **Principal trading areas:** The "principal trading areas" shown in some tables include groupings which are defined as follows:

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands and Greece (effective January 1981). The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada.

**Other O.E.C.D.:** Austria, Finland, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of the O.E.C.D. — The Organization for Economic Cooperation and Development).

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

10. **Sources of Further Information:** More detailed monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time. For example, *The Reconciliation of U.S.-Canada Trade Statistics*, published by the United States - Canada Trade Statistics Committee, is available on request from the address given below.

Trade statistics are also available on the CANSIM Main Base in the following matrices: 0021, 0022, 0876 to 0879, 3643, 3644, 3649 to 3719.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

8. **Statistiques provinciales:** Avant l'année d'enquête 1984, les statistiques sur les *exportations* par province de chargement indiquaient la province où les produits avaient été chargés initialement pour être exportés. Dans certains cas, il ne s'agissait pas de la province d'origine qui se définit comme étant la province où les produits ont été cultivés, extraits ou fabriqués.

À partir de l'année d'enquête 1984, Statistique Canada et Revenu Canada-Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées par province d'origine. Il est certain que les exportateurs ne pourront appliquer la nouvelle définition provinciale à une date précise, aussi faut-il prévoir une période de transition qui aura une incidence sur les statistiques de 1984.

Les statistiques des *importations* par province de dédouanement présentent la province où les biens ont passé la douane en vue d'une consommation immédiate ou de leur entreposage en douane; cette province peut différer de la province de consommation ou d'entrée dans l'activité productive.

9. **Marchés principaux:** Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:

**Autres C.E.E.:** Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas et Grèce (à partir de janvier 1981). Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada.

**Autres O.C.D.E.:** Autriche, Espagne, Finlande, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. — l'Organisation pour la coopération et le développement économique).

**Autres Amérique:** Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

10. **Sources de renseignements supplémentaires:** Des statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également se procurer des descriptions détaillées et des index des classifications de marchandises. Veuillez consulter le catalogue des publications de Statistique Canada pour une description du contenu des diverses publications. La recherche continue dans le domaine de la statistique du commerce donne naissance de temps à autre à de nouveaux documents de référence. Ainsi, on peut obtenir à l'adresse mentionnée ci-dessous un document sur le rapprochement des statistiques du commerce États-Unis-Canada publié par le comité de la statistique du commerce États-Unis-Canada.

Les statistiques sur le commerce sont également offertes sur la base principale de CANSIM dans les matrices suivantes: 0021, 0022, 0876 à 0879, 3643, 3644, 3649 à 3719.

Toute question au sujet des méthodes employées doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa, Ontario K1A 0T6.

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## MERCHANDISE TRADE (BALANCE OF PAYMENTS BASIS)

The statistics presented in Part I (Analytical Charts and Tables) are adjusted to conform with the National Accounts concepts and definitions. Balance of Payments adjustments to Customs Basis data are incorporated at an aggregated level in order to make them compatible with the system of National Accounts.

### BALANCE OF PAYMENTS ADJUSTMENTS

#### Coverage or Valuation

- *Automotive Products:* Deductions are made for both exports of cars and trucks and imports of automotive parts for retroactive value adjustments and for special tooling and other charges.
- *Gold:* Adjustments are made to customs basis trade data when there is no change in ownership and additional adjustments are made for transactions between Canadians and non-residents for gold which remains in Canada.
- *Other adjustments* include United States/Canada Trade reconciliation, advertising, official valuation, freight and other adjustments.

#### Timing

- *Grains:* The Canadian Grain Commission's records of grain clearances from exporting warehouses during the full calendar month are used to adjust Trade of Canada series for grain exports. The volume of clearances obtained from this source are combined with unit values from customs-based series to derive hybrid estimates which are substituted for original customs series.
- *Energy:* Trade in electricity; exports of crude petroleum and natural gas, and imports of "swap oil" from the United States, are adjusted to account for the one month reporting lag. Starting with January 1984 data, the adjustments apply only to the current month for exports of electricity, crude petroleum and natural gas, as customs based data are shifted back one month, thus reflecting the true statistical month.
- *Ships, Civil Aircraft and Military Equipment:* The adjustment substitutes progress payments in connection with the construction of ships, civil aircraft and some military equipment, in place of the actual deliveries of the equipment recorded in the Trade of Canada series.

For detailed description of sources and methods please refer to Cat. 67506E Occasional "The Canadian Balance of International Payments and International Investment Position".

#### Geographic Classification

On a balance of payments basis, trade with the United States includes trade with Puerto Rico and the Virgin Islands.

### SEASONAL ADJUSTMENT

Total exports (domestic exports and re-exports) and imports on a seasonally adjusted basis are now calculated indirectly as the sum of approximately sixty commodity aggregates. Where stable seasonality

## COMMERCE DES MARCHANDISES (BASE DE LA BALANCE DES PAIEMENTS)

Les statistiques présentées à la partie I (graphiques et tableaux analytiques) seront ajustées conformément aux concepts et aux définitions des comptes nationaux. Les corrections apportées aux chiffres douaniers aux fins de la balance des paiements sont intégrées au niveau des groupes pour rendre ces données compatibles avec celles du système des comptes nationaux.

### CORRECTIONS EN FONCTION DE LA BALANCE DES PAIEMENTS

#### Champ d'observation ou évaluation

- *Produits automobiles:* On effectue dans le cas des exportations d'automobiles et de camions et des importations de pièces de véhicules automobiles, une déduction ayant pour objet de corriger rétroactivement la valeur et de tenir compte des frais d'outillage spéciaux et autres.
- *Or:* On corrige les données douanières du commerce quand il n'y a pas de changement de propriété et on effectue des corrections supplémentaires pour les transactions au Canada entre les canadiens et les étrangers.
- *Les autres corrections* comprennent le rapprochement du commerce entre les États-Unis et le Canada, la publicité, l'évaluation officielle, les frais de transport et autres.

#### Période

- *Céréales:* Les données des exportations de grains tirées des séries du Commerce du Canada sont ajustées en fonction des chiffres que renferment les dossiers des expéditions de grains des entrepôts d'exportation établis par la Commission canadienne des grains pour un mois civil donné. Le volume des expéditions obtenu de cette source est combiné aux chiffres obtenus des séries douanières pour produire des estimations mixtes qui remplacent les séries douanières initiales.
- *Énergie:* Le commerce de l'électricité, les exportations de pétrole brut et de gaz naturel et les importations de pétrole d'échange des États-Unis, sont ajustés pour tenir compte du délai de déclaration d'un mois. À compter des données de janvier 1984, les corrections ne s'appliqueront qu'au mois courant dans le cas des exportations d'électricité, de pétrole brut et de gaz naturel, étant donné que les chiffres douaniers sont décalés d'un mois, de sorte qu'ils correspondent au mois statistique véritable.
- *Navires, avions civils et matériel militaire:* Les ajustements remplacent les chiffres des livraisons réelles de matériel compris dans les séries du Commerce du Canada par les paiements échelonnés effectués relativement à la construction de navires, d'avions civils et de certains articles de matériel militaire.

Pour obtenir une description détaillée des sources et des méthodes, se référer à la publication 67-506F au catalogue, (hors série) *La balance des paiements et le bilan des investissements internationaux du Canada*.

#### Classification géographique

Sur la base de la balance des paiements, le commerce avec les États-Unis englobe le commerce avec Porto Rico et les îles Vierges.

### DÉSAISONNALISATION

Le total des exportations (exportations nationales et réexportations) et les importations désaisonnalisées sont maintenant calculés indirectement, étant constitués de la somme d'environ soixante groupes de produits.

cannot be reliably identified, the series is not seasonally adjusted. Therefore, seasonally adjusted total exports and imports represent a combination of raw and seasonally adjusted data. Previously the total was seasonally adjusted from raw data at the total level.

## PRICE INDEXES

### Timing

From 1971 to 1983, the export price indexes for electricity, natural gas and crude petroleum on a customs basis which were lagged one month have been adjusted to represent the true calendar month. Similarly, the import price index for crude petroleum from the United States on a customs basis has been adjusted and recombined with the "other country" import price index in order to arrive at an "All country" import price index. From January 1984, onward, the one month lag is now corrected on a customs basis.

### Aggregate Levels

Indexes at an aggregate level (section and total levels) are calculated by using value weights on a balance of payments basis with price indexes derived from customs data.

## DATA AVAILABILITY

Data on a balance of payments basis are available on CANSIM.

Lorsqu'il est impossible de déceler une variation saisonnière régulière, les séries ne sont pas désaisonnalisées. Par conséquent, le total désaisonné des exportations et des importations est constitué d'une combinaison de données brutes et de données désaisonnalisées. Auparavant, le total était désaisonné à partir des totaux bruts.

## INDICES DE PRIX

### Période

Les indices des prix à l'exportation, exprimés en chiffres douaniers, de l'électricité, du gaz naturel et du pétrole brut pour 1971 à 1983, qui étaient décalés d'un mois, ont été corrigés et correspondent actuellement au mois civil réel. De même, l'indice des prix à l'importation du pétrole brut des États-Unis, exprimé en chiffres douaniers, a été corrigé et combiné à l'indice des prix à l'importation des "Autres pays" de façon à produire un indice des prix à l'importation pour "Tous les pays". Le décalage d'un mois est corrigé dans les chiffres douaniers depuis janvier 1984.

### Niveau agrégé

Les indices agrégés (section et total) sont calculés à l'aide de poids fonctions de la valeur, sur la base de la balance des paiements, à partir d'indices de prix obtenus des données douanières.

## DISPONIBILITÉ DES DONNÉES

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

(1) La tendance à court terme donne une meilleure idée de la direction et du taux de variation des échanges commerciaux en mettant en moyenne les appréciables fluctuations mensuelles qui se produisent fréquemment dans ces derniers. La tendance pour le dernier mois n'est pas reportée sur les diagrammes ci-dessus parce qu'elle change fréquemment de façon appréciable avec l'inclusion des données des mois suivants.

- A. **Sources of Statistics:** Canada's international trade statistics are tabulated from copies of administrative documents collected by Revenue Canada, Customs at its ports across Canada. The Customs Act requires that each time goods are imported into or exported from Canada a document be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation of international trade statistics is determined and limited to some extent by Customs regulations and procedures. Where these affect the precise or consistent application of the statistical principles explained in the following section, their impact is described in qualitative terms only.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, for administrative reasons, be obtained from Customs documents. They are instead collected by the Manufacturing and Primary Industries Division of Statistics Canada, with important statistical consequences explained in Note 4 below.

Commencing with the May 1984 data export statistics for shipments of less than \$5,000 (up from \$2,500) and greater than \$800 (up from \$500) from Quebec, Ontario, Manitoba and British Columbia to the United States are estimated on the basis of a 20 per cent sample. The size of this sample is at present approximately 15,000 (up from 10,000) shipments per month. For further information, refer to the explanatory notes in the publication *Exports by Commodities* (cat. no. 65-004).

Effective January 1, 1982, the 10 per cent systematic sample of low valued import documents from the United States, as applied since January 1969 and revised in January 1975, has been discontinued. Starting with January 1984 data, all shipments exceeding \$800 are processed and compiled by complete count, while the value of shipments below \$800 is estimated. Prior to 1984 the low-value limit was \$500.

- B. **Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:** The most comprehensive set of principles for the compilation of trade statistics is to be found in *International Trade Statistics: Concepts and Definitions*, published by the United Nations Statistical Office (Series M, No. 52; New York, 1970). The following notes are both a summary of these principles and a description of the choices and exceptions made in the case of Canada's international trade statistics.

1. **System of Trade:** Canadian Statistics are tabulated according to the "general" system of trade. Thus *imports* include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. *Domestic exports* include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). *Re-exports* are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). *Total Exports* are the sum of *Domestic* and *Re-exports*.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic, tourist purchases and settlers' effects are excluded for practical

- A. **Sources des statistiques:** Les statistiques sur le commerce international du Canada sont totalisées à partir des copies des documents administratifs recueillis par Revenu Canada (Douanes) dans ses bureaux de douane par tout le Canada. La Loi sur les douanes exige que chaque fois que des marchandises sont importées au Canada ou exportées du pays, une déclaration soit faite précisant la nature des marchandises et donnant le détail de l'opération commerciale d'après les besoins de la réglementation de l'administration douanière. Il s'ensuit que la méthode de production de statistiques sur le commerce international est déterminée et limitée dans une certaine mesure par les règlements et les procédures des douanes. Lorsque ceux-ci nuisent à l'application précise ou uniforme des principes statistiques exposés dans la section suivante, leur incidence est décrite en termes qualitatifs seulement.

Les statistiques sur le commerce de l'énergie électrique et sur les exportations de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Elles sont plutôt recueillies par la Division des industries manufacturières et primaires de Statistique Canada; les conséquences importantes sur le plan statistique sont expliquées à la note 4 ci-dessous.

Commencant avec les données de mai 1984 les chiffres d'exportation portant sur les livraisons avec une valeur inférieure à \$5,000 (était \$2,500) et plus que \$800 (était \$500) en provenance du Québec, de l'Ontario, du Manitoba et de la Colombie-Britannique vers les États-Unis sont préparés d'après un échantillon de 20 pour cent. Cet échantillon comprend actuellement approximativement 15,000 (était 10,000) envois par mois. Pour plus de renseignements, voir les notes explicatives dans la publication *Exportations par marchandises* (no. 65-004 au cat.).

À partir du 1<sup>er</sup> janvier 1982, l'échantillonnage systématique de 10 p. 100 du montant des marchandises de faible valeur importés des États-Unis, tel qu'appliqué depuis janvier 1969 et révisé en janvier 1975, a été discontinué. Commencant avec les données de janvier 1984, pour toutes les livraisons dont la valeur excède \$800, le traitement et le calcul sont exhaustifs, alors que la valeur des livraisons inférieures à \$800 est estimée. Avant l'année d'enquête 1984, la limite de faible valeur était \$500.

- B. **Concepts et définitions utilisés dans la production de statistiques sur le commerce international du Canada** L'ensemble le plus complet de principes directeurs pour la préparation de ces statistiques est présenté dans *Statistiques du commerce international: concepts et définitions*, publié par le Bureau de statistique des Nations Unies (série M, no 52, New York, 1970). Les notes suivantes résument ces principes et décrivent les choix et les exceptions dans le cas de la statistique du commerce international du Canada.

1. **Système commercial:** Les statistiques canadiennes sont totalisées selon le système commercial "général". Ainsi, les *importations* comprennent tous les biens qui ont franchi les limites géographiques du Canada, qu'ils soient passés par les douanes pour être consommés immédiatement au Canada ou qu'ils aient été entreposés en douane. Les *exportations nationales* comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les *réexportations* sont des exportations de biens d'origine étrangère qui n'ont pas été transformés matériellement au Canada (y compris les biens retirés des entrepôts de douane en vue de leur exportation). Les *exportations totales* correspondent au total des *exportations nationales* et *réexportations*.

La statistique du commerce ne prend pas en compte les exportations vers des missions diplomatiques ou militaires canadiennes à l'étranger ni les importations attribuables à des missions étrangères semblables au Canada, car on considère que ces missions ne se trouvent pas hors des limites géographiques du pays qui les a envoyées. Les achats ou les ventes d'approvisionnement de navires ou d'aéronefs affectés au transport international, les achats des

reasons. Goods which cross the Canadian border for convenience of transportation only are not included in trade statistics.

2. **Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments or receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks and bonds are also excluded from the trade statistics.
3. **Valuation:** *Exports* are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g. mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

*Imports* are generally recorded at the values established for Customs duty purposes, according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

4. **Timing:** Until July 1979, statistics for a month included all shipments for which Custom documents were received at Statistics Canada up to, and including, the last working day of the month. Starting with data for August 1979, the closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. Individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents. Trade in electricity; exports of both crude petroleum and natural gas; and imports of "Swap Oil" from the United States for a given month are included in statistics for the following month because they are collected too late for inclusion in statistics for the current month. However, starting with the January 1984 data, exports of electricity, crude petroleum, and natural gas are subsequently shifted back one month, thus reflecting the true statistical month.
5. **Trading Partner Attribution:** The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and therefore does not reflect the views or intentions of the government of Canada on international issues of recognition, sovereignty or jurisdiction.

*Exports* are attributed to the country which is the last known destination of the goods at the time of export. (Many primary

touristes et les effets des immigrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont laissés hors compte.

2. **Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui seront renvoyés dans le pays exportateur après un court laps de temps sont exclus de la statistique du commerce (lorsque cette intention se dégage des documents de douane). Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en vue d'une course, les films exportés pour être développés, puis retournés. Les biens exportés ou importés pour fins de réparation seulement ne sont pas pris en compte, bien que les paiements ou les recettes au titre des réparations soient portés dans la statistique du commerce. Des avoirs financiers comme le numéraire non périmé, les actions et les obligations sont également laissés hors compte.
3. **Évaluation:** Les *exportations* sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.

Les *importations* sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois, les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane.) Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de livraison et leur prix englobe par conséquent les frais de transport.

4. **Période:** Jusqu'à juillet 1979, les statistiques d'un mois donné visaient toutes les livraisons pour lesquelles Statistique Canada avait reçu des documents de douane jusqu'au dernier jour ouvrable du mois. À partir du mois d'août 1979, la fin du mois statistique correspond au dernier jour du mois civil où s'effectue, dans la mesure du possible, le dédouanement. De diverses livraisons peuvent ne pas être prises en compte dès leur arrivée ou leur départ à cause de la procédure administrative qui donne lieu à une présentation tardive des documents. Le commerce d'énergie électrique; les exportations de pétrole brut et de gaz naturel; et les importations selon l'arrangement avec les États-Unis pour des échanges de pétrole brut d'un mois donné sont présentés dans les statistiques du mois suivant parce qu'on obtient les données trop tard pour qu'elles puissent faire partie des statistiques du mois courant. Cependant, à compter des données de janvier 1984, les exportations d'électricité, de pétrole brut et de gaz naturel sont décalées d'un mois par la suite, de sorte qu'elles correspondent au mois statistique véritable.
5. **Attribution des partenaires commerciaux:** La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue aux fins de la géographie économique et ne reflète donc pas l'opinion du Gouvernement du Canada relativement aux questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Les *exportations* sont attribuées au pays de dernière destination connue au moment de l'exportation. (De nombreux produits "pri-

products are shipped to entrepôt points, particularly in Europe, for re-exports to the ultimate destination which is unknown when the goods leave Canada.)

*Imports* are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country.

#### 6. Revisions:

- a. **Data for Current Month:** Statistics for the current month published in the "Preliminary Statement of Canadian International Trade" and in the "Summary of Canadian International Trade" (65-001) contain preliminary figures. However, figures for the current month published in "Imports by Commodities" (65-007), "Exports by Commodities" (65-004), "Imports by Countries" (65-006) and "Exports by Countries" (65-003) have been verified for reporting or processing errors.
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the monthly reports for December have been published. In the case of the "Summary of Canadian International Trade" (65-001), the revised December figures appear in the January issue of the following year. Commodity/Country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the reports 65-007 and 65-004.
- c. **Data for the previous year:** Revisions to the previous year appear in the December issue of the following year. Commodity/Country figures revised at that time are shown at the beginning of the reports 65-007 and 65-004. *When statistical series are adjusted for seasonal variations, the revised figures are reflected in the April issue of the "Summary of Canadian International Trade" (65-001).*

**Note:** Cumulative totals in all reports reflect the revisions applied up to the date of printing.

7. **Indexes of Price and Volume:** The price indexes in this publication are current-weighted and are calculated from price relatives based on 1971 = 100. The weights are trade quantities for the month, quarter or year to which the index refers and hence change from period to period. The volume index is derived by dividing a value index by the corresponding current-weighted price index. The resulting volume index is, therefore, weighted with fixed 1971 price weights. The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign statistics.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled "The 1971-based Price and Volume Indexes of Canada's External Trade", published in December 1976 as a supplement to this publication (65-001).

Each year revised indexes for the previous years are generally published in the February, March and April issues of this publication. Historical indexes were published for 1968-1974 in the June, July and August 1977 issues and for 1975 in the July, August and September 1978 issues. Most of these indexes (on a Customs Basis) are available on CANSIM in matrices 3680, 3681, 3682, 3715, 3716, and 3717.

The price and volume indexes presented in Part I are on a Balance of Payments Basis and are also available on CANSIM in matrices 3643, 3644, 3649, 3650, 3683 and 3684.

maires" sont expédiés vers des points d'entreposage, notamment en Europe, en vue de leur réexportation; la destination ultime de ces produits est inconnue lors qu'ils quittent le Canada.)

Les *importations* sont attribuées au pays de première consignation directe des biens au Canada, que ce soit ou non le pays d'origine. On déroge à cette règle dans le cas des biens ayant comme région d'origine l'Amérique centrale ou l'Amérique du sud et expédiés au Canada depuis les États-Unis; ces importations sont portées au crédit du pays d'origine, sauf pour les échanges de pétrole brut avec les États-Unis qui sont crédités à ce pays.

#### 6. Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant figurant dans le communiqué "Préliminaire sur le commerce international du Canada" et le "Sommaire du commerce international du Canada" (65-001) contiennent des chiffres préliminaires. Cependant, les chiffres du mois courant dans "Importations par marchandises" (65-007), "Exportations par marchandises" (65-004), "Importations par pays" (65-006) et "Exportations par pays" (65-003) ont été vérifiés pour des erreurs de déclaration et de traitement.
- b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications mensuelles de décembre. Dans le cas de "Sommaire du commerce international du Canada" (65-001), les chiffres de décembre rectifiés paraîtront dans l'édition de janvier de l'année suivante. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/-pays figurent dans les rapports mensuels au commencement des publications 65-007 et 65-004.
- c. **Données de l'année précédente:** Les rectifications à l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise/pays rectifiés à ce moment-là figurent au commencement des publications 65-007 et 65-004. *Quand les séries statistiques sont désaisonnalisées, les chiffres rectifiés sont pris en compte dans l'édition d'avril de "Sommaire du commerce international du Canada" (65-001).*

**Note:** Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

7. **Indices de prix et de volume:** Les indices de prix compris dans cette publication sont pondérés d'après les quantités mensuelles, trimestrielles ou annuelles du commerce correspondantes à la période de l'indice et sont calculés d'après des prix relatifs de base 1971 = 100. Par conséquence ces pondérations sont variables d'une période à l'autre. Les indices du volume sont calculés en divisant l'indice de la valeur par l'indice du prix correspondant. L'indice du volume obtenu est donc implicitement pondéré par les prix fixes de l'année 1971. Les prix relatifs sont dérivés ou des valeurs unitaires calculés directement des statistiques du commerce extérieur ou surtout pour les produits finis, des indices de prix obtenus d'autres sources canadiennes ou de l'étranger.

Des renseignements concernant la méthodologie employée dans le calcul des indices sont données dans un document de référence intitulé "Les indices de prix et de volume de base 1971 du commerce extérieur du Canada" publié en décembre 1976 sous forme de supplément à la présente publication (65-001).

Une fois l'an, on publie les indices révisés des années précédentes, généralement dans les numéros de février, mars et avril de cette publication. Les indices historiques pour les années 1968 à 1974 ont paru dans les numéros de juin, juillet et août 1977, et celles pour 1975, dans les numéros de juillet, août et septembre 1978. La plupart des indices (sur la base douanière) sont offerts sur CANSIM, dans les matrices 3680, 3681, 3682, 3715, 3716 et 3717.

Les indices de prix et de volume présentés dans la partie I de cette publication sont sur la base de la balance des paiements et sont aussi disponibles sur CANSIM, dans les matrices 3643, 3644, 3649, 3650, 3683 et 3684.

8. **Provincial Detail:** Prior to the 1984 data year, *exports* statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain case this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Commencing with 1984 data, Statistics Canada and Customs & Excise, Revenue Canada have taken measures requiring the reporting of export shipments on a province of origin basis. It is recognized that the exporting community will be unable to effect the new provincial definition on a given date; therefore the 1984 statistics will reflect a period of transition.

*Import* statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed or enter the productive process.

9. **Principal trading areas:** The "principal trading areas" shown in some tables include groupings which are defined as follows:

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands and Greece (effective January 1981). The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada.

**Other O.E.C.D.:** Austria, Finland, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of the O.E.C.D. — The Organization for Economic Cooperation and Development).

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

10. **Sources of Further Information:** More detailed monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time. For example, *The Reconciliation of U.S.-Canada Trade Statistics*, published by the United States - Canada Trade Statistics Committee, is available on request from the address given below.

Trade statistics are also available on the CANSIM Main Base in the following matrices: 0021, 0022, 0876 to 0879, 3643, 3644, 3649 to 3719.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

8. **Statistiques provinciales:** Avant l'année d'enquête 1984, les statistiques sur les *exportations* par province de chargement indiquaient la province où les produits avaient été chargés initialement pour être exportés. Dans certains cas, il ne s'agissait pas de la province d'origine qui se définit comme étant la province où les produits ont été cultivés, extraits ou fabriqués.

À partir de l'année d'enquête 1984, Statistique Canada et Revenu Canada-Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées par province d'origine. Il est certain que les exportateurs ne pourront appliquer la nouvelle définition provinciale à une date précise, aussi faut-il prévoir une période de transition qui aura une incidence sur les statistiques de 1984.

Les statistiques des *importations* par province de dédouanement présentent la province où les biens ont passé la douane en vue d'une consommation immédiate ou de leur entreposage en douane; cette province peut différer de la province de consommation ou d'entrée dans l'activité productive.

9. **Marchés principaux:** Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:

**Autres C.E.E.:** Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas et Grèce (à partir de janvier 1981). Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada.

**Autres O.C.D.E.:** Autriche, Espagne, Finlande, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. — l'Organisation pour la coopération et le développement économique).

**Autres Amérique:** Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

10. **Sources de renseignements supplémentaires:** Des statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également se procurer des descriptions détaillées et des index des classifications de marchandises. Veuillez consulter le catalogue des publications de Statistique Canada pour une description du contenu des diverses publications. La recherche continue dans le domaine de la statistique du commerce donne naissance de temps à autre à de nouveaux documents de référence. Ainsi, on peut obtenir à l'adresse mentionnée ci-dessous un document sur le rapprochement des statistiques du commerce États-Unis-Canada publié par le comité de la statistique du commerce États-Unis-Canada.

Les statistiques sur le commerce sont également offertes sur la base principale de CANSIM dans les matrices suivantes: 0021, 0022, 0876 à 0879, 3643, 3644, 3649 à 3719.

Toute question au sujet des méthodes employées doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa, Ontario K1A 0T6.

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## MERCHANDISE TRADE (BALANCE OF PAYMENTS BASIS)

The statistics presented in Part I (Analytical Charts and Tables) are adjusted to conform with the National Accounts concepts and definitions. Balance of Payments adjustments to Customs Basis data are incorporated at an aggregated level in order to make them compatible with the system of National Accounts.

### BALANCE OF PAYMENTS ADJUSTMENTS

#### Coverage or Valuation

- *Automotive Products:* Deductions are made for both exports of cars and trucks and imports of automotive parts for retroactive value adjustments and for special tooling and other charges.
- *Gold:* Adjustments are made to customs basis trade data when there is no change in ownership and additional adjustments are made for transactions between Canadians and non-residents for gold which remains in Canada.
- *Other adjustments* include United States/Canada Trade reconciliation, advertising, official valuation, freight and other adjustments.

#### Timing

- *Grains:* The Canadian Grain Commission's records of grain clearances from exporting warehouses during the full calendar month are used to adjust Trade of Canada series for grain exports. The volume of clearances obtained from this source are combined with unit values from customs-based series to derive hybrid estimates which are substituted for original customs series.
- *Energy:* Trade in electricity; exports of crude petroleum and natural gas, and imports of "swap oil" from the United States, are adjusted to account for the one month reporting lag. Starting with January 1984 data, the adjustments apply only to the current month for exports of electricity, crude petroleum and natural gas, as customs based data are shifted back one month, thus reflecting the true statistical month.
- *Ships, Civil Aircraft and Military Equipment:* The adjustment substitutes progress payments in connection with the construction of ships, civil aircraft and some military equipment, in place of the actual deliveries of the equipment recorded in the Trade of Canada series.

For detailed description of sources and methods please refer to Cat. 67506E Occasional "The Canadian Balance of International Payments and International Investment Position".

#### Geographic Classification

On a balance of payments basis, trade with the United States includes trade with Puerto Rico and the Virgin Islands.

### SEASONAL ADJUSTMENT

Total exports (domestic exports and re-exports) and imports on a seasonally adjusted basis are now calculated indirectly as the sum of approximately sixty commodity aggregates. Where stable seasonality

## COMMERCE DES MARCHANDISES (BASE DE LA BALANCE DES PAIEMENTS)

Les statistiques présentées à la partie I (graphiques et tableaux analytiques) seront ajustées conformément aux concepts et aux définitions des comptes nationaux. Les corrections apportées aux chiffres douaniers aux fins de la balance des paiements sont intégrées au niveau des groupes pour rendre ces données compatibles avec celles du système des comptes nationaux.

### CORRECTIONS EN FONCTION DE LA BALANCE DES PAIEMENTS

#### Champ d'observation ou évaluation

- *Produits automobiles:* On effectue dans le cas des exportations d'automobiles et de camions et des importations de pièces de véhicules automobiles, une déduction ayant pour objet de corriger rétroactivement la valeur et de tenir compte des frais d'outillage spéciaux et autres.
- *Or:* On corrige les données douanières du commerce quand il n'y a pas de changement de propriété et on effectue des corrections supplémentaires pour les transactions au Canada entre les canadiens et les étrangers.
- *Les autres corrections* comprennent le rapprochement du commerce entre les États-Unis et le Canada, la publicité, l'évaluation officielle, les frais de transport et autres.

#### Période

- *Céréales:* Les données des exportations de grains tirées des séries du Commerce du Canada sont ajustées en fonction des chiffres que renferment les dossiers des expéditions de grains des entrepôts d'exportation établis par la Commission canadienne des grains pour un mois civil donné. Le volume des expéditions obtenu de cette source est combiné aux chiffres obtenus des séries douanières pour produire des estimations mixtes qui remplacent les séries douanières initiales.
- *Énergie:* Le commerce de l'électricité, les exportations de pétrole brut et de gaz naturel et les importations de pétrole d'échange des États-Unis, sont ajustés pour tenir compte du délai de déclaration d'un mois. À compter des données de janvier 1984, les corrections ne s'appliquent qu'au mois courant dans le cas des exportations d'électricité, de pétrole brut et de gaz naturel, étant donné que les chiffres douaniers sont décalés d'un mois, de sorte qu'ils correspondent au mois statistique véritable.
- *Navires, avions civils et matériel militaire:* Les ajustements remplacent les chiffres des livraisons réelles de matériel compris dans les séries du Commerce du Canada par les paiements échelonnés effectués relativement à la construction de navires, d'avions civils et de certains articles de matériel militaire.

Pour obtenir une description détaillée des sources et des méthodes, se référer à la publication 67-506F au catalogue, (hors série) *La balance des paiements et le bilan des investissements internationaux du Canada*.

#### Classification géographique

Sur la base de la balance des paiements, le commerce avec les États-Unis englobe le commerce avec Porto Rico et les îles Vierges.

### DÉSAISONNALISATION

Le total des exportations (exportations nationales et réexportations) et les importations désaisonnalisées sont maintenant calculés indirectement, étant constitués de la somme d'environ soixante groupes de produits.

cannot be reliably identified, the series is not seasonally adjusted. Therefore, seasonally adjusted total exports and imports represent a combination of raw and seasonally adjusted data. Previously the total was seasonally adjusted from raw data at the total level.

## PRICE INDEXES

### Timing

From 1971 to 1983, the export price indexes for electricity, natural gas and crude petroleum on a customs basis which were lagged one month have been adjusted to represent the true calendar month. Similarly, the import price index for crude petroleum from the United States on a customs basis has been adjusted and recombined with the "other country" import price index in order to arrive at an "All country" import price index. From January 1984, onward, the one month lag is now corrected on a customs basis.

### Aggregate Levels

Indexes at an aggregate level (section and total levels) are calculated by using value weights on a balance of payments basis with price indexes derived from customs data.

## DATA AVAILABILITY

Data on a balance of payments basis are available on CANSIM.

Lorsqu'il est impossible de déceler une variation saisonnière régulière, les séries ne sont pas désaisonnalisées. Par conséquent, le total désaisonnalisé des exportations et des importations est constitué d'une combinaison de données brutes et de données désaisonnalisées. Auparavant, le total était désaisonnalisé à partir des totaux bruts.

## INDICES DE PRIX

### Période

Les indices des prix à l'exportation, exprimés en chiffres douaniers, de l'électricité, du gaz naturel et du pétrole brut pour 1971 à 1983, qui étaient décalés d'un mois, ont été corrigés et correspondent actuellement au mois civil réel. De même, l'indice des prix à l'importation du pétrole brut des États-Unis, exprimé en chiffres douaniers, a été corrigé et combiné à l'indice des prix à l'importation des "Autres pays" de façon à produire un indice des prix à l'importation pour "Tous les pays". Le décalage d'un mois est corrigé dans les chiffres douaniers depuis janvier 1984.

### Niveau agrégé

Les indices agrégés (section et total) sont calculés à l'aide de poids fonctions de la valeur, sur la base de la balance des paiements, à partir d'indices de prix obtenus des données douanières.

## DISPONIBILITÉ DES DONNÉES

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

(1) La tendance à court terme donne une meilleure idée de la direction et du taux de variation des échanges commerciaux en mettant en moyenne les appréciables fluctuations mensuelles qui se produisent fréquemment dans ces derniers. La tendance pour le dernier mois n'est pas reportée sur les diagrammes ci-dessus parce qu'elle change fréquemment de façon appréciable avec l'inclusion des données des mois suivants.

- A. **Sources of Statistics:** Canada's international trade statistics are tabulated from copies of administrative documents collected by Revenue Canada, Customs at its ports across Canada. The Customs Act requires that each time goods are imported into or exported from Canada a document be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation of international trade statistics is determined and limited to some extent by Customs regulations and procedures. Where these affect the precise or consistent application of the statistical principles explained in the following section, their impact is described in qualitative terms only.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, for administrative reasons, be obtained from Customs documents. They are instead collected by the Manufacturing and Primary Industries Division of Statistics Canada, with important statistical consequences explained in Note 4 below.

Commencing with the May 1984 data export statistics for shipments of less than \$5,000 (up from \$2,500) and greater than \$800 (up from \$500) from Quebec, Ontario, Manitoba and British Columbia to the United States are estimated on the basis of a 20 per cent sample. The size of this sample is at present approximately 15,000 (up from 10,000) shipments per month. For further information, refer to the explanatory notes in the publication *Exports by Commodities* (cat. no. 65-004).

Effective January 1, 1982, the 10 per cent systematic sample of low valued import documents from the United States, as applied since January 1969 and revised in January 1975, has been discontinued. Starting with January 1984 data, all shipments exceeding \$800 are processed and compiled by complete count, while the value of shipments below \$800 is estimated. Prior to 1984 the low-value limit was \$500.

- B. **Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:** The most comprehensive set of principles for the compilation of trade statistics is to be found in *International Trade Statistics: Concepts and Definitions*, published by the United Nations Statistical Office (Series M, No. 52; New York, 1970). The following notes are both a summary of these principles and a description of the choices and exceptions made in the case of Canada's international trade statistics.

1. **System of Trade:** Canadian Statistics are tabulated according to the "general" system of trade. Thus *imports* include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. *Domestic exports* include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). *Re-exports* are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). *Total Exports* are the sum of *Domestic* and *Re-exports*.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic, tourist purchases and settlers' effects are excluded for practical

- A. **Sources des statistiques:** Les statistiques sur le commerce international du Canada sont totalisées à partir des copies des documents administratifs recueillis par Revenu Canada (Douanes) dans ses bureaux de douane par tout le Canada. La Loi sur les douanes exige que chaque fois que des marchandises sont importées au Canada ou exportées du pays, une déclaration soit faite précisant la nature des marchandises et donnant le détail de l'opération commerciale d'après les besoins de la réglementation de l'administration douanière. Il s'ensuit que la méthode de production de statistiques sur le commerce international est déterminée et limitée dans une certaine mesure par les règlements et les procédures des douanes. Lorsque ceux-ci nuisent à l'application précise ou uniforme des principes statistiques exposés dans la section suivante, leur incidence est décrite en termes qualitatifs seulement.

Les statistiques sur le commerce de l'énergie électrique et sur les exportations de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Elles sont plutôt recueillies par la Division des industries manufacturières et primaires de Statistique Canada; les conséquences importantes sur le plan statistique sont expliquées à la note 4 ci-dessous.

Commencant avec les données de mai 1984 les chiffres d'exportation portant sur les livraisons avec une valeur inférieure à \$5,000 (était \$2,500) et plus que \$800 (était \$500) en provenance du Québec, de l'Ontario, du Manitoba et de la Colombie-Britannique vers les États-Unis sont préparés d'après un échantillon de 20 pour cent. Cet échantillon comprend actuellement approximativement 15,000 (était 10,000) envois par mois. Pour plus de renseignements, voir les notes explicatives dans la publication *Exportations par marchandises* (no. 65-004 au cat.).

À partir du 1<sup>er</sup> janvier 1982, l'échantillonnage systématique de 10 p. 100 du montant des marchandises de faible valeur importés des États-Unis, tel qu'appliqué depuis janvier 1969 et révisé en janvier 1975, a été discontinué. Commencant avec les données de janvier 1984, pour toutes les livraisons dont la valeur excède \$800, le traitement et le calcul sont exhaustifs, alors que la valeur des livraisons inférieures à \$800 est estimée. Avant l'année d'enquête 1984, la limite de faible valeur était \$500.

- B. **Concepts et définitions utilisés dans la production de statistiques sur le commerce international du Canada** L'ensemble le plus complet de principes directeurs pour la préparation de ces statistiques est présenté dans *Statistiques du commerce international: concepts et définitions*, publié par le Bureau de statistique des Nations Unies (série M, no 52, New York, 1970). Les notes suivantes résument ces principes et décrivent les choix et les exceptions dans le cas de la statistique du commerce international du Canada.

1. **Système commercial:** Les statistiques canadiennes sont totalisées selon le système commercial "général". Ainsi, les *importations* comprennent tous les biens qui ont franchi les limites géographiques du Canada, qu'ils soient passés par les douanes pour être consommés immédiatement au Canada ou qu'ils aient été entreposés en douane. Les *exportations nationales* comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les *réexportations* sont des exportations de biens d'origine étrangère qui n'ont pas été transformés matériellement au Canada (y compris les biens retirés des entrepôts de douane en vue de leur exportation). Les *exportations totales* correspondent au total des *exportations nationales* et *réexportations*.

La statistique du commerce ne prend pas en compte les exportations vers des missions diplomatiques ou militaires canadiennes à l'étranger ni les importations attribuables à des missions étrangères semblables au Canada, car on considère que ces missions ne se trouvent pas hors des limites géographiques du pays qui les a envoyées. Les achats ou les ventes d'approvisionnement de navires ou d'aéronefs affectés au transport international, les achats des

reasons. Goods which cross the Canadian border for convenience of transportation only are not included in trade statistics.

2. **Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments or receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks and bonds are also excluded from the trade statistics.
3. **Valuation:** *Exports* are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g. mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

*Imports* are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

4. **Timing:** Until July 1979, statistics for a month included all shipments for which Custom documents were received at Statistics Canada up to, and including, the last working day of the month. Starting with data for August 1979, the closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. Individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents. Trade in electricity; exports of both crude petroleum and natural gas; and imports of "Swap Oil" from the United States for a given month are included in statistics for the following month because they are collected too late for inclusion in statistics for the current month. However, starting with the January 1984 data, exports of electricity, crude petroleum, and natural gas are subsequently shifted back one month, thus reflecting the true statistical month.
5. **Trading Partner Attribution:** The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and therefore does not reflect the views or intentions of the government of Canada on international issues of recognition, sovereignty or jurisdiction.

*Exports* are attributed to the country which is the last known destination of the goods at the time of export. (Many primary

touristes et les effets des immigrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont laissés hors compte.

2. **Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui seront renvoyés dans le pays exportateur après un court laps de temps sont exclus de la statistique du commerce (lorsque cette intention se dégage des documents de douane). Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en vue d'une course, les films exportés pour être développés, puis retournés. Les biens exportés ou importés pour fins de réparation seulement ne sont pas pris en compte, bien que les paiements ou les recettes au titre des réparations soient portés dans la statistique du commerce. Des avoirs financiers comme le numéraire non périmé, les actions et les obligations sont également laissés hors compte.
3. **Évaluation:** Les *exportations* sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.

Les *importations* sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois, les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane.) Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de livraison et leur prix englobe par conséquent les frais de transport.

4. **Période:** Jusqu'à juillet 1979, les statistiques d'un mois donné visaient toutes les livraisons pour lesquelles Statistique Canada avait reçu des documents de douane jusqu'au dernier jour ouvrable du mois. À partir du mois d'août 1979, la fin du mois statistique correspond au dernier jour du mois civil où s'effectue, dans la mesure du possible, le dédouanement. De diverses livraisons peuvent ne pas être prises en compte dès leur arrivée ou leur départ à cause de la procédure administrative qui donne lieu à une présentation tardive des documents. Le commerce d'énergie électrique; les exportations de pétrole brut et de gaz naturel; et les importations selon l'arrangement avec les États-Unis pour des échanges de pétrole brut d'un mois donné sont présentés dans les statistiques du mois suivant parce qu'on obtient les données trop tard pour qu'elles puissent faire partie des statistiques du mois courant. Cependant, à compter des données de janvier 1984, les exportations d'électricité, de pétrole brut et de gaz naturel sont décalées d'un mois par la suite, de sorte qu'elles correspondent au mois statistique véritable.
5. **Attribution des partenaires commerciaux:** La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue aux fins de la géographie économique et ne reflète donc pas l'opinion du Gouvernement du Canada relativement aux questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Les *exportations* sont attribuées au pays de dernière destination connue au moment de l'exportation. (De nombreux produits "pri-

products are shipped to entrepôt points, particularly in Europe, for re-exports to the ultimate destination which is unknown when the goods leave Canada.)

*Imports* are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country.

#### 6. Revisions:

- a. **Data for Current Month:** Statistics for the current month published in the "Preliminary Statement of Canadian International Trade" and in the "Summary of Canadian International Trade" (65-001) contain preliminary figures. However, figures for the current month published in "Imports by Commodities" (65-007), "Exports by Commodities" (65-004), "Imports by Countries" (65-006) and "Exports by Countries" (65-003) have been verified for reporting or processing errors.
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the monthly reports for December have been published. In the case of the "Summary of Canadian International Trade" (65-001), the revised December figures appear in the January issue of the following year. Commodity/Country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the reports 65-007 and 65-004.
- c. **Data for the previous year:** Revisions to the previous year appear in the December issue of the following year. Commodity/Country figures revised at that time are shown at the beginning of the reports 65-007 and 65-004. *When statistical series are adjusted for seasonal variations, the revised figures are reflected in the April issue of the "Summary of Canadian International Trade" (65-001).*

**Note:** Cumulative totals in all reports reflect the revisions applied up to the date of printing.

7. **Indexes of Price and Volume:** The price indexes in this publication are current-weighted and are calculated from price relatives based on 1971 = 100. The weights are trade quantities for the month, quarter or year to which the index refers and hence change from period to period. The volume index is derived by dividing a value index by the corresponding current-weighted price index. The resulting volume index is, therefore, weighted with fixed 1971 price weights. The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign statistics.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled "The 1971-based Price and Volume Indexes of Canada's External Trade", published in December 1976 as a supplement to this publication (65-001).

Each year revised indexes for the previous years are generally published in the February, March and April issues of this publication. Historical indexes were published for 1968-1974 in the June, July and August 1977 issues and for 1975 in the July, August and September 1978 issues. Most of these indexes (on a Customs Basis) are available on CANSIM in matrices 3680, 3681, 3682, 3715, 3716, and 3717.

The price and volume indexes presented in Part I are on a Balance of Payments Basis and are also available on CANSIM in matrices 3643, 3644, 3649, 3650, 3683 and 3684.

maires" sont expédiés vers des points d'entrepasage, notamment en Europe, en vue de leur réexportation; la destination ultime de ces produits est inconnue lors qu'ils quittent le Canada.)

Les *importations* sont attribuées au pays de première consignation directe des biens au Canada, que ce soit ou non le pays d'origine. On déroge à cette règle dans le cas des biens ayant comme région d'origine l'Amérique centrale ou l'Amérique du sud et expédiés au Canada depuis les États-Unis; ces importations sont portées au crédit du pays d'origine, sauf pour les échanges de pétrole brut avec les États-Unis qui sont crédités à ce pays.

#### 6. Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant figurant dans le communiqué "Préliminaire sur le commerce international du Canada" et le "Sommaire du commerce international du Canada" (65-001) contiennent des chiffres préliminaires. Cependant, les chiffres du mois courant dans "Importations par marchandises" (65-007), "Exportations par marchandises" (65-004), "Importations par pays" (65-006) et "Exportations par pays" (65-003) ont été vérifiés pour des erreurs de déclaration et de traitement.
- b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications mensuelles de décembre. Dans le cas de "Sommaire du commerce international du Canada" (65-001), les chiffres de décembre rectifiés paraîtront dans l'édition de janvier de l'année suivante. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/pays figurent dans les rapports mensuels au commencement des publications 65-007 et 65-004.
- c. **Données de l'année précédente:** Les rectifications à l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise/pays rectifiés à ce moment-là figurent au commencement des publications 65-007 et 65-004. *Quand les séries statistiques sont désaisonnalisées, les chiffres rectifiés sont pris en compte dans l'édition d'avril de "Sommaire du commerce international du Canada" (65-001).*

**Note:** Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

7. **Indices de prix et de volume:** Les indices de prix compris dans cette publication sont pondérés d'après les quantités mensuelles, trimestrielles ou annuelles du commerce correspondantes à la période de l'indice et sont calculés d'après des prix relatifs de base 1971 = 100. Par conséquence ces pondérations sont variables d'une période à l'autre. Les indices du volume sont calculés en divisant l'indice de la valeur par l'indice du prix correspondant. L'indice du volume obtenu est donc implicitement pondéré par les prix fixes de l'année 1971. Les prix relatifs sont dérivés ou des valeurs unitaires calculés directement des statistiques du commerce extérieur ou surtout pour les produits finis, des indices de prix obtenus d'autres sources canadiennes ou de l'étranger.

Des renseignements concernant la méthodologie employée dans le calcul des indices sont données dans un document de référence intitulé "Les indices de prix et de volume de base 1971 du commerce extérieur du Canada" publié en décembre 1976 sous forme de supplément à la présente publication (65-001).

Une fois l'an, on publie les indices révisés des années précédentes, généralement dans les numéros de février, mars et avril de cette publication. Les indices historiques pour les années 1968 à 1974 ont paru dans les numéros de juin, juillet et août 1977, et celles pour 1975, dans les numéros de juillet, août et septembre 1978. La plupart des indices (sur la base douanière) sont offerts sur CANSIM, dans les matrices 3680, 3681, 3682, 3715, 3716 et 3717.

Les indices de prix et de volume présentés dans la partie I de cette publication sont sur la base de la balance des paiements et sont aussi disponibles sur CANSIM, dans les matrices 3643, 3644, 3649, 3650, 3683 et 3684.

8. **Provincial Detail:** Prior to the 1984 data year, *exports* statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain case this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Commencing with 1984 data, Statistics Canada and Customs & Excise, Revenue Canada have taken measures requiring the reporting of export shipments on a province of origin basis. It is recognized that the exporting community will be unable to effect the new provincial definition on a given date; therefore the 1984 statistics will reflect a period of transition.

*Import* statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed or enter the productive process.

9. **Principal trading areas:** The "principal trading areas" shown in some tables include groupings which are defined as follows:

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands and Greece (effective January 1981). The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada.

**Other O.E.C.D.:** Austria, Finland, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of the O.E.C.D. — The Organization for Economic Cooperation and Development).

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

10. **Sources of Further Information:** More detailed monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time. For example, *The Reconciliation of U.S.-Canada Trade Statistics*, published by the United States - Canada Trade Statistics Committee, is available on request from the address given below.

Trade statistics are also available on the CANSIM Main Base in the following matrices: 0021, 0022, 0876 to 0879, 3643, 3644, 3649 to 3719.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

8. **Statistiques provinciales:** Avant l'année d'enquête 1984, les statistiques sur les *exportations* par province de chargement indiquaient la province où les produits avaient été chargés initialement pour être exportés. Dans certains cas, il ne s'agissait pas de la province d'origine qui se définit comme étant la province où les produits ont été cultivés, extraits ou fabriqués.

À partir de l'année d'enquête 1984, Statistique Canada et Revenu Canada-Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées par province d'origine. Il est certain que les exportateurs ne pourront appliquer la nouvelle définition provinciale à une date précise, aussi faut-il prévoir une période de transition qui aura une incidence sur les statistiques de 1984.

Les statistiques des *importations* par province de dédouanement présentent la province où les biens ont passé la douane en vue d'une consommation immédiate ou de leur entreposage en douane; cette province peut différer de la province de consommation ou d'entrée dans l'activité productive.

9. **Marchés principaux:** Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:

**Autres C.E.E.:** Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas et Grèce (à partir de janvier 1981). Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada.

**Autres O.C.D.E.:** Autriche, Espagne, Finlande, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. — l'Organisation pour la coopération et le développement économique).

**Autres Amérique:** Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

10. **Sources de renseignements supplémentaires:** Des statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également se procurer des descriptions détaillées et des index des classifications de marchandises. Veuillez consulter le catalogue des publications de Statistique Canada pour une description du contenu des diverses publications. La recherche continue dans le domaine de la statistique du commerce donne naissance de temps à autre à de nouveaux documents de référence. Ainsi, on peut obtenir à l'adresse mentionnée ci-dessous un document sur le rapprochement des statistiques du commerce États-Unis-Canada publié par le comité de la statistique du commerce États-Unis-Canada.

Les statistiques sur le commerce sont également offertes sur la base principale de CANSIM dans les matrices suivantes: 0021, 0022, 0876 à 0879, 3643, 3644, 3649 à 3719.

Toute question au sujet des méthodes employées doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa, Ontario K1A 0T6.

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## MERCHANDISE TRADE (BALANCE OF PAYMENTS BASIS)

The statistics presented in Part I (Analytical Charts and Tables) are adjusted to conform with the National Accounts concepts and definitions. Balance of Payments adjustments to Customs Basis data are incorporated at an aggregated level in order to make them compatible with the system of National Accounts.

### BALANCE OF PAYMENTS ADJUSTMENTS

#### Coverage or Valuation

- *Automotive Products:* Deductions are made for both exports of cars and trucks and imports of automotive parts for retroactive value adjustments and for special tooling and other charges.
- *Gold:* Adjustments are made to customs basis trade data when there is no change in ownership and additional adjustments are made for transactions between Canadians and non-residents for gold which remains in Canada.
- *Other adjustments* include United States/Canada Trade reconciliation, advertising, official valuation, freight and other adjustments.

#### Timing

- *Grains:* The Canadian Grain Commission's records of grain clearances from exporting warehouses during the full calendar month are used to adjust Trade of Canada series for grain exports. The volume of clearances obtained from this source are combined with unit values from customs-based series to derive hybrid estimates which are substituted for original customs series.
- *Energy:* Trade in electricity; exports of crude petroleum and natural gas, and imports of "swap oil" from the United States, are adjusted to account for the one month reporting lag. Starting with January 1984 data, the adjustments apply only to the current month for exports of electricity, crude petroleum and natural gas, as customs based data are shifted back one month, thus reflecting the true statistical month.
- *Ships, Civil Aircraft and Military Equipment:* The adjustment substitutes progress payments in connection with the construction of ships, civil aircraft and some military equipment, in place of the actual deliveries of the equipment recorded in the Trade of Canada series.

For detailed description of sources and methods please refer to Cat. 67506E Occasional *"The Canadian Balance of International Payments and International Investment Position"*.

#### Geographic Classification

On a balance of payments basis, trade with the United States includes trade with Puerto Rico and the Virgin Islands.

### SEASONAL ADJUSTMENT

Total exports (domestic exports and re-exports) and imports on a seasonally adjusted basis are now calculated indirectly as the sum of approximately sixty commodity aggregates. Where stable seasonality

## COMMERCE DES MARCHANDISES (BASE DE LA BALANCE DES PAIEMENTS)

Les statistiques présentées à la partie I (graphiques et tableaux analytiques) seront ajustées conformément aux concepts et aux définitions des comptes nationaux. Les corrections apportées aux chiffres douaniers aux fins de la balance des paiements sont intégrées au niveau des groupes pour rendre ces données compatibles avec celles du système des comptes nationaux.

### CORRECTIONS EN FONCTION DE LA BALANCE DES PAIEMENTS

#### Champ d'observation ou évaluation

- *Produits automobiles:* On effectue dans le cas des exportations d'automobiles et de camions et des importations de pièces de véhicules automobiles, une déduction ayant pour objet de corriger rétroactivement la valeur et de tenir compte des frais d'outillage spéciaux et autres.
- *Or:* On corrige les données douanières du commerce quand il n'y a pas de changement de propriété et on effectue des corrections supplémentaires pour les transactions au Canada entre les canadiens et les étrangers.
- *Les autres corrections* comprennent le rapprochement du commerce entre les États-Unis et le Canada, la publicité, l'évaluation officielle, les frais de transport et autres.

#### Période

- *Céréales:* Les données des exportations de grains tirées des séries du Commerce du Canada sont ajustées en fonction des chiffres que renferment les dossiers des expéditions de grains des entrepôts d'exportation établis par la Commission canadienne des grains pour un mois civil donné. Le volume des expéditions obtenu de cette source est combiné aux chiffres obtenus des séries douanières pour produire des estimations mixtes qui remplacent les séries douanières initiales.
- *Énergie:* Le commerce de l'électricité, les exportations de pétrole brut et de gaz naturel et les importations de pétrole d'échange des États-Unis, sont ajustés pour tenir compte du délai de déclaration d'un mois. À compter des données de janvier 1984, les corrections ne s'appliqueront qu'au mois courant dans le cas des exportations d'électricité, de pétrole brut et de gaz naturel, étant donné que les chiffres douaniers sont décalés d'un mois, de sorte qu'ils correspondent au mois statistique véritable.
- *Navires, avions civils et matériel militaire:* Les ajustements remplacent les chiffres des livraisons réelles de matériel compris dans les séries du Commerce du Canada par les paiements échelonnés effectués relativement à la construction de navires, d'avions civils et de certains articles de matériel militaire.

Pour obtenir une description détaillée des sources et des méthodes, se référer à la publication 67-506F au catalogue, (hors série) *La balance des paiements et le bilan des investissements internationaux du Canada*.

#### Classification géographique

Sur la base de la balance des paiements, le commerce avec les États-Unis englobe le commerce avec Porto Rico et les îles Vierges.

### DÉSAISONNALISATION

Le total des exportations (exportations nationales et réexportations) et les importations désaisonnalisées sont maintenant calculés indirectement, étant constitués de la somme d'environ soixante groupes de produits.

cannot be reliably identified, the series is not seasonally adjusted. Therefore, seasonally adjusted total exports and imports represent a combination of raw and seasonally adjusted data. Previously the total was seasonally adjusted from raw data at the total level.

## PRICE INDEXES

### Timing

From 1971 to 1983, the export price indexes for electricity, natural gas and crude petroleum on a customs basis which were lagged one month have been adjusted to represent the true calendar month. Similarly, the import price index for crude petroleum from the United States on a customs basis has been adjusted and recombined with the "other country" import price index in order to arrive at an "All country" import price index. From January 1984, onward, the one month lag is now corrected on a customs basis.

### Aggregate Levels

Indexes at an aggregate level (section and total levels) are calculated by using value weights on a balance of payments basis with price indexes derived from customs data.

## DATA AVAILABILITY

Data on a balance of payments basis are available on CANSIM.

Lorsqu'il est impossible de déceler une variation saisonnière régulière, les séries ne sont pas désaisonnalisées. Par conséquent, le total désaisonné des exportations et des importations est constitué d'une combinaison de données brutes et de données désaisonnalisées. Auparavant, le total était désaisonné à partir des totaux bruts.

## INDICES DE PRIX

### Période

Les indices des prix à l'exportation, exprimés en chiffres douaniers, de l'électricité, du gaz naturel et du pétrole brut pour 1971 à 1983, qui étaient décalés d'un mois, ont été corrigés et correspondent actuellement au mois civil réel. De même, l'indice des prix à l'importation du pétrole brut des États-Unis, exprimé en chiffres douaniers, a été corrigé et combiné à l'indice des prix à l'importation des "Autres pays" de façon à produire un indice des prix à l'importation pour "Tous les pays". Le décalage d'un mois est corrigé dans les chiffres douaniers depuis janvier 1984.

### Niveau agrégé

Les indices agrégés (section et total) sont calculés à l'aide de poids fonctions de la valeur, sur la base de la balance des paiements, à partir d'indices de prix obtenus des données douanières.

## DISPONIBILITÉ DES DONNÉES

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

(1) La tendance à court terme donne une meilleure idée de la direction et du taux de variation des échanges commerciaux en mettant en moyenne les appréciables fluctuations mensuelles qui se produisent fréquemment dans ces derniers. La tendance pour le dernier mois n'est pas reportée sur les diagrammes ci-dessus parce qu'elle change fréquemment de façon appréciable avec l'inclusion des données des mois suivants.

- A. **Sources of Statistics:** Canada's international trade statistics are tabulated from copies of administrative documents collected by Revenue Canada, Customs at its ports across Canada. The Customs Act requires that each time goods are imported into or exported from Canada a document be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation of international trade statistics is determined and limited to some extent by Customs regulations and procedures. Where these affect the precise or consistent application of the statistical principles explained in the following section, their impact is described in qualitative terms only.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, for administrative reasons, be obtained from Customs documents. They are instead collected by the Manufacturing and Primary Industries Division of Statistics Canada, with important statistical consequences explained in Note 4 below.

Commencing with the May 1984 data export statistics for shipments of less than \$5,000 (up from \$2,500) and greater than \$800 (up from \$500) from Quebec, Ontario, Manitoba and British Columbia to the United States are estimated on the basis of a 20 per cent sample. The size of this sample is at present approximately 15,000 (up from 10,000) shipments per month. For further information, refer to the explanatory notes in the publication *Exports by Commodities* (cat. no. 65-004).

Effective January 1, 1982, the 10 per cent systematic sample of low valued import documents from the United States, as applied since January 1969 and revised in January 1975, has been discontinued. Starting with January 1984 data, all shipments exceeding \$800 are processed and compiled by complete count, while the value of shipments below \$800 is estimated. Prior to 1984 the low-value limit was \$500.

- B. **Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:** The most comprehensive set of principles for the compilation of trade statistics is to be found in *International Trade Statistics: Concepts and Definitions*, published by the United Nations Statistical Office (Series M, No. 52; New York, 1970). The following notes are both a summary of these principles and a description of the choices and exceptions made in the case of Canada's international trade statistics.

1. **System of Trade:** Canadian Statistics are tabulated according to the "general" system of trade. Thus *imports* include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. *Domestic exports* include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). *Re-exports* are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). *Total Exports* are the sum of *Domestic* and *Re-exports*.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic, tourist purchases and settlers' effects are excluded for practical

- A. **Sources des statistiques:** Les statistiques sur le commerce international du Canada sont totalisées à partir des copies des documents administratifs recueillis par Revenu Canada (Douanes) dans ses bureaux de douane par tout le Canada. La Loi sur les douanes exige que chaque fois que des marchandises sont importées au Canada ou exportées du pays, une déclaration soit faite précisant la nature des marchandises et donnant le détail de l'opération commerciale d'après les besoins de la réglementation de l'administration douanière. Il s'ensuit que la méthode de production de statistiques sur le commerce international est déterminée et limitée dans une certaine mesure par les règlements et les procédures des douanes. Lorsque ceux-ci nuisent à l'application précise ou uniforme des principes statistiques exposés dans la section suivante, leur incidence est décrite en termes qualitatifs seulement.

Les statistiques sur le commerce de l'énergie électrique et sur les exportations de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Elles sont plutôt recueillies par la Division des industries manufacturières et primaires de Statistique Canada; les conséquences importantes sur le plan statistique sont expliquées à la note 4 ci-dessous.

Commençant avec les données de mai 1984 les chiffres d'exportation portant sur les livraisons avec une valeur inférieure à \$5,000 (était \$2,500) et plus que \$800 (était \$500) en provenance du Québec, de l'Ontario, du Manitoba et de la Colombie-Britannique vers les États-Unis sont préparés d'après un échantillon de 20 pour cent. Cet échantillon comprend actuellement approximativement 15,000 (était 10,000) envois par mois. Pour plus de renseignements, voir les notes explicatives dans la publication *Exportations par marchandises* (no. 65-004 au cat.).

À partir du 1<sup>er</sup> janvier 1982, l'échantillonnage systématique de 10 p. 100 du montant des marchandises de faible valeur importés des États-Unis, tel qu'appliqué depuis janvier 1969 et révisé en janvier 1975, a été discontinué. Commencant avec les données de janvier 1984, pour toutes les livraisons dont la valeur excède \$800, le traitement et le calcul sont exhaustifs, alors que la valeur des livraisons inférieures à \$800 est estimée. Avant l'année d'enquête 1984, la limite de faible valeur était \$500.

- B. **Concepts et définitions utilisés dans la production de statistiques sur le commerce international du Canada** L'ensemble le plus complet de principes directeurs pour la préparation de ces statistiques est présenté dans *Statistiques du commerce international: concepts et définitions*, publié par le Bureau de statistique des Nations Unies (série M, no 52, New York, 1970). Les notes suivantes résument ces principes et décrivent les choix et les exceptions dans le cas de la statistique du commerce international du Canada.

1. **Système commercial:** Les statistiques canadiennes sont totalisées selon le système commercial "général". Ainsi, les *importations* comprennent tous les biens qui ont franchi les limites géographiques du Canada, qu'ils soient passés par les douanes pour être consommés immédiatement au Canada ou qu'ils aient été entreposés en douane. Les *exportations nationales* comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les *réexportations* sont des exportations de biens d'origine étrangère qui n'ont pas été transformés matériellement au Canada (y compris les biens retirés des entrepôts de douane en vue de leur exportation). Les *exportations totales* correspondent au total des *exportations nationales* et *réexportations*.

La statistique du commerce ne prend pas en compte les exportations vers des missions diplomatiques ou militaires canadiennes à l'étranger ni les importations attribuables à des missions étrangères semblables au Canada, car on considère que ces missions ne se trouvent pas hors des limites géographiques du pays qui les a envoyées. Les achats ou les ventes d'approvisionnement de navires ou d'aéronefs affectés au transport international, les achats des

reasons. Goods which cross the Canadian border for convenience of transportation only are not included in trade statistics.

2. **Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments or receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks and bonds are also excluded from the trade statistics.
3. **Valuation:** *Exports* are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g. mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

*Imports* are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

4. **Timing:** Until July 1979, statistics for a month included all shipments for which Custom documents were received at Statistics Canada up to, and including, the last working day of the month. Starting with data for August 1979, the closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. Individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents. Trade in electricity; exports of both crude petroleum and natural gas; and imports of "Swap Oil" from the United States for a given month are included in statistics for the following month because they are collected too late for inclusion in statistics for the current month. However, starting with the January 1984 data, exports of electricity, crude petroleum, and natural gas are subsequently shifted back one month, thus reflecting the true statistical month.
5. **Trading Partner Attribution:** The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and therefore does not reflect the views or intentions of the government of Canada on international issues of recognition, sovereignty or jurisdiction.

*Exports* are attributed to the country which is the last known destination of the goods at the time of export. (Many primary

touristes et les effets des immigrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont laissés hors compte.

2. **Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui seront renvoyés dans le pays exportateur après un court laps de temps sont exclus de la statistique du commerce (lorsque cette intention se dégage des documents de douane). Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en vue d'une course, les films exportés pour être développés, puis retournés. Les biens exportés ou importés pour fins de réparation seulement ne sont pas pris en compte, bien que les paiements ou les recettes au titre des réparations soient portés dans la statistique du commerce. Des avoirs financiers comme le numéraire non périmé, les actions et les obligations sont également laissés hors compte.
3. **Évaluation:** Les *exportations* sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.

Les *importations* sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois, les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane.) Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de livraison et leur prix englobe par conséquent les frais de transport.

4. **Période:** Jusqu'à juillet 1979, les statistiques d'un mois donné visaient toutes les livraisons pour lesquelles Statistique Canada avait reçu des documents de douane jusqu'au dernier jour ouvrable du mois. À partir du mois d'août 1979, la fin du mois statistique correspond au dernier jour du mois civil où s'effectue, dans la mesure du possible, le dédouanement. De diverses livraisons peuvent ne pas être prises en compte dès leur arrivée ou leur départ à cause de la procédure administrative qui donne lieu à une présentation tardive des documents. Le commerce d'énergie électrique; les exportations de pétrole brut et de gaz naturel; et les importations selon l'arrangement avec les États-Unis pour des échanges de pétrole brut d'un mois donné sont présentés dans les statistiques du mois suivant parce qu'on obtient les données trop tard pour qu'elles puissent faire partie des statistiques du mois courant. Cependant, à compter des données de janvier 1984, les exportations d'électricité, de pétrole brut et de gaz naturel sont décalées d'un mois par la suite, de sorte qu'elles correspondent au mois statistique véritable.
5. **Attribution des partenaires commerciaux:** La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue aux fins de la géographie économique et ne reflète donc pas l'opinion du Gouvernement du Canada relativement aux questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Les *exportations* sont attribuées au pays de dernière destination connue au moment de l'exportation. (De nombreux produits "pri-

products are shipped to entrepôt points, particularly in Europe, for re-exports to the ultimate destination which is unknown when the goods leave Canada.)

*Imports* are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country.

#### 6. Revisions:

- a. **Data for Current Month:** Statistics for the current month published in the "Preliminary Statement of Canadian International Trade" and in the "Summary of Canadian International Trade" (65-001) contain preliminary figures. However, figures for the current month published in "Imports by Commodities" (65-007), "Exports by Commodities" (65-004), "Imports by Countries" (65-006) and "Exports by Countries" (65-003) have been verified for reporting or processing errors.
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the monthly reports for December have been published. In the case of the "Summary of Canadian International Trade" (65-001), the revised December figures appear in the January issue of the following year. Commodity/Country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the reports 65-007 and 65-004.
- c. **Data for the previous year:** Revisions to the previous year appear in the December issue of the following year. Commodity/Country figures revised at that time are shown at the beginning of the reports 65-007 and 65-004. *When statistical series are adjusted for seasonal variations, the revised figures are reflected in the April issue of the "Summary of Canadian International Trade" (65-001).*

**Note:** Cumulative totals in all reports reflect the revisions applied up to the date of printing.

7. **Indexes of Price and Volume:** The price indexes in this publication are current-weighted and are calculated from price relatives based on 1971 = 100. The weights are trade quantities for the month, quarter or year to which the index refers and hence change from period to period. The volume index is derived by dividing a value index by the corresponding current-weighted price index. The resulting volume index is, therefore, weighted with fixed 1971 price weights. The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign statistics.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled "The 1971-based Price and Volume Indexes of Canada's External Trade", published in December 1976 as a supplement to this publication (65-001).

Each year revised indexes for the previous years are generally published in the February, March and April issues of this publication. Historical indexes were published for 1968-1974 in the June, July and August 1977 issues and for 1975 in the July, August and September 1978 issues. Most of these indexes (on a Customs Basis) are available on CANSIM in matrices 3680, 3681, 3682, 3715, 3716, and 3717.

The price and volume indexes presented in Part I are on a Balance of Payments Basis and are also available on CANSIM in matrices 3643, 3644, 3649, 3650, 3683 and 3684.

maires" sont expédiés vers des points d'entreposage, notamment en Europe, en vue de leur réexportation; la destination ultime de ces produits est inconnue lors qu'ils quittent le Canada.)

Les *importations* sont attribuées au pays de première consignation directe des biens au Canada, que ce soit ou non le pays d'origine. On déroge à cette règle dans le cas des biens ayant comme région d'origine l'Amérique centrale ou l'Amérique du sud et expédiés au Canada depuis les États-Unis; ces importations sont portées au crédit du pays d'origine, sauf pour les échanges de pétrole brut avec les États-Unis qui sont crédités à ce pays.

#### 6. Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant figurant dans le communiqué "Préliminaire sur le commerce international du Canada" et le "Sommaire du commerce international du Canada" (65-001) contiennent des chiffres préliminaires. Cependant, les chiffres du mois courant dans "Importations par marchandises" (65-007), "Exportations par marchandises" (65-004), "Importations par pays" (65-006) et "Exportations par pays" (65-003) ont été vérifiés pour des erreurs de déclaration et de traitement.
- b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications mensuelles de décembre. Dans le cas de "Sommaire du commerce international du Canada" (65-001), les chiffres de décembre rectifiés paraîtront dans l'édition de janvier de l'année suivante. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/-pays figurent dans les rapports mensuels au commencement des publications 65-007 et 65-004.
- c. **Données de l'année précédente:** Les rectifications à l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise/pays rectifiés à ce moment-là figurent au commencement des publications 65-007 et 65-004. *Quand les séries statistiques sont désaisonnalisées, les chiffres rectifiés sont pris en compte dans l'édition d'avril de "Sommaire du commerce international du Canada" (65-001).*

**Note:** Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

7. **Indices de prix et de volume:** Les indices de prix compris dans cette publication sont pondérés d'après les quantités mensuelles, trimestrielles ou annuelles du commerce correspondantes à la période de l'indice et sont calculés d'après des prix relatifs de base 1971 = 100. Par conséquent ces pondérations sont variables d'une période à l'autre. Les indices du volume sont calculés en divisant l'indice de la valeur par l'indice du prix correspondant. L'indice du volume obtenu est donc implicitement pondéré par les prix fixes de l'année 1971. Les prix relatifs sont dérivés ou des valeurs unitaires calculés directement des statistiques du commerce extérieur ou surtout pour les produits finis, des indices de prix obtenus d'autres sources canadiennes ou de l'étranger.

Des renseignements concernant la méthodologie employée dans le calcul des indices sont données dans un document de référence intitulé "Les indices de prix et de volume de base 1971 du commerce extérieur du Canada" publié en décembre 1976 sous forme de supplément à la présente publication (65-001).

Une fois l'an, on publie les indices révisés des années précédentes, généralement dans les numéros de février, mars et avril de cette publication. Les indices historiques pour les années 1968 à 1974 ont paru dans les numéros de juin, juillet et août 1977, et celles pour 1975, dans les numéros de juillet, août et septembre 1978. La plupart des indices (sur la base douanière) sont offerts sur CANSIM, dans les matrices 3680, 3681, 3682, 3715, 3716 et 3717.

Les indices de prix et de volume présentés dans la partie I de cette publication sont sur la base de la balance des paiements et sont aussi disponibles sur CANSIM, dans les matrices 3643, 3644, 3649, 3650, 3683 et 3684.

8. **Provincial Detail:** Prior to the 1984 data year, *exports* statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain case this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Commencing with 1984 data, Statistics Canada and Customs & Excise, Revenue Canada have taken measures requiring the reporting of export shipments on a province of origin basis. It is recognized that the exporting community will be unable to effect the new provincial definition on a given date; therefore the 1984 statistics will reflect a period of transition.

*Import* statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed or enter the productive process.

9. **Principal trading areas:** The "principal trading areas" shown in some tables include groupings which are defined as follows:

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands and Greece (effective January 1981). The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada.

**Other O.E.C.D.:** Austria, Finland, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of the O.E.C.D. — The Organization for Economic Cooperation and Development).

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

10. **Sources of Further Information:** More detailed monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time. For example, *The Reconciliation of U.S.-Canada Trade Statistics*, published by the United States - Canada Trade Statistics Committee, is available on request from the address given below.

Trade statistics are also available on the CANSIM Main Base in the following matrices: 0021, 0022, 0876 to 0879, 3643, 3644, 3649 to 3719.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

8. **Statistiques provinciales:** Avant l'année d'enquête 1984, les statistiques sur les *exportations* par province de chargement indiquaient la province où les produits avaient été chargés initialement pour être exportés. Dans certains cas, il ne s'agissait pas de la province d'origine qui se définit comme étant la province où les produits ont été cultivés, extraits ou fabriqués.

À partir de l'année d'enquête 1984, Statistique Canada et Revenu Canada-Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées par province d'origine. Il est certain que les exportateurs ne pourront appliquer la nouvelle définition provinciale à une date précise, aussi faut-il prévoir une période de transition qui aura une incidence sur les statistiques de 1984.

Les statistiques des *importations* par province de dédouanement présentent la province où les biens ont passé la douane en vue d'une consommation immédiate ou de leur entreposage en douane; cette province peut différer de la province de consommation ou d'entrée dans l'activité productive.

9. **Marchés principaux:** Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:

**Autres C.E.E.:** Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas et Grèce (à partir de janvier 1981). Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada.

**Autres O.C.D.E.:** Autriche, Espagne, Finlande, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. — l'Organisation pour la coopération et le développement économique).

**Autres Amérique:** Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

10. **Sources de renseignements supplémentaires:** Des statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également se procurer des descriptions détaillées et des index des classifications de marchandises. Veuillez consulter le catalogue des publications de Statistique Canada pour une description du contenu des diverses publications. La recherche continue dans le domaine de la statistique du commerce donne naissance de temps à autre à de nouveaux documents de référence. Ainsi, on peut obtenir à l'adresse mentionnée ci-dessous un document sur le rapprochement des statistiques du commerce États-Unis-Canada publié par le comité de la statistique du commerce États-Unis-Canada.

Les statistiques sur le commerce sont également offertes sur la base principale de CANSIM dans les matrices suivantes: 0021, 0022, 0876 à 0879, 3643, 3644, 3649 à 3719.

Toute question au sujet des méthodes employées doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa, Ontario K1A 0T6.

### Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit  
International Trade Division,

### Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## MERCHANDISE TRADE (BALANCE OF PAYMENTS BASIS)

The statistics presented in Part I (Analytical Charts and Tables) are adjusted to conform with the National Accounts concepts and definitions. Balance of Payments adjustments to Customs Basis data are incorporated at an aggregated level in order to make them compatible with the system of National Accounts.

### Balance of Payments Adjustments

#### Coverage or Valuation

- *Automotive Products:* Deductions are made for both exports of cars and trucks and imports of automotive parts for retroactive value adjustments and for special tooling and other charges.
- *Gold:* Adjustments are made to customs basis trade data when there is no change in ownership and additional adjustments are made for transactions between Canadians and non-residents for gold which remains in Canada.
- *Other adjustments* include United States/Canada Trade reconciliation, advertising, official valuation, freight and other adjustments.

#### Timing

- *Grains:* The Canadian Grain Commission's records of grain clearances from exporting warehouses during the full calendar month are used to adjust Trade of Canada series for grain exports. The volume of clearances obtained from this source are combined with unit values from customs-based series to derive hybrid estimates which are substituted for original customs series.
- *Energy:* Trade in electricity; exports of crude petroleum and natural gas, and imports of "swap oil" from the United States, are adjusted to account for the one month reporting lag. Starting with January 1984 data, the adjustments apply only to the current month for exports of electricity, crude petroleum and natural gas, as customs based data are shifted back one month, thus reflecting the true statistical month.
- *Ships, Civil Aircraft and Military Equipment:* The adjustment substitutes progress payments in connection with the construction of ships, civil aircraft and some military equipment, in place of the actual deliveries of the equipment recorded in the Trade of Canada series.

For detailed description of sources and methods please refer to Cat. 67-506E Occasional "The Canadian Balance of International Payments and International Investment Position".

#### Geographic Classification

On a balance of payments basis, trade with the United States includes trade with Puerto Rico and the Virgin Islands.

## COMMERCE DES MARCHANDISES (BASE DE LA BALANCE DES PAIEMENTS)

Les statistiques présentées à la partie I (graphiques et tableaux analytiques) seront ajustées conformément aux concepts et aux définitions des comptes nationaux. Les corrections apportées aux chiffres douaniers aux fins de la balance des paiements sont intégrées au niveau des groupes pour rendre ces données compatibles avec celles du système des comptes nationaux.

### Corrections en fonction de la balance des paiements

#### Champ d'observation ou évaluation

- *Produits automobiles:* On effectue dans le cas des exportations d'automobiles et de camions et des importations de pièces de véhicules automobiles, une déduction ayant pour objet de corriger rétroactivement la valeur et de tenir compte des frais d'outillage spéciaux et autres.
- *Or:* On corrige les données douanières du commerce quand il n'y a pas de changement de propriété et on effectue des corrections supplémentaires pour les transactions au Canada entre les canadiens et les étrangers.
- *Les autres corrections* comprennent le rapprochement du commerce entre les États-Unis et le Canada, la publicité, l'évaluation officielle, les frais de transport et autres.

#### Période

- *Céréales:* Les données des exportations de grains tirées des séries du Commerce du Canada sont ajustées en fonction des chiffres que renferment les dossiers des expéditions de grains des entrepôts d'exportation établis par la Commission canadienne des grains pour un mois civil donné. Le volume des expéditions obtenu de cette source est combiné aux chiffres obtenus des séries douanières pour produire des estimations mixtes qui remplacent les séries douanières initiales.
- *Énergie:* Le commerce de l'électricité, les exportations de pétrole brut et de gaz naturel et les importations de pétrole d'échange des États-Unis, sont ajustés pour tenir compte du délai de déclaration d'un mois. À compter des données de janvier 1984, les corrections ne s'appliquent qu'au mois courant dans le cas des exportations d'électricité, de pétrole brut et de gaz naturel, étant donné que les chiffres douaniers sont décalés d'un mois, de sorte qu'ils correspondent au mois statistique véritable.
- *Navires, avions civils et matériel militaire:* Les ajustements remplacent les chiffres des livraisons réelles de matériel compris dans les séries du Commerce du Canada par les paiements échelonnés effectués relativement à la construction de navires, d'avions civils et de certains articles de matériel militaire.

Pour obtenir une description détaillée des sources et des méthodes, se référer à la publication 67-506F au catalogue, (hors série) *La balance des paiements et le bilan des investissements internationaux du Canada*.

#### Classification géographique

Sur la base de la balance des paiements, le commerce avec les États-Unis englobe le commerce avec Porto Rico et les îles Vierges.

## Seasonal Adjustment

Total exports (domestic exports and re-exports) and imports on a seasonally adjusted basis are now calculated indirectly as the sum of approximately sixty commodity aggregates. Where stable seasonality cannot be reliably identified, the series is not seasonally adjusted. Therefore, seasonally adjusted total exports and imports represent a combination of raw and seasonally adjusted data. Previously the total was seasonally adjusted from raw data at the total level.

## Price Indexes

### Timing

From 1971 to 1983, the export price indexes for electricity, natural gas and crude petroleum on a customs basis which were lagged one month have been adjusted to represent the true calendar month. Similarly, the import price index for crude petroleum from the United States on a customs basis has been adjusted and recombined with the "Other country" import price index in order to arrive at an "All country" import price index. From January 1984, onward, the one month lag is now corrected on a customs basis.

### Aggregate Levels

Indexes at an aggregate level (section and total levels) are calculated by using value weights on a balance of payments basis with price indexes derived from customs data.

## Data Availability

Data on a balance of payments basis are available on CANSIM.

## Désaisonnalisation

Le total des exportations (exportations nationales et réexportations) et les importations désaisonnalisées sont maintenant calculés indirectement, étant constitués de la somme d'environ soixante groupes de produits. Lorsqu'il est impossible de déceler une variation saisonnière régulière, les séries ne sont pas désaisonnalisées. Par conséquent, le total désaisonné des exportations et des importations est constitué d'une combinaison de données brutes et de données désaisonnalisées. Auparavant, le total était désaisonné à partir des totaux bruts.

## Indices des prix

### Période

Les indices des prix à l'exportation, exprimés en chiffres douaniers, de l'électricité, du gaz naturel et du pétrole brut pour 1971 à 1983, qui étaient décalés d'un mois, ont été corrigés et correspondent actuellement au mois civil réel. De même, l'indice des prix à l'importation du pétrole brut des États-Unis, exprimé en chiffres douaniers, a été corrigé et combiné à l'indice des prix à l'importation des "Autres pays" de façon à produire un indice des prix à l'importation pour "Tous les pays". Le décalage d'un mois est corrigé dans les chiffres douaniers depuis janvier 1984.

### Niveau agrégé

Les indices agrégés (section et total) sont calculés à l'aide de poids fonctions de la valeur, sur la base de la balance des paiements, à partir d'indices de prix obtenus des données douanières.

## Disponibilité des données

Les données sur la base de la balance des paiements se trouvent dans CANSIM.

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

(1) La tendance à court terme donne une meilleure idée de la direction et du taux de variation des échanges commerciaux en mettant en moyenne les appréciables fluctuations mensuelles qui se produisent fréquemment dans ces derniers. La tendance pour le dernier mois n'est pas reportée sur les diagrammes ci-dessus parce qu'elle change fréquemment de façon appréciable avec l'inclusion des données des mois suivants.

## EXPLANATORY NOTES

- A. **Sources of Statistics:** Canada's international trade statistics are tabulated from copies of administrative documents collected by Revenue Canada, Customs at its ports across Canada. The Customs Act requires that each time goods are imported into or exported from Canada a document be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation of international trade statistics is determined and limited to some extent by Customs regulations and procedures. Where these affect the precise or consistent application of the statistical principles explained in the following section, their impact is described in qualitative terms only.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, for administrative reasons, be obtained from Customs documents. Trade in electricity is instead reported through the National Energy Board, while statistics on exports of crude petroleum and natural gas (by pipeline) are collected directly by the Industry Division of Statistics Canada; with important statistical consequences explained in Note 4.

Commencing with the May 1984 data export statistics for shipments of less than \$5,000 (up from \$2,500) and greater than \$800 (up from \$500) from Quebec, Ontario, Manitoba and British Columbia to the United States are estimated on the basis of a 20 per cent sample. The size of this sample is at present approximately 15,000 (up from 10,000) shipments per month. For further information, refer to the explanatory notes in the publication *Exports by Commodities* (cat. no. 65-004).

Effective January 1, 1982, the 10 per cent systematic sample of low valued import documents from the United States, as applied since January 1969 and revised in January 1975, has been discontinued. Starting with January 1984 data, all shipments exceeding \$800 are processed and compiled by complete count, while the value of shipments below \$800 is estimated. Prior to 1984 the low-value limit was \$500.

- B. **Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:** The most comprehensive set of principles for the compilation of trade statistics is to be found in *International Trade Statistics: Concepts and Definitions*, published by the United National Statistical Office (series M, No. 52; New York). The following notes are both a summary of these principles and a description of the choices and exceptions made in the case of Canada's international trade statistics.

1. **System of Trade:** Canadian statistics are tabulated according to the "general" system of trade. Thus *imports* include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. *Domestic exports* include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). *Re-exports* are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). *Total exports* are the sum of *Domestic* and *Re-exports*.

## NOTES EXPLICATIVES

- A. **Sources des statistiques:** Les statistiques sur le commerce international du Canada sont totalisées à partir des copies des documents administratifs recueillis par Revenu Canada (Douanes) dans ses bureaux de douane par tout le Canada. La Loi sur les douanes exige que chaque fois que des marchandises sont importées au Canada ou exportées du pays, une déclaration soit faite précisant la nature des marchandises et donnant le détail de l'opération commerciale d'après les besoins de la réglementation de l'administration douanière. Il s'ensuit que la méthode de production de statistiques sur le commerce international est déterminée et limitée dans une certaine mesure par les règlements et les procédures des douanes. Lorsque ceux-ci nuisent à l'application précise ou uniforme des principes statistiques exposés dans la section suivante, leur incidence est décrite en termes qualitatifs seulement.

Les statistiques sur le commerce de l'énergie électrique et sur les exportations de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Le commerce de l'énergie électrique est plutôt fourni par l'intermédiaire de l'Office national d'énergie, tandis que les statistiques sur les exportations de pétrole brut et de gaz naturel (par oléoduc) sont recueillies directement par la Division de l'industrie de Statistique Canada; les conséquences importantes sur le plan statistique sont expliquées à la note 4.

Commencant avec les données de mai 1984 les chiffres d'exportation portant sur les livraisons avec une valeur inférieure à \$5,000 (était \$2,500) et plus que \$800 (était \$500) en provenance du Québec, de l'Ontario, du Manitoba et de la Colombie-Britannique vers les États-Unis sont préparés d'après un échantillon de 20 pour cent. Cet échantillon comprend actuellement approximativement 15,000 (était 10,000) envois par mois. Pour plus de renseignements, voir les notes explicatives dans la publication *Exportations par marchandises* (n°. 65-004 au cat.).

À partir du 1<sup>er</sup> janvier 1982, l'échantillonnage systématique de 10 p. 100 du montant des marchandises de faible valeur importés des États-Unis, tel qu'appliqué depuis janvier 1969 et révisé en janvier 1975, a été discontinué. Commencant avec les données de janvier 1984, pour toutes les livraisons dont la valeur excède \$800, le traitement et le calcul sont exhaustifs, alors que la valeur des livraisons inférieures à \$800 est estimée. Avant l'année d'enquête 1984, la limite de faible valeur était \$500.

- B. **Concepts et définitions utilisés dans la production de statistiques sur le commerce international:** L'ensemble le plus complet de principes directeurs pour la préparation de ces statistiques est présenté dans *Statistiques du commerce international: concepts et définitions*, publié par le Bureau de statistique des Nations Unies (série M, n°. 52, New York). Les notes suivantes résument ces principes et décrivent les choix et les exceptions dans le cas de la statistique du commerce international du Canada.

1. **Système commercial:** Les statistiques canadiennes sont totalisées selon le système commercial "général". Ainsi, les *importations* comprennent tous les biens qui ont franchi les limites géographiques du Canada, qu'ils soient passés par les douanes pour être consommés immédiatement au Canada ou qu'ils aient été entreposés en douane. Les *exportations nationales* comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les *réexportations* sont des exportations de biens d'origine étrangère qui n'ont pas été transformés matériellement au Canada (y compris les biens retirés des entrepôts de douane en vue de leur exportation). Les *exportations totales* correspondent au total des *exportations nationales* et *réexportations*.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic and settlers' effects are excluded for practical reasons. Goods which cross the Canadian border for convenience of transportation only are not included in trade statistics.

2. **Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments of receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks, and bonds are also excluded from the trade statistics.
3. **Valuation:** Exports are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g., mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

*Imports* are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

4. **Timing:** Until January 1979, statistics for a month included all shipments for which Customs documents were received at Statistics Canada up to, and including, the last working day of the month. Starting with data for August 1979, the closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. Individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents. Trade in electricity; exports of both crude petroleum and natural gas; and imports of "Swap Oil" from the United States

La statistique du commerce ne prend pas en compte les exportations vers des missions diplomatiques ou militaires canadiennes à l'étranger ni les importations attribuables à des missions étrangères semblables au Canada, car on considère que ces missions ne se trouvent pas hors des limites géographiques du pays qui les a envoyées. Les achats ou les ventes d'approvisionnement de navires ou d'aéronefs affectés au transport international et les effets des immigrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont laissés hors compte.

2. **Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui seront renvoyés dans le pays exportateur après un court laps de temps sont exclus de la statistique du commerce (lorsque cette intention se dégage des documents de douane). Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en vue d'une course, les films exportés pour être développés, puis retournés. Les biens exportés ou importés pour fins de réparation seulement ne sont pas pris en compte, bien que les paiements ou les recettes au titre des réparations soient portés dans la statistique du commerce. Des avoirs financiers comme le numéraire non périmé, les actions et les obligations sont également laissés hors compte.
3. **Evaluation:** Les *exportations* sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.

Les *importations* sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane.) Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de "livraison" et leur prix englobe par conséquent les frais de transport.

4. **Période:** Jusqu'à juillet 1979, les statistiques d'un mois donné visaient toutes les livraisons pour lesquelles Statistique Canada avait reçu des documents de douane jusqu'au dernier jour ouvrable du mois. À partir du mois d'août 1979, la fin du mois statistique correspond au dernier jour du mois civil où s'effectue, dans la mesure du possible, le dédouanement. De diverses livraisons peuvent ne pas être prises en compte dès leur arrivée ou leur départ à cause de la procédure administrative qui donne lieu à une présentation tardive des documents. Le commerce d'énergie électrique, les exportations de pétrole brut et de gaz naturel, et les importations selon l'arrangement avec les États-Unis pour des échanges de pétrole brut d'un mois donné sont présentés dans

for a given month are included in statistics for the following month because they are collected too late for inclusion in statistics for the current month. However, starting with the January 1984 data, exports of electricity, crude petroleum, and natural gas are subsequently shifted back one month, thus reflecting the true statistical month.

5. **Trading Partner Attribution:** The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and therefore does not reflect the views or intentions of the government of Canada on international issues of recognition, sovereignty or jurisdiction.

*Exports* are attributed to the country which is the last known destination of the goods at the time of export. (Many primary products are shipped to entrepôt points, particularly in Europe, for re-export to the ultimate destination which is unknown when the goods leave Canada.)

*Imports* are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country.

## 6. Revisions:

- a. **Data for current month:** Statistics for the current month published in the "Preliminary Statement of Canadian International Trade" (65-001P) and in the "Summary of Canadian International Trade" (65-001) contain preliminary figures. However, figures published in "Imports by Commodities" (65-007), "Exports by Commodities" (65-004), "Imports by Countries" (65-006) and "Exports by Countries" (65-003) have been verified for reporting or processing errors.
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the monthly reports for December have been published. In the case of the "Summary of Canadian International Trade" (65-001), the revised December figures appear in the January issue of the following year. Commodity/Country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the reports 65-007 and 65-004.
- c. **Data for the previous year:** Revisions to the previous year appear in the December issue of the following year. Commodity/Country figures revised at that time are shown at the beginning of the reports 65-007 and 65-004. *When statistical series are adjusted for seasonal variations, the revised figures are reflected in the April issue of the "Summary of Canadian International Trade" (65-001).*

**Note:** Cumulative totals in all reports reflect the revisions applied up to the date of printing.

les statistiques du mois suivant parce qu'on obtient les données trop tard pour qu'elles puissent faire partie des statistiques du mois courant. Cependant, à compter des données de janvier 1984, les exportations d'électricité, de pétrole brut et de gaz naturel sont décalées d'un mois par la suite, de sorte qu'elles correspondent au mois statistique véritable.

5. **Attribution des partenaires commerciaux:** La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue aux fins de la géographie économique et ne reflète donc pas l'opinion du Gouvernement du Canada relativement aux questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Les *exportations* sont attribuées au pays de dernière destination connue au moment de l'exportation. (De nombreux produits "primaires" sont expédiés vers des points d'entreposage, notamment en Europe, en vue de leur réexportation; la destination ultime de ces produits est inconnue lorsqu'ils quittent le Canada.)

Les *importations* sont attribuées au pays de première consignation directe des biens au Canada, que ce soit ou non le pays d'origine. On déroge à cette règle dans le cas des biens ayant comme région d'origine l'Amérique centrale ou l'Amérique du sud et expédiés au Canada depuis les États-Unis; ces importations sont portées au crédit du pays d'origine, sauf pour les échanges de pétrole brut avec les États-Unis qui sont crédités à ce pays.

## 6. Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant figurant dans le communiqué "Preliminaire sur le commerce international du Canada" (65-001P) et le "Sommaire du commerce international du Canada" (65-001) contiennent des chiffres préliminaires. Cependant, les chiffres dans "Importations par marchandises" (65-007), "Exportations par marchandises" (65-004), "Importations par pays" (65-006) et "Exportations par pays" (65-003) ont été vérifiés pour des erreurs de déclaration et de traitement.
- b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications mensuelles de décembre. Dans le cas de "Sommaire du commerce international du Canada" (65-001), les chiffres de décembre rectifiés paraîtront dans l'édition de janvier de l'année suivante. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/pays figurent dans les rapports mensuels au commencement des publications 65-007 et 65-004.
- c. **Données de l'année précédente:** Les rectifications à l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise/pays rectifiés à ce moment-là figurent au commencement des publications 65-007 et 65-004. *Quand les séries statistiques sont désaisonnalisées, les chiffres rectifiés sont pris en compte dans l'édition d'avril de "Sommaire du commerce international du Canada" (65-001).*

**Nota:** Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

7. **Indexes of Price and Volume:** The price indexes in this publication are current-weighted and are calculated from price relatives based on 1971 = 100. The weights are trade quantities for the month, quarter or year to which the index refers and hence change from period to period. The volume index is derived by dividing a value index by the corresponding current-weighted price index. The resulting volume index is, therefore, weighted with fixed 1971 price weights. The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign statistics.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled "The 1971-based Price and Volume Indexes of Canada's External Trade", published in December 1976 as a supplement to this publication (65-001).

Current and fixed weighted export and import price and volume indexes on a Balance of Payments Basis presented in Part I of this publication are also available on CANSIM in matrices 3643, 3644, 3649, 3650, 3683 and 3684.

Customs based current and fixed weighted price indexes for the United States and the 10 SITC sections are available on CANSIM in matrices 3680, 3681, 3715, 3716.

8. **Provincial Detail:** Prior to the 1984 data year, *exports* statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain cases this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Commencing with the 1984 data, Statistics Canada and Customs & Excise, Revenue Canada have taken measures requiring the reporting of export shipments on a province of origin basis. It is recognized that the exporting community will be unable to effect the new provincial definition on a given date; therefore there will be a period of transition.

*Imports* statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed or enter the productive process.

9. **Principal Trading areas:** The "principal trading areas" shown in some tables include groupings which are defined as follows:

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands and Greece (effective January 1981). The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada.

7. **Indices de prix et de volume:** Les indices de prix compris dans cette publication sont pondérés d'après les quantités mensuelles, trimestrielles ou annuelles du commerce correspondant à la période de l'indice et sont calculés d'après des prix relatifs de base 1971 = 100. Par conséquence ces pondérations sont variables d'une période à l'autre. Les indices du volume sont calculés en divisant l'indice de la valeur par l'indice du prix correspondant. L'indice du volume obtenu est donc implicitement pondéré par les prix fixes de l'année 1971. Les prix relatifs sont dérivés ou des valeurs unitaires calculés directement des statistiques du commerce international ou surtout pour les produits finis, des indices de prix obtenus d'autres sources canadiennes ou de l'étranger.

Des renseignements concernant la méthodologie employée dans le calcul des indices sont donnés dans un document de référence intitulé "Les indices de prix et de volume de base 1971 du commerce extérieur du Canada" publié en décembre 1976 sous forme de supplément à la présente publication (65-001).

Les indices de prix et de volume des exportations canadiennes et des importations, à pondération courante et fixe sur la base de la balance des paiements présentés dans la Partie I de cette publication sont aussi disponibles sur CANSIM dans les matrices 3643, 3644, 3649, 3650, 3683 et 3684.

Les indices de prix, à pondération courante et fixe, sur la base douanière pour les États-Unis et pour les 10 sections de la CTCI sont disponibles sur CANSIM dans les matrices 3680, 3681, 3715 et 3716.

8. **Statistiques provinciales:** Avant l'année d'enquête 1984, les statistiques sur les *exportations* par province de chargement indiquaient la province où les produits avaient été chargés initialement pour être exportés. Dans certains cas, il ne s'agissait pas de la province d'origine qui se définit comme étant la province où les produits ont été cultivés, extraits ou fabriqués.

À partir de l'année d'enquête 1984, Statistique Canada et Revenu Canada-Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées par province d'origine. Il est certain que les exportateurs ne pourront appliquer la nouvelle définition provinciale à une date précise, aussi faut-il prévoir une période de transition qui aura une incidence sur les statistiques.

Les statistiques des *importations* par province de dédouanement présentent la province où les biens ont passé la douane en vue d'une consommation immédiate ou de leur entreposage en douane; cette province peut différer de la province de consommation ou d'entrée dans l'activité productive.

9. **Marchés principaux:** Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:

**Autres C.E.E.:** Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas et Grèce (à partir de janvier 1981). Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada.

**Other O.E.C.D.:** Austria, Finland, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of O.E.C.D. – the Organization for Economic Cooperation and Development.)

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

10. **Sources of Further Information:** More detailed monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time. For example, The Reconciliation of U.S.-Canada Trade Statistics, published by the United States - Canada Trade Statistics Committee, is available on request from the address given below.

Trade statistics are also available on the CANSIM Main Base in the following matrices: 0021, 0022, 0876 to 0879, 3643, 3644, 3649 to 3719.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

**Autres O.C.D.E.:** Autriche, Espagne, Finlande, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. – l'Organisation pour la coopération et le développement économique.)

**Autres Amérique:** Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

10. **Sources de renseignements supplémentaires:** Des statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également se procurer des descriptions détaillées et des index des classifications de marchandises. Veuillez consulter le catalogue des publications de Statistique Canada pour une description du contenu des diverses publications. La recherche continue dans le domaine de la statistique du commerce donne naissance de temps à autre à de nouveaux documents de référence. Ainsi, on peut obtenir à l'adresse mentionnée ci-dessous un document sur le rapprochement des statistiques du commerce États-Unis-Canada publié par le comité de la statistique du commerce États-Unis-Canada.

Les statistiques sur le commerce sont également offertes sur la base principale de CANSIM dans les matrices suivantes: 0021, 0022, 0876 à 0879, 3643, 3644, 3649 à 3719.

Toute question au sujet des méthodes employées doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa, Ontario K1A 0T6.

## Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit,

## Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## MERCHANDISE TRADE (BALANCE OF PAYMENTS BASIS)

The statistics presented in Part I (Analytical Charts and Tables) are adjusted to conform with the National Accounts concepts and definitions. Balance of Payments adjustments to Customs Basis data are incorporated at an aggregated level in order to make them compatible with the system of National Accounts.

### Balance of Payments Adjustments

#### Coverage or Valuation

- *Automotive Products:* Deductions are made for both exports of cars and trucks and imports of automotive parts for retroactive value adjustments and for special tooling and other charges.
- *Gold:* Adjustments are made to customs basis trade data when there is no change in ownership and additional adjustments are made for transactions between Canadians and non-residents for gold which remains in Canada.
- *Other adjustments* include United States/Canada Trade reconciliation, advertising, official valuation, freight and other adjustments.

#### Timing

- *Grains:* The Canadian Grain Commission's records of grain clearances from exporting warehouses during the full calendar month are used to adjust Trade of Canada series for grain exports. The volume of clearances obtained from this source are combined with unit values from customs-based series to derive hybrid estimates which are substituted for original customs series.
- *Energy:* Trade in electricity; exports of crude petroleum and natural gas, and imports of "swap oil" from the United States, are adjusted to account for the one month reporting lag. Starting with January 1984 data, the adjustments apply only to the current month for exports of electricity, crude petroleum and natural gas, as customs based data are shifted back one month, thus reflecting the true statistical month.
- *Ships, Civil Aircraft and Military Equipment:* The adjustment substitutes progress payments in connection with the construction of ships, civil aircraft and some military equipment, in place of the actual deliveries of the equipment recorded in the Trade of Canada series.

For detailed description of sources and methods please refer to Cat. 67-506E Occasional *"The Canadian Balance of International Payments and International Investment Position"*.

#### Geographic Classification

On a balance of payments basis, trade with the United States includes trade with Puerto Rico and the Virgin Islands.

## COMMERCE DES MARCHANDISES (BASE DE LA BALANCE DES PAIEMENTS)

Les statistiques présentées à la partie I (graphiques et tableaux analytiques) seront ajustées conformément aux concepts et aux définitions des comptes nationaux. Les corrections apportées aux chiffres douaniers aux fins de la balance des paiements sont intégrées au niveau des groupes pour rendre ces données compatibles avec celles du système des comptes nationaux.

### Corrections en fonction de la balance des paiements

#### Champ d'observation ou évaluation

- *Produits automobiles:* On effectue dans le cas des exportations d'automobiles et de camions et des importations de pièces de véhicules automobiles, une déduction ayant pour objet de corriger rétroactivement la valeur et de tenir compte des frais d'outillage spéciaux et autres.
- *Or:* On corrige les données douanières du commerce quand il n'y a pas de changement de propriété et on effectue des corrections supplémentaires pour les transactions au Canada entre les canadiens et les étrangers.
- *Les autres corrections* comprennent le rapprochement du commerce entre les États-Unis et le Canada, la publicité, l'évaluation officielle, les frais de transport et autres.

#### Période

- *Céréales:* Les données des exportations de grains tirées des séries du Commerce du Canada sont ajustées en fonction des chiffres que renferment les dossiers des expéditions de grains des entrepôts d'exportation établis par la Commission canadienne des grains pour un mois civil donné. Le volume des expéditions obtenu de cette source est combiné aux chiffres obtenus des séries douanières pour produire des estimations mixtes qui remplacent les séries douanières initiales.
- *Énergie:* Le commerce de l'électricité, les exportations de pétrole brut et de gaz naturel et les importations de pétrole d'échange des États-Unis, sont ajustés pour tenir compte du délai de déclaration d'un mois. À compter des données de janvier 1984, les corrections ne s'appliquent qu'au mois courant dans le cas des exportations d'électricité, de pétrole brut et de gaz naturel, étant donné que les chiffres douaniers sont décalés d'un mois, de sorte qu'ils correspondent au mois statistique véritable.
- *Navires, avions civils et matériel militaire:* Les ajustements remplacent les chiffres des livraisons réelles de matériel compris dans les séries du Commerce du Canada par les paiements échelonnés effectués relativement à la construction de navires, d'avions civils et de certains articles de matériel militaire.

Pour obtenir une description détaillée des sources et des méthodes, se référer à la publication 67-506F au catalogue, (hors série) *La balance des paiements et le bilan des investissements internationaux du Canada*.

#### Classification géographique

Sur la base de la balance des paiements, le commerce avec les États-Unis englobe le commerce avec Porto Rico et les îles Vierges.

## Seasonal Adjustment

Total exports (domestic exports and re-exports) and imports on a seasonally adjusted basis are now calculated indirectly as the sum of approximately sixty commodity aggregates. Where stable seasonality cannot be reliably identified, the series is not seasonally adjusted. Therefore, seasonally adjusted total exports and imports represent a combination of raw and seasonally adjusted data. Previously the total was seasonally adjusted from raw data at the total level.

## Price Indexes

### Timing

From 1971 to 1983, the export price indexes for electricity, natural gas and crude petroleum on a customs basis which were lagged one month have been adjusted to represent the true calendar month. Similarly, the import price index for crude petroleum from the United States on a customs basis has been adjusted and recombined with the "Other country" import price index in order to arrive at an "All country" import price index. From January 1984, onward, the one month lag is now corrected on a customs basis.

### Aggregate Levels

Indexes at an aggregate level (section and total levels) are calculated by using value weights on a balance of payments basis with price indexes derived from customs data.

## Data Availability

Data on a balance of payments basis are available on CANSIM.

## Désaisonnalisation

Le total des exportations (exportations nationales et réexportations) et les importations désaisonnalisées sont maintenant calculés indirectement, étant constitués de la somme d'environ soixante groupes de produits. Lorsqu'il est impossible de déceler une variation saisonnière régulière, les séries ne sont pas désaisonnalisées. Par conséquent, le total désaisonnalisé des exportations et des importations est constitué d'une combinaison de données brutes et de données désaisonnalisées. Auparavant, le total était désaisonnalisé à partir des totaux bruts.

## Indices des prix

### Période

Les indices des prix à l'exportation, exprimés en chiffres douaniers, de l'électricité, du gaz naturel et du pétrole brut pour 1971 à 1983, qui étaient décalés d'un mois, ont été corrigés et correspondent actuellement au mois civil réel. De même, l'indice des prix à l'importation du pétrole brut des États-Unis, exprimé en chiffres douaniers, a été corrigé et combiné à l'indice des prix à l'importation des "Autres pays" de façon à produire un indice des prix à l'importation pour "Tous les pays". Le décalage d'un mois est corrigé dans les chiffres douaniers depuis janvier 1984.

### Niveau agrégé

Les indices agrégés (section et total) sont calculés à l'aide de poids fonctions de la valeur, sur la base de la balance des paiements, à partir d'indices de prix obtenus des données douanières.

## Disponibilité des données

Les données sur la base de la balance des paiements se trouvent dans CANSIM.

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

(1) La tendance à court terme donne une meilleure idée de la direction et du taux de variation des échanges commerciaux en mettant en moyenne les appréciables fluctuations mensuelles qui se produisent fréquemment dans ces derniers. La tendance pour le dernier mois n'est pas reportée sur les diagrammes ci-dessus parce qu'elle change fréquemment de façon appréciable avec l'inclusion des données des mois suivants.

## EXPLANATORY NOTES

- A. **Sources of Statistics:** Canada's international trade statistics are tabulated from copies of administrative documents collected by Revenue Canada, Customs at its ports across Canada. The Customs Act requires that each time goods are imported into or exported from Canada a document be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation of international trade statistics is determined and limited to some extent by Customs regulations and procedures. Where these affect the precise or consistent application of the statistical principles explained in the following section, their impact is described in qualitative terms only.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, for administrative reasons, be obtained from Customs documents. Trade in electricity is instead reported through the National Energy Board, while statistics on exports of crude petroleum and natural gas (by pipeline) are collected directly by the Industry Division of Statistics Canada; with important statistical consequences explained in Note 4.

Commencing with the May 1984 data export statistics for shipments of less than \$5,000 (up from \$2,500) and greater than \$800 (up from \$500) from Quebec, Ontario, Manitoba and British Columbia to the United States are estimated on the basis of a 20 per cent sample. The size of this sample is at present approximately 15,000 (up from 10,000) shipments per month. For further information, refer to the explanatory notes in the publication *Exports by Commodities* (cat. no. 65-004).

Effective January 1, 1982, the 10 per cent systematic sample of low valued import documents from the United States, as applied since January 1969 and revised in January 1975, has been discontinued. Starting with January 1984 data, all shipments exceeding \$800 are processed and compiled by complete count, while the value of shipments below \$800 is estimated. Prior to 1984 the low-value limit was \$500.

- B. **Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:** The most comprehensive set of principles for the compilation of trade statistics is to be found in *International Trade Statistics: Concepts and Definitions*, published by the United National Statistical Office (series M, No. 52; New York). The following notes are both a summary of these principles and a description of the choices and exceptions made in the case of Canada's international trade statistics.

1. **System of Trade:** Canadian statistics are tabulated according to the "general" system of trade. Thus *imports* include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. *Domestic exports* include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). *Re-exports* are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). *Total exports* are the sum of *Domestic* and *Re-exports*.

## NOTES EXPLICATIVES

- A. **Sources des statistiques:** Les statistiques sur le commerce international du Canada sont totalisées à partir des copies des documents administratifs recueillis par Revenu Canada (Douanes) dans ses bureaux de douane par tout le Canada. La Loi sur les douanes exige que chaque fois que des marchandises sont importées au Canada ou exportées du pays, une déclaration soit faite précisant la nature des marchandises et donnant le détail de l'opération commerciale d'après les besoins de la réglementation de l'administration douanière. Il s'ensuit que la méthode de production de statistiques sur le commerce international est déterminée et limitée dans une certaine mesure par les règlements et les procédures des douanes. Lorsque ceux-ci nuisent à l'application précise ou uniforme des principes statistiques exposés dans la section suivante, leur incidence est décrite en termes qualitatifs seulement.

Les statistiques sur le commerce de l'énergie électrique et sur les exportations de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Le commerce de l'énergie électrique est plutôt fourni par l'intermédiaire de l'Office national d'énergie, tandis que les statistiques sur les exportations de pétrole brut et de gaz naturel (par oléoduc) sont recueillies directement par la Division de l'industrie de Statistique Canada; les conséquences importantes sur le plan statistique sont expliquées à la note 4.

Commencant avec les données de mai 1984 les chiffres d'exportation portant sur les livraisons avec une valeur inférieure à \$5,000 (était \$2,500) et plus que \$800 (était \$500) en provenance du Québec, de l'Ontario, du Manitoba et de la Colombie-Britannique vers les États-Unis sont préparés d'après un échantillon de 20 pour cent. Cet échantillon comprend actuellement approximativement 15,000 (était 10,000) envois par mois. Pour plus de renseignements, voir les notes explicatives dans la publication *Exportations par marchandises* (n°. 65-004 au cat.).

À partir du 1<sup>er</sup> janvier 1982, l'échantillonnage systématique de 10 p. 100 du montant des marchandises de faible valeur importés des États-Unis, tel qu'appliqué depuis janvier 1969 et révisé en janvier 1975, a été discontinué. Commencant avec les données de janvier 1984, pour toutes les livraisons dont la valeur excède \$800, le traitement et le calcul sont exhaustifs, alors que la valeur des livraisons inférieures à \$800 est estimée. Avant l'année d'enquête 1984, la limite de faible valeur était \$500.

- B. **Concepts et définitions utilisés dans la production de statistiques sur le commerce international:** L'ensemble le plus complet de principes directeurs pour la préparation de ces statistiques est présenté dans *Statistiques du commerce international: concepts et définitions*, publié par le Bureau de statistique des Nations Unies (série M, n°. 52, New York). Les notes suivantes résument ces principes et décrivent les choix et les exceptions dans le cas de la statistique du commerce international du Canada.

1. **Système commercial:** Les statistiques canadiennes sont totalisées selon le système commercial "général". Ainsi, les *importations* comprennent tous les biens qui ont franchi les limites géographiques du Canada, qu'ils soient passés par les douanes pour être consommés immédiatement au Canada ou qu'ils aient été entreposés en douane. Les *exportations nationales* comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les *réexportations* sont des exportations de biens d'origine étrangère qui n'ont pas été transformés matériellement au Canada (y compris les biens retirés des entrepôts de douane en vue de leur exportation). Les *exportations totales* correspondent au total des *exportations nationales* et *réexportations*.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic and settlers' effects are excluded for practical reasons. Goods which cross the Canadian border for convenience of transportation only are not included in trade statistics.

2. **Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments of receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks, and bonds are also excluded from the trade statistics.
3. **Valuation:** Exports are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g., mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

*Imports* are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

4. **Timing:** Until January 1979, statistics for a month included all shipments for which Customs documents were received at Statistics Canada up to, and including, the last working day of the month. Starting with data for August 1979, the closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. Individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents. Trade in electricity; exports of both crude petroleum and natural gas; and imports of "Swap Oil" from the United States

La statistique du commerce ne prend pas en compte les exportations vers des missions diplomatiques ou militaires canadiennes à l'étranger ni les importations attribuables à des missions étrangères semblables au Canada, car on considère que ces missions ne se trouvent pas hors des limites géographiques du pays qui les a envoyées. Les achats ou les ventes d'approvisionnement de navires ou d'aéronefs affectés au transport international et les effets des immigrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont laissés hors compte.

2. **Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui seront renvoyés dans le pays exportateur après un court laps de temps sont exclus de la statistique du commerce (lorsque cette intention se dégage des documents de douane). Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en vue d'une course, les films exportés pour être développés, puis retournés. Les biens exportés ou importés pour fins de réparation seulement ne sont pas pris en compte, bien que les paiements ou les recettes au titre des réparations soient portés dans la statistique du commerce. Des avoirs financiers comme le numéraire non périmé, les actions et les obligations sont également laissés hors compte.
3. **Evaluation:** Les *exportations* sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.

Les *importations* sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane.) Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de "livraison" et leur prix englobe par conséquent les frais de transport.

4. **Période:** Jusqu'à juillet 1979, les statistiques d'un mois donné visaient toutes les livraisons pour lesquelles Statistique Canada avait reçu des documents de douane jusqu'au dernier jour ouvrable du mois. À partir du mois d'août 1979, la fin du mois statistique correspond au dernier jour du mois civil où s'effectue, dans la mesure du possible, le dédouanement. De diverses livraisons peuvent ne pas être prises en compte dès leur arrivée ou leur départ à cause de la procédure administrative qui donne lieu à une présentation tardive des documents. Le commerce d'énergie électrique, les exportations de pétrole brut et de gaz naturel, et les importations selon l'arrangement avec les États-Unis pour des échanges de pétrole brut d'un mois donné sont présentés dans

for a given month are included in statistics for the following month because they are collected too late for inclusion in statistics for the current month. However, starting with the January 1984 data, exports of electricity, crude petroleum, and natural gas are subsequently shifted back one month, thus reflecting the true statistical month.

5. **Trading Partner Attribution:** The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and therefore does not reflect the views or intentions of the government of Canada on international issues of recognition, sovereignty or jurisdiction.

*Exports* are attributed to the country which is the last known destination of the goods at the time of export. (Many primary products are shipped to entrepôt points, particularly in Europe, for re-export to the ultimate destination which is unknown when the goods leave Canada.)

*Imports* are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country.

## 6. Revisions:

- a. **Data for current month:** Statistics for the current month published in the "Preliminary Statement of Canadian International Trade" (65-001P) and in the "Summary of Canadian International Trade" (65-001) contain preliminary figures. However, figures published in "Imports by Commodities" (65-007), "Exports by Commodities" (65-004), "Imports by Countries" (65-006) and "Exports by Countries" (65-003) have been verified for reporting or processing errors.
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the monthly reports for December have been published. In the case of the "Summary of Canadian International Trade" (65-001), the revised December figures appear in the January issue of the following year. Commodity/Country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the reports 65-007 and 65-004.
- c. **Data for the previous year:** Revisions to the previous year appear in the December issue of the following year. Commodity/Country figures revised at that time are shown at the beginning of the reports 65-007 and 65-004. *When statistical series are adjusted for seasonal variations, the revised figures are reflected in the April issue of the "Summary of Canadian International Trade" (65-001).*

**Note:** Cumulative totals in all reports reflect the revisions applied up to the date of printing.

les statistiques du mois suivant parce qu'on obtient les données trop tard pour qu'elles puissent faire partie des statistiques du mois courant. Cependant, à compter des données de janvier 1984, les exportations d'électricité, de pétrole brut et de gaz naturel sont décalées d'un mois par la suite, de sorte qu'elles correspondent au mois statistique véritable.

5. **Attribution des partenaires commerciaux:** La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue aux fins de la géographie économique et ne reflète donc pas l'opinion du Gouvernement du Canada relativement aux questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Les *exportations* sont attribuées au pays de dernière destination connue au moment de l'exportation. (De nombreux produits "primaires" sont expédiés vers des points d'entreposage, notamment en Europe, en vue de leur réexportation; la destination ultime de ces produits est inconnue lorsqu'ils quittent le Canada.)

Les *importations* sont attribuées au pays de première consignation directe des biens au Canada, que ce soit ou non le pays d'origine. On déroge à cette règle dans le cas des biens ayant comme région d'origine l'Amérique centrale ou l'Amérique du sud et expédiés au Canada depuis les États-Unis; ces importations sont portées au crédit du pays d'origine, sauf pour les échanges de pétrole brut avec les États-Unis qui sont crédités à ce pays.

## 6. Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant figurant dans le communiqué "Préliminaire sur le commerce international du Canada" (65-001P) et le "Sommaire du commerce international du Canada" (65-001) contiennent des chiffres préliminaires. Cependant, les chiffres dans "Importations par marchandises" (65-007), "Exportations par marchandises" (65-004), "Importations par pays" (65-006) et "Exportations par pays" (65-003) ont été vérifiés pour des erreurs de déclaration et de traitement.
- b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications mensuelles de décembre. Dans le cas de "Sommaire du commerce international du Canada" (65-001), les chiffres de décembre rectifiés paraîtront dans l'édition de janvier de l'année suivante. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/pays figurent dans les rapports mensuels au commencement des publications 65-007 et 65-004.
- c. **Données de l'année précédente:** Les rectifications à l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise/pays rectifiés à ce moment-là figurent au commencement des publications 65-007 et 65-004. *Quand les séries statistiques sont désaisonnalisées, les chiffres rectifiés sont pris en compte dans l'édition d'avril de "Sommaire du commerce international du Canada" (65-001).*

**Nota:** Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

7. **Indexes of Price and Volume:** The price indexes in this publication are current-weighted and are calculated from price relatives based on 1971 = 100. The weights are trade quantities for the month, quarter or year to which the index refers and hence change from period to period. The volume index is derived by dividing a value index by the corresponding current-weighted price index. The resulting volume index is, therefore, weighted with fixed 1971 price weights. The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign statistics.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled "The 1971-based Price and Volume Indexes of Canada's External Trade", published in December 1976 as a supplement to this publication (65-001).

Current and fixed weighted export and import price and volume indexes on a Balance of Payments Basis presented in Part I of this publication are also available on CANSIM in matrices 3643, 3644, 3649, 3650, 3683 and 3684.

Customs based current and fixed weighted price indexes for the United States and the 10 SITC sections are available on CANSIM in matrices 3680, 3681, 3715, 3716.

8. **Provincial Detail:** Prior to the 1984 data year, *exports* statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain cases this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Commencing with the 1984 data, Statistics Canada and Customs & Excise, Revenue Canada have taken measures requiring the reporting of export shipments on a province of origin basis. It is recognized that the exporting community will be unable to effect the new provincial definition on a given date; therefore there will be a period of transition.

*Imports* statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed or enter the productive process.

9. **Principal Trading areas:** The "principal trading areas" shown in some tables include groupings which are defined as follows:

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands and Greece (effective January 1981). The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada.

7. **Indices de prix et de volume:** Les indices de prix compris dans cette publication sont pondérés d'après les quantités mensuelles, trimestrielles ou annuelles du commerce correspondant à la période de l'indice et sont calculés d'après des prix relatifs de base 1971 = 100. Par conséquence ces pondérations sont variables d'une période à l'autre. Les indices du volume sont calculés en divisant l'indice de la valeur par l'indice du prix correspondant. L'indice du volume obtenu est donc implicitement pondéré par les prix fixes de l'année 1971. Les prix relatifs sont dérivés ou des valeurs unitaires calculés directement des statistiques du commerce international ou surtout pour les produits finis, des indices de prix obtenus d'autres sources canadiennes ou de l'étranger.

Des renseignements concernant la méthodologie employée dans le calcul des indices sont donnés dans un document de référence intitulé "Les indices de prix et de volume de base 1971 du commerce extérieur du Canada" publié en décembre 1976 sous forme de supplément à la présente publication (65-001).

Les indices de prix et de volume des exportations canadiennes et des importations, à pondération courante et fixe sur la base de la balance des paiements présentés dans la Partie I de cette publication sont aussi disponibles sur CANSIM dans les matrices 3643, 3644, 3649, 3650, 3683 et 3684.

Les indices de prix, à pondération courante et fixe, sur la base douanière pour les États-Unis et pour les 10 sections de la CTCI sont disponibles sur CANSIM dans les matrices 3680, 3681, 3715 et 3716.

8. **Statistiques provinciales:** Avant l'année d'enquête 1984, les statistiques sur les *exportations* par province de chargement indiquaient la province où les produits avaient été chargés initialement pour être exportés. Dans certains cas, il ne s'agissait pas de la province d'origine qui se définit comme étant la province où les produits ont été cultivés, extraits ou fabriqués.

À partir de l'année d'enquête 1984, Statistique Canada et Revenu Canada-Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées par province d'origine. Il est certain que les exportateurs ne pourront appliquer la nouvelle définition provinciale à une date précise, aussi faut-il prévoir une période de transition qui aura une incidence sur les statistiques.

Les statistiques des *importations* par province de dédouanement présentent la province où les biens ont passé la douane en vue d'une consommation immédiate ou de leur entreposage en douane; cette province peut différer de la province de consommation ou d'entrée dans l'activité productive.

9. **Marchés principaux:** Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:

**Autres C.E.E.:** Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas et Grèce (à partir de janvier 1981). Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada.

**Other O.E.C.D.:** Austria, Finland, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of O.E.C.D. – the Organization for Economic Cooperation and Development.)

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

10. **Sources of Further Information:** More detailed monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time. For example, The Reconciliation of U.S.-Canada Trade Statistics, published by the United States - Canada Trade Statistics Committee, is available on request from the address given below.

Trade statistics are also available on the CANSIM Main Base in the following matrices: 0021, 0022, 0876 to 0879, 3643, 3644, 3649 to 3719.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

**Autres O.C.D.E.:** Autriche, Espagne, Finlande, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. – l'Organisation pour la coopération et le développement économique.)

**Autres Amérique:** Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

10. **Sources de renseignements supplémentaires:** Des statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également se procurer des descriptions détaillées et des index des classifications de marchandises. Veuillez consulter le catalogue des publications de Statistique Canada pour une description du contenu des diverses publications. La recherche continue dans le domaine de la statistique du commerce donne naissance de temps à autre à de nouveaux documents de référence. Ainsi, on peut obtenir à l'adresse mentionnée ci-dessous un document sur le rapprochement des statistiques du commerce États-Unis-Canada publié par le comité de la statistique du commerce États-Unis-Canada.

Les statistiques sur le commerce sont également offertes sur la base principale de CANSIM dans les matrices suivantes: 0021, 0022, 0876 à 0879, 3643, 3644, 3649 à 3719.

Toute question au sujet des méthodes employées doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa, Ontario K1A 0T6.

## Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit,  
International Trade Division,

## Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## MERCHANDISE TRADE (BALANCE OF PAYMENTS BASIS)

The statistics presented in Part I (Analytical Charts and Tables) are adjusted to conform with the National Accounts concepts and definitions. Balance of Payments adjustments to Customs Basis data are incorporated at an aggregated level in order to make them compatible with the system of National Accounts.

### Balance of Payments Adjustments

#### Coverage or Valuation

- *Automotive Products:* Deductions are made for both exports of cars and trucks and imports of automotive parts for retroactive value adjustments and for special tooling and other charges.
- *Gold:* Adjustments are made to customs basis trade data when there is no change in ownership and additional adjustments are made for transactions between Canadians and non-residents for gold which remains in Canada.
- *Other adjustments* include United States/Canada Trade reconciliation, advertising, official valuation, freight and other adjustments.

#### Timing

- *Grains:* The Canadian Grain Commission's records of grain clearances from exporting warehouses during the full calendar month are used to adjust Trade of Canada series for grain exports. The volume of clearances obtained from this source are combined with unit values from customs-based series to derive hybrid estimates which are substituted for original customs series.
- *Energy:* Trade in electricity; exports of crude petroleum and natural gas, and imports of "swap oil" from the United States, are adjusted to account for the one month reporting lag. Starting with January 1984 data, the adjustments apply only to the current month for exports of electricity, crude petroleum and natural gas, as customs based data are shifted back one month, thus reflecting the true statistical month.
- *Ships, Civil Aircraft and Military Equipment:* The adjustment substitutes progress payments in connection with the construction of ships, civil aircraft and some military equipment, in place of the actual deliveries of the equipment recorded in the Trade of Canada series.

For detailed description of sources and methods please refer to Cat. 67-506E Occasional *"The Canadian Balance of International Payments and International Investment Position"*.

#### Geographic Classification

On a balance of payments basis, trade with the United States includes trade with Puerto Rico and the Virgin Islands.

## COMMERCE DES MARCHANDISES (BASE DE LA BALANCE DES PAIEMENTS)

Les statistiques présentées à la partie I (graphiques et tableaux analytiques) seront ajustées conformément aux concepts et aux définitions des comptes nationaux. Les corrections apportées aux chiffres douaniers aux fins de la balance des paiements sont intégrées au niveau des groupes pour rendre ces données compatibles avec celles du système des comptes nationaux.

### Corrections en fonction de la balance des paiements

#### Champ d'observation ou évaluation

- *Produits automobiles:* On effectue dans le cas des exportations d'automobiles et de camions et des importations de pièces de véhicules automobiles, une déduction ayant pour objet de corriger rétroactivement la valeur et de tenir compte des frais d'outillage spéciaux et autres.
- *Or:* On corrige les données douanières du commerce quand il n'y a pas de changement de propriété et on effectue des corrections supplémentaires pour les transactions au Canada entre les canadiens et les étrangers.
- *Les autres corrections* comprennent le rapprochement du commerce entre les États-Unis et le Canada, la publicité, l'évaluation officielle, les frais de transport et autres.

#### Période

- *Céréales:* Les données des exportations de grains tirées des séries du Commerce du Canada sont ajustées en fonction des chiffres que renferment les dossiers des expéditions de grains des entrepôts d'exportation établis par la Commission canadienne des grains pour un mois civil donné. Le volume des expéditions obtenu de cette source est combiné aux chiffres obtenus des séries douanières pour produire des estimations mixtes qui remplacent les séries douanières initiales.
- *Énergie:* Le commerce de l'électricité, les exportations de pétrole brut et de gaz naturel et les importations de pétrole d'échange des États-Unis, sont ajustés pour tenir compte du délai de déclaration d'un mois. À compter des données de janvier 1984, les corrections ne s'appliquent qu'au mois courant dans le cas des exportations d'électricité, de pétrole brut et de gaz naturel, étant donné que les chiffres douaniers sont décalés d'un mois, de sorte qu'ils correspondent au mois statistique véritable.
- *Navires, avions civils et matériel militaire:* Les ajustements remplacent les chiffres des livraisons réelles de matériel compris dans les séries du Commerce du Canada par les paiements échelonnés effectués relativement à la construction de navires, d'avions civils et de certains articles de matériel militaire.

Pour obtenir une description détaillée des sources et des méthodes, se référer à la publication 67-506F au catalogue, (hors série) *La balance des paiements et le bilan des investissements internationaux du Canada*.

#### Classification géographique

Sur la base de la balance des paiements, le commerce avec les États-Unis englobe le commerce avec Porto Rico et les îles Vierges.

## Seasonal Adjustment

Total exports (domestic exports and re-exports) and imports on a seasonally adjusted basis are now calculated indirectly as the sum of approximately sixty commodity aggregates. Where stable seasonality cannot be reliably identified, the series is not seasonally adjusted. Therefore, seasonally adjusted total exports and imports represent a combination of raw and seasonally adjusted data. Previously the total was seasonally adjusted from raw data at the total level.

## Price Indexes

### Timing

From 1971 to 1983, the export price indexes for electricity, natural gas and crude petroleum on a customs basis which were lagged one month have been adjusted to represent the true calendar month. Similarly, the import price index for crude petroleum from the United States on a customs basis has been adjusted and recombined with the "Other country" import price index in order to arrive at an "All country" import price index. From January 1984, onward, the one month lag is now corrected on a customs basis.

### Aggregate Levels

Indexes at an aggregate level (section and total levels) are calculated by using value weights on a balance of payments basis with price indexes derived from customs data.

## Data Availability

Data on a balance of payments basis are available on CANSIM.

## Désaisonnalisation

Le total des exportations (exportations nationales et réexportations) et les importations désaisonnalisées sont maintenant calculés indirectement, étant constitués de la somme d'environ soixante groupes de produits. Lorsqu'il est impossible de déceler une variation saisonnière régulière, les séries ne sont pas désaisonnalisées. Par conséquent, le total désaisonné des exportations et des importations est constitué d'une combinaison de données brutes et de données désaisonnalisées. Auparavant, le total était désaisonné à partir des totaux bruts.

## Indices des prix

### Période

Les indices des prix à l'exportation, exprimés en chiffres douaniers, de l'électricité, du gaz naturel et du pétrole brut pour 1971 à 1983, qui étaient décalés d'un mois, ont été corrigés et correspondent actuellement au mois civil réel. De même, l'indice des prix à l'importation du pétrole brut des États-Unis, exprimé en chiffres douaniers, a été corrigé et combiné à l'indice des prix à l'importation des "Autres pays" de façon à produire un indice des prix à l'importation pour "Tous les pays". Le décalage d'un mois est corrigé dans les chiffres douaniers depuis janvier 1984.

### Niveau agrégé

Les indices agrégés (section et total) sont calculés à l'aide de poids fonctions de la valeur, sur la base de la balance des paiements, à partir d'indices de prix obtenus des données douanières.

## Disponibilité des données

Les données sur la base de la balance des paiements se trouvent dans CANSIM.

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

(1) La tendance à court terme donne une meilleure idée de la direction et du taux de variation des échanges commerciaux en mettant en moyenne les appréciables fluctuations mensuelles qui se produisent fréquemment dans ces derniers. La tendance pour le dernier mois n'est pas reportée sur les diagrammes ci-dessus parce qu'elle change fréquemment de façon appréciable avec l'inclusion des données des mois suivants.

## EXPLANATORY NOTES

- A. **Sources of Statistics:** Canada's international trade statistics are tabulated from copies of administrative documents collected by Revenue Canada, Customs at its ports across Canada. The Customs Act requires that each time goods are imported into or exported from Canada a document be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation of international trade statistics is determined and limited to some extent by Customs regulations and procedures. Where these affect the precise or consistent application of the statistical principles explained in the following section, their impact is described in qualitative terms only.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, for administrative reasons, be obtained from Customs documents. Trade in electricity is instead reported through the National Energy Board, while statistics on exports of crude petroleum and natural gas (by pipeline) are collected directly by the Industry Division of Statistics Canada; with important statistical consequences explained in Note 4.

Commencing with the May 1984 data export statistics for shipments of less than \$5,000 (up from \$2,500) and greater than \$800 (up from \$500) from Quebec, Ontario, Manitoba and British Columbia to the United States are estimated on the basis of a 20 per cent sample. The size of this sample is at present approximately 15,000 (up from 10,000) shipments per month. For further information, refer to the explanatory notes in the publication *Exports by Commodities* (cat. no. 65-004).

Effective January 1, 1982, the 10 per cent systematic sample of low valued import documents from the United States, as applied since January 1969 and revised in January 1975, has been discontinued. Starting with January 1984 data, all shipments exceeding \$800 are processed and compiled by complete count, while the value of shipments below \$800 is estimated. Prior to 1984 the low-value limit was \$500.

- B. **Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:** The most comprehensive set of principles for the compilation of trade statistics is to be found in *International Trade Statistics: Concepts and Definitions*, published by the United Nations Statistical Office (series M, No. 52; New York). The following notes are both a summary of these principles and a description of the choices and exceptions made in the case of Canada's international trade statistics.

1. **System of Trade:** Canadian statistics are tabulated according to the "general" system of trade. Thus *imports* include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. *Domestic exports* include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). *Re-exports* are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). *Total exports* are the sum of *Domestic* and *Re-exports*.

## NOTES EXPLICATIVES

- A. **Sources des statistiques:** Les statistiques sur le commerce international du Canada sont totalisées à partir des copies des documents administratifs recueillis par Revenu Canada (Douanes) dans ses bureaux de douane par tout le Canada. La Loi sur les douanes exige que chaque fois que des marchandises sont importées au Canada ou exportées du pays, une déclaration soit faite précisant la nature des marchandises et donnant le détail de l'opération commerciale d'après les besoins de la réglementation de l'administration douanière. Il s'ensuit que la méthode de production de statistiques sur le commerce international est déterminée et limitée dans une certaine mesure par les règlements et les procédures des douanes. Lorsque ceux-ci nuisent à l'application précise ou uniforme des principes statistiques exposés dans la section suivante, leur incidence est décrite en termes qualitatifs seulement.

Les statistiques sur le commerce de l'énergie électrique et sur les exportations de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Le commerce de l'énergie électrique est plutôt fourni par l'intermédiaire de l'Office national d'énergie, tandis que les statistiques sur les exportations de pétrole brut et de gaz naturel (par oléoduc) sont recueillies directement par la Division de l'industrie de Statistique Canada; les conséquences importantes sur le plan statistique sont expliquées à la note 4.

Commençant avec les données de mai 1984 les chiffres d'exportation portant sur les livraisons avec une valeur inférieure à \$5,000 (était \$2,500) et plus que \$800 (était \$500) en provenance du Québec, de l'Ontario, du Manitoba et de la Colombie-Britannique vers les États-Unis sont préparés d'après un échantillon de 20 pour cent. Cet échantillon comprend actuellement approximativement 15,000 (était 10,000) envois par mois. Pour plus de renseignements, voir les notes explicatives dans la publication *Exportations par marchandises* (nº. 65-004 au cat.).

À partir du 1<sup>er</sup> janvier 1982, l'échantillonnage systématique de 10 p. 100 du montant des marchandises de faible valeur importés des États-Unis, tel qu'appliqué depuis janvier 1969 et révisé en janvier 1975, a été discontinué. Commençant avec les données de janvier 1984, pour toutes les livraisons dont la valeur excède \$800, le traitement et le calcul sont exhaustifs, alors que la valeur des livraisons inférieures à \$800 est estimée. Avant l'année d'enquête 1984, la limite de faible valeur était \$500.

- B. **Concepts et définitions utilisés dans la production de statistiques sur le commerce international:** L'ensemble le plus complet de principes directeurs pour la préparation de ces statistiques est présenté dans *Statistiques du commerce international: concepts et définitions*, publié par le Bureau de statistique des Nations Unies (série M, nº. 52, New York). Les notes suivantes résument ces principes et décrivent les choix et les exceptions dans le cas de la statistique du commerce international du Canada.

1. **Système commercial:** Les statistiques canadiennes sont totalisées selon le système commercial "général". Ainsi, les *importations* comprennent tous les biens qui ont franchi les limites géographiques du Canada, qu'ils soient passés par les douanes pour être consommés immédiatement au Canada ou qu'ils aient été entreposés en douane. Les *exportations nationales* comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les *réexportations* sont des exportations de biens d'origine étrangère qui n'ont pas été transformés matériellement au Canada (y compris les biens retirés des entrepôts de douane en vue de leur exportation). Les *exportations totales* correspondent au total des *exportations nationales* et *réexportations*.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic and settlers' effects are excluded for practical reasons. Goods which cross the Canadian border for convenience of transportation only are not included in trade statistics.

2. **Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments of receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks, and bonds are also excluded from the trade statistics.

3. **Valuation:** Exports are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g., mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

*Imports* are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

4. **Timing:** Until January 1979, statistics for a month included all shipments for which Customs documents were received at Statistics Canada up to, and including, the last working day of the month. Starting with data for August 1979, the closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. Individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents. Trade in electricity; exports of both crude petroleum and natural gas; and imports of "Swap Oil" from the United States

La statistique du commerce ne prend pas en compte les exportations vers des missions diplomatiques ou militaires canadiennes à l'étranger ni les importations attribuables à des missions étrangères semblables au Canada, car on considère que ces missions ne se trouvent pas hors des limites géographiques du pays qui les a envoyées. Les achats ou les ventes d'approvisionnement de navires ou d'aéronefs affectés au transport international et les effets des immigrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont laissés hors compte.

2. **Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui seront renvoyés dans le pays exportateur après un court laps de temps sont exclus de la statistique du commerce (lorsque cette intention se dégage des documents de douane). Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en vue d'une course, les films exportés pour être développés, puis retournés. Les biens exportés ou importés pour fins de réparation seulement ne sont pas pris en compte, bien que les paiements ou les recettes au titre des réparations soient portés dans la statistique du commerce. Des avoirs financiers comme le numéraire non périmé, les actions et les obligations sont également laissés hors compte.

3. **Evaluation:** Les *exportations* sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.

Les *importations* sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane.) Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de "livraison" et leur prix englobe par conséquent les frais de transport.

4. **Période:** Jusqu'à juillet 1979, les statistiques d'un mois donné visaient toutes les livraisons pour lesquelles Statistique Canada avait reçu des documents de douane jusqu'au dernier jour ouvrable du mois. À partir du mois d'août 1979, la fin du mois statistique correspond au dernier jour du mois civil où s'effectue, dans la mesure du possible, le dédouanement. De diverses livraisons peuvent ne pas être prises en compte dès leur arrivée ou leur départ à cause de la procédure administrative qui donne lieu à une présentation tardive des documents. Le commerce d'énergie électrique, les exportations de pétrole brut et de gaz naturel, et les importations selon l'arrangement avec les États-Unis pour des échanges de pétrole brut d'un mois donné sont présentés dans

for a given month are included in statistics for the following month because they are collected too late for inclusion in statistics for the current month. However, starting with the January 1984 data, exports of electricity, crude petroleum, and natural gas are subsequently shifted back one month, thus reflecting the true statistical month.

5. **Trading Partner Attribution:** The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and therefore does not reflect the views or intentions of the government of Canada on international issues of recognition, sovereignty or jurisdiction.

*Exports* are attributed to the country which is the last known destination of the goods at the time of export. (Many primary products are shipped to entrepôt points, particularly in Europe, for re-export to the ultimate destination which is unknown when the goods leave Canada.)

*Imports* are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country.

## 6. Revisions:

- a. **Data for current month:** Statistics for the current month published in the "Preliminary Statement of Canadian International Trade" (65-001P) and in the "Summary of Canadian International Trade" (65-001) contain preliminary figures. However, figures published in "Imports by Commodities" (65-007), "Exports by Commodities" (65-004), "Imports by Countries" (65-006) and "Exports by Countries" (65-003) have been verified for reporting or processing errors.
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the monthly reports for December have been published. In the case of the "Summary of Canadian International Trade" (65-001), the revised December figures appear in the January issue of the following year. Commodity/Country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the reports 65-007 and 65-004.
- c. **Data for the previous year:** Revisions to the previous year appear in the December issue of the following year. Commodity/Country figures revised at that time are shown at the beginning of the reports 65-007 and 65-004. *When statistical series are adjusted for seasonal variations, the revised figures are reflected in the April issue of the "Summary of Canadian International Trade" (65-001).*

**Note:** Cumulative totals in all reports reflect the revisions applied up to the date of printing.

les statistiques du mois suivant parce qu'on obtient les données trop tard pour qu'elles puissent faire partie des statistiques du mois courant. Cependant, à compter des données de janvier 1984, les exportations d'électricité, de pétrole brut et de gaz naturel sont décalées d'un mois par la suite, de sorte qu'elles correspondent au mois statistique véritable.

5. **Attribution des partenaires commerciaux:** La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue aux fins de la géographie économique et ne reflète donc pas l'opinion du Gouvernement du Canada relativement aux questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Les *exportations* sont attribuées au pays de dernière destination connue au moment de l'exportation. (De nombreux produits "primaires" sont expédiés vers des points d'entrepôt, notamment en Europe, en vue de leur réexportation; la destination ultime de ces produits est inconnue lorsqu'ils quittent le Canada.)

Les *importations* sont attribuées au pays de première consignation directe des biens au Canada, que ce soit ou non le pays d'origine. On déroge à cette règle dans le cas des biens ayant comme région d'origine l'Amérique centrale ou l'Amérique du sud et expédiés au Canada depuis les États-Unis; ces importations sont portées au crédit du pays d'origine, sauf pour les échanges de pétrole brut avec les États-Unis qui sont crédités à ce pays.

## 6. Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant figurant dans le communiqué "Préliminaire sur le commerce international du Canada" (65-001P) et le "Sommaire du commerce international du Canada" (65-001) contiennent des chiffres préliminaires. Cependant, les chiffres dans "Importations par marchandises" (65-007), "Exportations par marchandises" (65-004), "Importations par pays" (65-006) et "Exportations par pays" (65-003) ont été vérifiés pour des erreurs de déclaration et de traitement.
- b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications mensuelles de décembre. Dans le cas de "Sommaire du commerce international du Canada" (65-001), les chiffres de décembre rectifiés paraîtront dans l'édition de janvier de l'année suivante. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/pays figurent dans les rapports mensuels au commencement des publications 65-007 et 65-004.
- c. **Données de l'année précédente:** Les rectifications à l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise/pays rectifiés à ce moment-là figurent au commencement des publications 65-007 et 65-004. *Quand les séries statistiques sont désaisonnalisées, les chiffres rectifiés sont pris en compte dans l'édition d'avril de "Sommaire du commerce international du Canada" (65-001).*

**Nota:** Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

7. **Indexes of Price and Volume:** The price indexes in this publication are current-weighted and are calculated from price relatives based on 1971 = 100. The weights are trade quantities for the month, quarter or year to which the index refers and hence change from period to period. The volume index is derived by dividing a value index by the corresponding current-weighted price index. The resulting volume index is, therefore, weighted with fixed 1971 price weights. The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign statistics.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled "The 1971-based Price and Volume Indexes of Canada's External Trade", published in December 1976 as a supplement to this publication (65-001).

Current and fixed weighted export and import price and volume indexes on a Balance of Payments Basis presented in Part I of this publication are also available on CANSIM in matrices 3643, 3644, 3649, 3650, 3683 and 3684.

Customs based current and fixed weighted price indexes for the United States and the 10 SITC sections are available on CANSIM in matrices 3680, 3681, 3715, 3716.

8. **Provincial Detail:** Prior to the 1984 data year, *exports* statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain cases this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Commencing with the 1984 data, Statistics Canada and Customs & Excise, Revenue Canada have taken measures requiring the reporting of export shipments on a province of origin basis. It is recognized that the exporting community will be unable to effect the new provincial definition on a given date; therefore there will be a period of transition.

*Imports* statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed or enter the productive process.

9. **Principal Trading areas:** The "principal trading areas" shown in some tables include groupings which are defined as follows:

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands and Greece (effective January 1981). The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada.

7. **Indices de prix et de volume:** Les indices de prix compris dans cette publication sont pondérés d'après les quantités mensuelles, trimestrielles ou annuelles du commerce correspondant à la période de l'indice et sont calculés d'après des prix relatifs de base 1971 = 100. Par conséquent ces pondérations sont variables d'une période à l'autre. Les indices du volume sont calculés en divisant l'indice de la valeur par l'indice du prix correspondant. L'indice du volume obtenu est donc implicitement pondéré par les prix fixes de l'année 1971. Les prix relatifs sont dérivés ou des valeurs unitaires calculés directement des statistiques du commerce international ou surtout pour les produits finis, des indices de prix obtenus d'autres sources canadiennes ou de l'étranger.

Des renseignements concernant la méthodologie employée dans le calcul des indices sont donnés dans un document de référence intitulé "Les indices de prix et de volume de base 1971 du commerce extérieur du Canada" publié en décembre 1976 sous forme de supplément à la présente publication (65-001).

Les indices de prix et de volume des exportations canadiennes et des importations, à pondération courante et fixe sur la base de la balance des paiements présentés dans la Partie I de cette publication sont aussi disponibles sur CANSIM dans les matrices 3643, 3644, 3649, 3650, 3683 et 3684.

Les indices de prix, à pondération courante et fixe, sur la base douanière pour les États-Unis et pour les 10 sections de la CTCI sont disponibles sur CANSIM dans les matrices 3680, 3681, 3715 et 3716.

8. **Statistiques provinciales:** Avant l'année d'enquête 1984, les statistiques sur les *exportations* par province de chargement indiquaient la province où les produits avaient été chargés initialement pour être exportés. Dans certains cas, il ne s'agissait pas de la province d'origine qui se définit comme étant la province où les produits ont été cultivés, extraits ou fabriqués.

À partir de l'année d'enquête 1984, Statistique Canada et Revenu Canada-Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées par province d'origine. Il est certain que les exportateurs ne pourront appliquer la nouvelle définition provinciale à une date précise, aussi faut-il prévoir une période de transition qui aura une incidence sur les statistiques.

Les statistiques des *importations* par province de dédouanement présentent la province où les biens ont passé la douane en vue d'une consommation immédiate ou de leur entreposage en douane; cette province peut différer de la province de consommation ou d'entrée dans l'activité productive.

9. **Marchés principaux:** Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:

**Autres C.E.E.:** Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas et Grèce (à partir de janvier 1981). Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada.

**Other O.E.C.D.:** Austria, Finland, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of O.E.C.D. – the Organization for Economic Cooperation and Development.)

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

10. **Sources of Further Information:** More detailed monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time. For example, The Reconciliation of U.S.-Canada Trade Statistics, published by the United States - Canada Trade Statistics Committee, is available on request from the address given below.

Trade statistics are also available on the CANSIM Main Base in the following matrices: 0021, 0022, 0876 to 0879, 3643, 3644, 3649 to 3719.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

**Autres O.C.D.E.:** Autriche, Espagne, Finlande, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. – l'Organisation pour la coopération et le développement économique.)

**Autres Amérique:** Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

10. **Sources de renseignements supplémentaires:** Des statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également se procurer des descriptions détaillées et des index des classifications de marchandises. Veuillez consulter le catalogue des publications de Statistique Canada pour une description du contenu des diverses publications. La recherche continue dans le domaine de la statistique du commerce donne naissance de temps à autre à de nouveaux documents de référence. Ainsi, on peut obtenir à l'adresse mentionnée ci-dessous un document sur le rapprochement des statistiques du commerce États-Unis-Canada publié par le comité de la statistique du commerce États-Unis-Canada.

Les statistiques sur le commerce sont également offertes sur la base principale de CANSIM dans les matrices suivantes: 0021, 0022, 0876 à 0879, 3643, 3644, 3649 à 3719.

Toute question au sujet des méthodes employées doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa, Ontario K1A 0T6.

## Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

### How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Trade Information Unit,  
International Trade Division,

## Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## MERCHANDISE TRADE (BALANCE OF PAYMENTS BASIS)

The statistics presented in Part I (Analytical Charts and Tables) are adjusted to conform with the National Accounts concepts and definitions. Balance of Payments adjustments to Customs Basis data are incorporated at an aggregated level in order to make them compatible with the system of National Accounts.

### Balance of Payments Adjustments

#### Coverage or Valuation

- *Automotive Products:* Deductions are made for both exports of cars and trucks and imports of automotive parts for retroactive value adjustments and for special tooling and other charges.
- *Gold:* Adjustments are made to customs basis trade data when there is no change in ownership and additional adjustments are made for transactions between Canadians and non-residents for gold which remains in Canada.
- *Other adjustments* include United States/Canada Trade reconciliation, advertising, official valuation, freight and other adjustments.

#### Timing

- *Grains:* The Canadian Grain Commission's records of grain clearances from exporting warehouses during the full calendar month are used to adjust Trade of Canada series for grain exports. The volume of clearances obtained from this source are combined with unit values from customs-based series to derive hybrid estimates which are substituted for original customs series.
- *Energy:* Trade in electricity; exports of crude petroleum and natural gas, and imports of "swap oil" from the United States, are adjusted to account for the one month reporting lag. Starting with January 1984 data, the adjustments apply only to the current month for exports of electricity, crude petroleum and natural gas, as customs based data are shifted back one month, thus reflecting the true statistical month.
- *Ships, Civil Aircraft and Military Equipment:* The adjustment substitutes progress payments in connection with the construction of ships, civil aircraft and some military equipment, in place of the actual deliveries of the equipment recorded in the Trade of Canada series.

For detailed description of sources and methods please refer to Cat. 67-506E Occasional "The Canadian Balance of International Payments and International Investment Position".

#### Geographic Classification

On a balance of payments basis, trade with the United States includes trade with Puerto Rico and the Virgin Islands.

## COMMERCE DES MARCHANDISES (BASE DE LA BALANCE DES PAIEMENTS)

Les statistiques présentées à la partie I (graphiques et tableaux analytiques) seront ajustées conformément aux concepts et aux définitions des comptes nationaux. Les corrections apportées aux chiffres douaniers aux fins de la balance des paiements sont intégrées au niveau des groupes pour rendre ces données compatibles avec celles du système des comptes nationaux.

### Corrections en fonction de la balance des paiements

#### Champ d'observation ou évaluation

- *Produits automobiles:* On effectue dans le cas des exportations d'automobiles et de camions et des importations de pièces de véhicules automobiles, une déduction ayant pour objet de corriger rétroactivement la valeur et de tenir compte des frais d'outillage spéciaux et autres.
- *Or:* On corrige les données douanières du commerce quand il n'y a pas de changement de propriété et on effectue des corrections supplémentaires pour les transactions au Canada entre les canadiens et les étrangers.
- *Les autres corrections* comprennent le rapprochement du commerce entre les États-Unis et le Canada, la publicité, l'évaluation officielle, les frais de transport et autres.

#### Période

- *Céréales:* Les données des exportations de grains tirées des séries du Commerce du Canada sont ajustées en fonction des chiffres que renferment les dossiers des expéditions de grains des entrepôts d'exportation établis par la Commission canadienne des grains pour un mois civil donné. Le volume des expéditions obtenu de cette source est combiné aux chiffres obtenus des séries douanières pour produire des estimations mixtes qui remplacent les séries douanières initiales.
- *Énergie:* Le commerce de l'électricité, les exportations de pétrole brut et de gaz naturel et les importations de pétrole d'échange des États-Unis, sont ajustés pour tenir compte du délai de déclaration d'un mois. À compter des données de janvier 1984, les corrections ne s'appliquent qu'au mois courant dans le cas des exportations d'électricité, de pétrole brut et de gaz naturel, étant donné que les chiffres douaniers sont décalés d'un mois, de sorte qu'ils correspondent au mois statistique véritable.
- *Navires, avions civils et matériel militaire:* Les ajustements remplacent les chiffres des livraisons réelles de matériel compris dans les séries du Commerce du Canada par les paiements échelonnés effectués relativement à la construction de navires, d'avions civils et de certains articles de matériel militaire.

Pour obtenir une description détaillée des sources et des méthodes, se référer à la publication 67-506F au catalogue, (hors série) *La balance des paiements et le bilan des investissements internationaux du Canada*.

#### Classification géographique

Sur la base de la balance des paiements, le commerce avec les États-Unis englobe le commerce avec Porto Rico et les îles Vierges.

## Seasonal Adjustment

Total exports (domestic exports and re-exports) and imports on a seasonally adjusted basis are now calculated indirectly as the sum of approximately sixty commodity aggregates. Where stable seasonality cannot be reliably identified, the series is not seasonally adjusted. Therefore, seasonally adjusted total exports and imports represent a combination of raw and seasonally adjusted data. Previously the total was seasonally adjusted from raw data at the total level.

## Price Indexes

### Timing

From 1971 to 1983, the export price indexes for electricity, natural gas and crude petroleum on a customs basis which were lagged one month have been adjusted to represent the true calendar month. Similarly, the import price index for crude petroleum from the United States on a customs basis has been adjusted and recombined with the "Other country" import price index in order to arrive at an "All country" import price index. From January 1984, onward, the one month lag is now corrected on a customs basis.

### Aggregate Levels

Indexes at an aggregate level (section and total levels) are calculated by using value weights on a balance of payments basis with price indexes derived from customs data.

## Data Availability

Data on a balance of payments basis are available on CANSIM.

## Désaisonnalisation

Le total des exportations (exportations nationales et réexportations) et les importations désaisonnalisées sont maintenant calculés indirectement, étant constitués de la somme d'environ soixante groupes de produits. Lorsqu'il est impossible de déceler une variation saisonnière régulière, les séries ne sont pas désaisonnalisées. Par conséquent, le total désaisonné des exportations et des importations est constitué d'une combinaison de données brutes et de données désaisonnalisées. Auparavant, le total était désaisonné à partir des totaux bruts.

## Indices des prix

### Période

Les indices des prix à l'exportation, exprimés en chiffres douaniers, de l'électricité, du gaz naturel et du pétrole brut pour 1971 à 1983, qui étaient décalés d'un mois, ont été corrigés et correspondent actuellement au mois civil réel. De même, l'indice des prix à l'importation du pétrole brut des États-Unis, exprimé en chiffres douaniers, a été corrigé et combiné à l'indice des prix à l'importation des "Autres pays" de façon à produire un indice des prix à l'importation pour "Tous les pays". Le décalage d'un mois est corrigé dans les chiffres douaniers depuis janvier 1984.

### Niveau agrégé

Les indices agrégés (section et total) sont calculés à l'aide de poids fonctions de la valeur, sur la base de la balance des paiements, à partir d'indices de prix obtenus des données douanières.

## Disponibilité des données

Les données sur la base de la balance des paiements se trouvent dans CANSIM.

(1) The short-term trend gives a clearer picture of the direction and rate of change of trade by averaging the substantial monthly fluctuations which frequently occur in trade. The trend for the last month is not shown in the charts above since it frequently changes significantly with the addition of succeeding months of data.

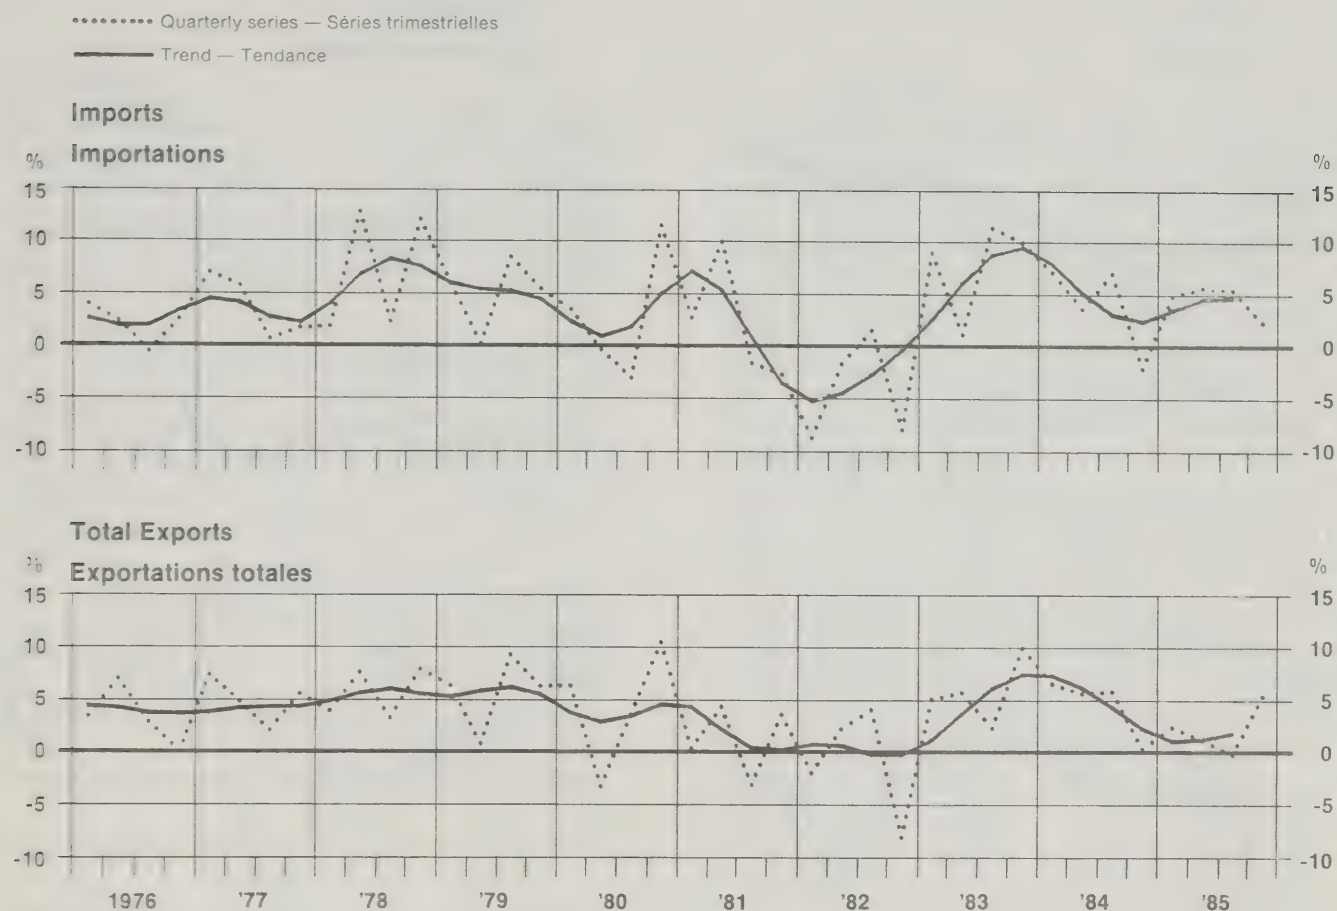

(1) La tendance à court terme donne une meilleure idée de la direction et du taux de variation des échanges commerciaux en mettant en moyenne les appréciables fluctuations mensuelles qui se produisent fréquemment dans ces derniers. La tendance pour le dernier mois n'est pas reportée sur les diagrammes ci-dessus parce qu'elle change fréquemment de façon appréciable avec l'inclusion des données des mois suivants.

## EXPLANATORY NOTES

- A. **Sources of Statistics:** Canada's international trade statistics are tabulated from copies of administrative documents collected by Revenue Canada, Customs at its ports across Canada. The Customs Act requires that each time goods are imported into or exported from Canada a document be filed with Customs giving such descriptions of the goods and details of the transaction as are required for the purposes of Customs administration. It follows that the method of compilation of international trade statistics is determined and limited to some extent by Customs regulations and procedures. Where these affect the precise or consistent application of the statistical principles explained in the following section, their impact is described in qualitative terms only.

Statistics on trade in electricity and on exports of crude petroleum and natural gas cannot, for administrative reasons, be obtained from Customs documents. Trade in electricity is instead reported through the National Energy Board, while statistics on exports of crude petroleum and natural gas (by pipeline) are collected directly by the Industry Division of Statistics Canada; with important statistical consequences explained in Note 4.

Commencing with the May 1984 data export statistics for shipments of less than \$5,000 (up from \$2,500) and greater than \$800 (up from \$500) from Quebec, Ontario, Manitoba and British Columbia to the United States are estimated on the basis of a 20 per cent sample. The size of this sample is at present approximately 15,000 (up from 10,000) shipments per month. For further information, refer to the explanatory notes in the publication *Exports by Commodities* (cat. no. 65-004).

Effective January 1, 1982, the 10 per cent systematic sample of low valued import documents from the United States, as applied since January 1969 and revised in January 1975, has been discontinued. Starting with January 1984 data, all shipments exceeding \$800 are processed and compiled by complete count, while the value of shipments below \$800 is estimated. Prior to 1984 the low-value limit was \$500.

- B. **Concepts and Definitions Used in the Compilation of Canadian International Trade Statistics:** The most comprehensive set of principles for the compilation of trade statistics is to be found in *International Trade Statistics: Concepts and Definitions*, published by the United National Statistical Office (series M, No. 52; New York). The following notes are both a summary of these principles and a description of the choices and exceptions made in the case of Canada's international trade statistics.

1. **System of Trade:** Canadian statistics are tabulated according to the "general" system of trade. Thus *imports* include all goods which have crossed Canada's geographical boundary, whether they are entered through Customs for immediate consumption in Canada or stored in bonded Customs warehouses. *Domestic exports* include goods grown, extracted or manufactured in Canada (including goods of foreign origin which have been materially transformed in Canada). *Re-exports* are exports of goods of foreign origin which have not been materially transformed in Canada (including goods withdrawn for export from bonded Customs warehouses). *Total exports* are the sum of *Domestic* and *Re-exports*.

## NOTES EXPLICATIVES

- A. **Sources des statistiques:** Les statistiques sur le commerce international du Canada sont totalisées à partir des copies des documents administratifs recueillis par Revenu Canada (Douanes) dans ses bureaux de douane par tout le Canada. La Loi sur les douanes exige que chaque fois que des marchandises sont importées au Canada ou exportées du pays, une déclaration soit faite précisant la nature des marchandises et donnant le détail de l'opération commerciale d'après les besoins de la réglementation de l'administration douanière. Il s'ensuit que la méthode de production de statistiques sur le commerce international est déterminée et limitée dans une certaine mesure par les règlements et les procédures des douanes. Lorsque ceux-ci nuisent à l'application précise ou uniforme des principes statistiques exposés dans la section suivante, leur incidence est décrite en termes qualitatifs seulement.

Les statistiques sur le commerce de l'énergie électrique et sur les exportations de pétrole brut et de gaz naturel ne peuvent, pour des raisons administratives, être tirées des documents de douane. Le commerce de l'énergie électrique est plutôt fourni par l'intermédiaire de l'Office national d'énergie, tandis que les statistiques sur les exportations de pétrole brut et de gaz naturel (par oléoduc) sont recueillies directement par la Division de l'industrie de Statistique Canada; les conséquences importantes sur le plan statistique sont expliquées à la note 4.

Commençant avec les données de mai 1984 les chiffres d'exportation portant sur les livraisons avec une valeur inférieure à \$5,000 (était \$2,500) et plus que \$800 (était \$500) en provenance du Québec, de l'Ontario, du Manitoba et de la Colombie-Britannique vers les États-Unis sont préparés d'après un échantillon de 20 pour cent. Cet échantillon comprend actuellement approximativement 15,000 (était 10,000) envois par mois. Pour plus de renseignements, voir les notes explicatives dans la publication *Exportations par marchandises* (nº 65-004 au cat.).

À partir du 1<sup>er</sup> janvier 1982, l'échantillonnage systématique de 10 p. 100 du montant des marchandises de faible valeur importées des États-Unis, tel qu'appliqué depuis janvier 1969 et révisé en janvier 1975, a été discontinué. Commençant avec les données de janvier 1984, pour toutes les livraisons dont la valeur excède \$800, le traitement et le calcul sont exhaustifs, alors que la valeur des livraisons inférieures à \$800 est estimée. Avant l'année d'enquête 1984, la limite de faible valeur était \$500.

- B. **Concepts et définitions utilisés dans la production de statistiques sur le commerce international:** L'ensemble le plus complet de principes directeurs pour la préparation de ces statistiques est présenté dans *Statistiques du commerce international: concepts et définitions*, publié par le Bureau de statistique des Nations Unies (série M, nº 52, New York). Les notes suivantes résument ces principes et décrivent les choix et les exceptions dans le cas de la statistique du commerce international du Canada.

1. **Système commercial:** Les statistiques canadiennes sont totalisées selon le système commercial "général". Ainsi, les *importations* comprennent tous les biens qui ont franchi les limites géographiques du Canada, qu'ils soient passés par les douanes pour être consommés immédiatement au Canada ou qu'ils aient été entreposés en douane. Les *exportations nationales* comprennent les biens cultivés, extraits ou fabriqués au Canada (y compris les biens d'origine étrangère qui ont été transformés au Canada). Les *réexportations* sont des exportations de biens d'origine étrangère qui n'ont pas été transformés matériellement au Canada (y compris les biens retirés des entrepôts de douane en vue de leur exportation). Les *exportations totales* correspondent au total des *exportations nationales* et *réexportations*.

The trade statistics do not include exports to Canadian diplomatic or military posts abroad nor imports by foreign diplomatic or military posts in Canada because such posts are considered to be within the geographical boundary of the sponsor country. Purchases or sales of bunker supplies and stores for ships or aircraft engaged in international traffic and settlers' effects are excluded for practical reasons. Goods which cross the Canadian border for convenience of transportation only are not included in trade statistics.

2. **Coverage:** Merchandise trade includes only goods which add to or subtract from the stock of material resources in Canada as a result of their movement across the Canadian border. Consequently, goods intended to be returned to the exporting country after a short period of time are excluded from trade statistics (when this intention is apparent from the Customs documentation). Examples of such transactions are works of art loaned for exhibition, vehicles or horses exported to compete in races, and films exported for processing and return. Goods exported or imported for purposes of repair only are excluded from statistics, although payments of receipts for repairs are included in the trade statistics. Financial assets such as circulating coin, stocks, and bonds are also excluded from the trade statistics.
3. **Valuation:** Exports are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g., mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

*Imports* are generally recorded at the values established for Customs duty purposes according to the provisions of the Customs Act. Customs values are identical to selling prices for most arms-length transactions. However, Customs values exceed company transfer prices for most transactions between affiliated firms. (Beginning in 1970, imports of automotive products from the United States have been recorded at company transfer prices rather than Customs values.) Import documents are required to show values which exclude all transportation charges. Some imports from the United States are however purchased on a "delivered" basis and their prices therefore reflect an allowance for transportation costs.

4. **Timing:** Until January 1979, statistics for a month included all shipments for which Customs documents were received at Statistics Canada up to, and including, the last working day of the month. Starting with data for August 1979, the closing of the statistical month is defined according to the last calendar day of the month, based, as closely as practicable, on the date of clearance from Customs. Individual shipments may not be recorded in statistics until some time after their arrival or departure because of administrative procedures which permit late filing of documents. Trade in electricity; exports of both crude petroleum and natural gas; and imports of "Swap Oil" from the United States

La statistique du commerce ne prend pas en compte les exportations vers des missions diplomatiques ou militaires canadiennes à l'étranger ni les importations attribuables à des missions étrangères semblables au Canada, car on considère que ces missions ne se trouvent pas hors des limites géographiques du pays qui les a envoyées. Les achats ou les ventes d'approvisionnement de navires ou d'aéronefs affectés au transport international et les effets des immigrants sont exclus pour des raisons pratiques. Les biens auxquels on fait franchir la frontière canadienne uniquement pour en faciliter le transport sont laissés hors compte.

2. **Champ d'observation:** Le commerce de marchandises ne comprend que les biens dont le passage d'un côté à l'autre de la frontière canadienne augmente ou diminue le stock de ressources matérielles du Canada. Ainsi, les biens qui seront renvoyés dans le pays exportateur après un court laps de temps sont exclus de la statistique du commerce (lorsque cette intention se dégage des documents de douane). Citons à titre d'exemple les oeuvres d'art prêtées pour une exposition, les véhicules ou les chevaux exportés en vue d'une course, les films exportés pour être développés, puis retournés. Les biens exportés ou importés pour fins de réparation seulement ne sont pas pris en compte, bien que les paiements ou les recettes au titre des réparations soient portés dans la statistique du commerce. Des avoirs financiers comme le numéraire non périmé, les actions et les obligations sont également laissés hors compte.
3. **Evaluation:** Les *exportations* sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.

Les *importations* sont habituellement présentées selon les valeurs établies aux fins du prélèvement des droits de douane conformément aux dispositions de la Loi sur les douanes. Les valeurs des douanes sont identiques aux prix de vente dans le cas de la plupart des opérations entre parties indépendantes. Toutefois les valeurs douanières dépassent les prix de transfert des sociétés dans le cas de la majorité des opérations entre entreprises affiliées. (À partir de 1970, les importations de produits de l'industrie automobile en provenance des États-Unis sont indiquées aux prix de transfert et non pas selon les valeurs fixées en douane.) Les valeurs déclarées dans les documents d'importation ne doivent pas comprendre les frais de transport. Certaines importations en provenance des États-Unis sont toutefois sur une base de "livraison" et leur prix englobe par conséquent les frais de transport.

4. **Période:** Jusqu'à juillet 1979, les statistiques d'un mois donné visaient toutes les livraisons pour lesquelles Statistique Canada avait reçu des documents de douane jusqu'au dernier jour ouvrable du mois. À partir du mois d'août 1979, la fin du mois statistique correspond au dernier jour du mois civil où s'effectue, dans la mesure du possible, le dédouanement. De diverses livraisons peuvent ne pas être prises en compte dès leur arrivée ou leur départ à cause de la procédure administrative qui donne lieu à une présentation tardive des documents. Le commerce d'énergie électrique, les exportations de pétrole brut et de gaz naturel, et les importations selon l'arrangement avec les États-Unis pour des échanges de pétrole brut d'un mois donné sont présentés dans

for a given month are included in statistics for the following month because they are collected too late for inclusion in statistics for the current month. However, starting with the January 1984 data, exports of electricity, crude petroleum, and natural gas are subsequently shifted back one month, thus reflecting the true statistical month.

5. **Trading Partner Attribution:** The country classification employed by the International Trade Division of Statistics Canada is designed for purposes of economic geography and therefore does not reflect the views or intentions of the government of Canada on international issues of recognition, sovereignty or jurisdiction.

*Exports* are attributed to the country which is the last known destination of the goods at the time of export. (Many primary products are shipped to entrepôt points, particularly in Europe, for re-export to the ultimate destination which is unknown when the goods leave Canada.)

*Imports* are attributed to the country from which the goods were first consigned directly to Canada, whether or not this is the country of origin. An exception is made in the case of goods of Central or South American origin consigned to Canada from the United States; such imports are credited to the country of origin, except for "Swap Oil" from the United States which are credited to this country.

## 6. Revisions:

- a. **Data for current month:** Statistics for the current month published in the "Preliminary Statement of Canadian International Trade" (65-001P) and in the "Summary of Canadian International Trade" (65-001) contain preliminary figures. However, figures published in "Imports by Commodities" (65-007), "Exports by Commodities" (65-004), "Imports by Countries" (65-006) and "Exports by Countries" (65-003) have been verified for reporting or processing errors.
- b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the monthly reports for December have been published. In the case of the "Summary of Canadian International Trade" (65-001), the revised December figures appear in the January issue of the following year. Commodity/Country sub-totals revised by \$10,000 or more in any monthly publication are shown at the beginning of the reports 65-007 and 65-004.
- c. **Data for the previous year:** Revisions to the previous year appear in the December issue of the following year. Commodity/Country figures revised at that time are shown at the beginning of the reports 65-007 and 65-004. *When statistical series are adjusted for seasonal variations, the revised figures are reflected in the April issue of the "Summary of Canadian International Trade" (65-001).*

**Note:** Cumulative totals in all reports reflect the revisions applied up to the date of printing.

les statistiques du mois suivant parce qu'on obtient les données trop tard pour qu'elles puissent faire partie des statistiques du mois courant. Cependant, à compter des données de janvier 1984, les exportations d'électricité, de pétrole brut et de gaz naturel sont décalées d'un mois par la suite, de sorte qu'elles correspondent au mois statistique véritable.

5. **Attribution des partenaires commerciaux:** La classification des pays utilisée par la Division du commerce international de Statistique Canada a été conçue aux fins de la géographie économique et ne reflète donc pas l'opinion du Gouvernement du Canada relativement aux questions de reconnaissance, de souveraineté ou de compétence en matière internationale.

Les *exportations* sont attribuées au pays de dernière destination connue au moment de l'exportation. (De nombreux produits "primaires" sont expédiés vers des points d'entreposage, notamment en Europe, en vue de leur réexportation; la destination ultime de ces produits est inconnue lorsqu'ils quittent le Canada.)

Les *importations* sont attribuées au pays de première consignation directe des biens au Canada, que ce soit ou non le pays d'origine. On déroge à cette règle dans le cas des biens ayant comme région d'origine l'Amérique centrale ou l'Amérique du sud et expédiés au Canada depuis les États-Unis; ces importations sont portées au crédit du pays d'origine, sauf pour les échanges de pétrole brut avec les États-Unis qui sont crédités à ce pays.

## 6. Rectifications:

- a. **Données du mois courant:** Les statistiques du mois courant figurant dans le communiqué "Préliminaire sur le commerce international du Canada" (65-001P) et le "Sommaire du commerce international du Canada" (65-001) contiennent des chiffres préliminaires. Cependant, les chiffres dans "Importations par marchandises" (65-007), "Exportations par marchandises" (65-004), "Importations par pays" (65-006) et "Exportations par pays" (65-003) ont été vérifiés pour des erreurs de déclaration et de traitement.
- b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications mensuelles de décembre. Dans le cas de "Sommaire du commerce international du Canada" (65-001), les chiffres de décembre rectifiés paraîtront dans l'édition de janvier de l'année suivante. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/pays figurent dans les rapports mensuels au commencement des publications 65-007 et 65-004.
- c. **Données de l'année précédente:** Les rectifications à l'année précédente paraissent dans l'édition de décembre de l'année suivante. Les chiffres par marchandise/pays rectifiés à ce moment-là figurent au commencement des publications 65-007 et 65-004. *Quand les séries statistiques sont désaisonnalisées, les chiffres rectifiés sont pris en compte dans l'édition d'avril de "Sommaire du commerce international du Canada" (65-001).*

**Nota:** Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

7. **Indexes of Price and Volume:** The price indexes in this publication are current-weighted and are calculated from price relatives based on 1971 = 100. The weights are trade quantities for the month, quarter or year to which the index refers and hence change from period to period. The volume index is derived by dividing a value index by the corresponding current-weighted price index. The resulting volume index is, therefore, weighted with fixed 1971 price weights. The price indicators selected are either commodity unit values calculated directly from the trade statistics or, particularly in the case of end products, price indexes obtained from other Canadian or foreign statistics.

An explanation of the methodology used to construct the indexes is contained in a reference paper entitled "The 1971-based Price and Volume Indexes of Canada's External Trade", published in December 1976 as a supplement to this publication (65-001).

Current and fixed weighted export and import price and volume indexes on a Balance of Payments Basis presented in Part I of this publication are also available on CANSIM in matrices 3643, 3644, 3649, 3650, 3683 and 3684.

Customs based current and fixed weighted price indexes for the United States and the 10 SITC sections are available on CANSIM in matrices 3680, 3681, 3715, 3716.

8. **Provincial Detail:** Prior to the 1984 data year, *exports* statistics by province of lading indicated the province in which the goods were first laden aboard a carrier for export. In certain cases this may vary from a province of origin definition which represents the province in which the goods were grown, extracted or manufactured.

Commencing with the 1984 data, Statistics Canada and Customs & Excise, Revenue Canada have taken measures requiring the reporting of export shipments on a province of origin basis. It is recognized that the exporting community will be unable to effect the new provincial definition on a given date; therefore there will be a period of transition.

*Imports* statistics by province of clearance indicate the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs warehouse; this may not always coincide with the province in which the goods are consumed or enter the productive process.

9. **Principal Trading areas:** The "principal trading areas" shown in some tables include groupings which are defined as follows:

**Other E.E.C.:** Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands and Greece (effective January 1981). The United Kingdom is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada.

7. **Indices de prix et de volume:** Les indices de prix compris dans cette publication sont pondérés d'après les quantités mensuelles, trimestrielles ou annuelles du commerce correspondant à la période de l'indice et sont calculés d'après des prix relatifs de base 1971 = 100. Par conséquent ces pondérations sont variables d'une période à l'autre. Les indices du volume sont calculés en divisant l'indice de la valeur par l'indice du prix correspondant. L'indice du volume obtenu est donc implicitement pondéré par les prix fixes de l'année 1971. Les prix relatifs sont dérivés ou des valeurs unitaires calculés directement des statistiques du commerce international ou surtout pour les produits finis, des indices de prix obtenus d'autres sources canadiennes ou de l'étranger.

Des renseignements concernant la méthodologie employée dans le calcul des indices sont donnés dans un document de référence intitulé "Les indices de prix et de volume de base 1971 du commerce extérieur du Canada" publié en décembre 1976 sous forme de supplément à la présente publication (65-001).

Les indices de prix et de volume des exportations canadiennes et des importations, à pondération courante et fixe sur la base de la balance des paiements présentés dans la Partie I de cette publication sont aussi disponibles sur CANSIM dans les matrices 3643, 3644, 3649, 3650, 3683 et 3684.

Les indices de prix, à pondération courante et fixe, sur la base douanière pour les États-Unis et pour les 10 sections de la CTCI sont disponibles sur CANSIM dans les matrices 3680, 3681, 3715 et 3716.

8. **Statistiques provinciales:** Avant l'année d'enquête 1984, les statistiques sur les *exportations* par province de chargement indiquaient la province où les produits avaient été chargés initialement pour être exportés. Dans certains cas, il ne s'agissait pas de la province d'origine qui se définit comme étant la province où les produits ont été cultivés, extraits ou fabriqués.

À partir de l'année d'enquête 1984, Statistique Canada et Revenu Canada-Douanes et Accise ont pris des mesures pour que les livraisons à l'exportation soient déclarées par province d'origine. Il est certain que les exportateurs ne pourront appliquer la nouvelle définition provinciale à une date précise, aussi faut-il prévoir une période de transition qui aura une incidence sur les statistiques.

Les statistiques des *importations* par province de dédouanement présentent la province où les biens ont passé la douane en vue d'une consommation immédiate ou de leur entreposage en douane; cette province peut différer de la province de consommation ou d'entrée dans l'activité productive.

9. **Marchés principaux:** Les "marchés principaux" apparaissant dans certains tableaux comprennent les groupements définis comme suit:

**Autres C.E.E.:** Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas et Grèce (à partir de janvier 1981). Le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada.

**Other O.E.C.D.:** Austria, Finland, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand. (The E.E.C. countries, United States, Japan and Canada are also members of O.E.C.D. – the Organization for Economic Cooperation and Development.)

**Other America:** This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

10. **Sources of Further Information:** More detailed monthly, quarterly and annual trade statistics are published in the 65-xxx series of Statistics Canada publications. Detailed descriptions and indexes of the commodity classifications are also available. See the Statistics Canada publications catalogue for descriptions of the contents of the various publications. As a result of continuous research on trade statistics, additional reference materials are published from time to time. For example, The Reconciliation of U.S.-Canada Trade Statistics, published by the United States - Canada Trade Statistics Committee, is available on request from the address given below.

Trade statistics are also available on the CANSIM Main Base in the following matrices: 0021, 0022, 0876 to 0879, 3643, 3644, 3649 to 3719.

Questions concerning details of methods not covered by these notes should be addressed in writing to the Director, International Trade Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

**Autres O.C.D.E.:** Autriche, Espagne, Finlande, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. – l'Organisation pour la coopération et le développement économique.)

**Autres Amérique:** Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

10. **Sources de renseignements supplémentaires:** Des statistiques mensuelles, trimestrielles et annuelles plus détaillées sur le commerce paraissent dans la série 65-xxx des publications de Statistique Canada. On peut également se procurer des descriptions détaillées et des index des classifications de marchandises. Veuillez consulter le catalogue des publications de Statistique Canada pour une description du contenu des diverses publications. La recherche continue dans le domaine de la statistique du commerce donne naissance de temps à autre à de nouveaux documents de référence. Ainsi, on peut obtenir à l'adresse mentionnée ci-dessous un document sur le rapprochement des statistiques du commerce États-Unis-Canada publié par le comité de la statistique du commerce États-Unis-Canada.

Les statistiques sur le commerce sont également offertes sur la base principale de CANSIM dans les matrices suivantes: 0021, 0022, 0876 à 0879, 3643, 3644, 3649 à 3719.

Toute question au sujet des méthodes employées doit être adressée par écrit au directeur de la Division du commerce international, Statistique Canada, Ottawa, Ontario K1A 0T6.
